

Seminar Series

Spring 2024

Biological Sciences

- 1/19 Dr. Dawn Davis, PhD – University of Wisconsin-Madison
Hosted by: Dr. Sukanya Lodh
GLP-1 and CCK; New insights on pancreatic islet signaling from these classic gut hormones
- 2/2 Dr. Jane Lucas, PhD – Cary Institute of Ecosystem Studies
Hosted by: Dr. Nathan Lemoine
Stressed Out Soils: Understanding soil health and function in the era of global change
- 2/9 Dr. Deanna Arble, PhD – Marquette University
Hosted by: Biological Sciences Department
Two unexpected things that change the way you breathe
- 2/16 Dr. Veena Prahlad, PhD – University of Iowa
Hosted by: Dr. Anita Manogaran
Neuronal control over cell stress response pathways in a metazoan
- 3/1 Dr. Lexy von Diezmann, PhD – University of Minnesota
Hosted by: Dr. Lisa Petrella
How protein diffusion patterns genetic recombination
- 3/8 Dr. Kevin Webster, PhD – Diné College
Hosted by: Dr. Martin St. Maurice
Methane, Microbes, and Caves
- 4/12 Dr. Matthew Parsons, PhD – Memorial University of Newfoundland
Hosted by: Dr. Emily Sontag
TITLE TBD
- 4/26 Dr. Colin Conine, PhD – University of Pennsylvania
Hosted by: Dr. Lisa Petrella
The transmission of epigenetic information to offspring by sperm RNAs

Seminars will be held Fridays at 3:00 PM in Wehr Life Sciences 111

Support of the Scholl Endowment is Gratefully Acknowledged
