ATHLETIC TRAINING (4/18/06; Updated October 2013)
At the completion of the Athletic Training major, the graduate is able to:

1. Demonstrate technical proficiency in the field of athletic training as outlined in the Athletic Training Educational Competencies and Proficiencies of the National Athletic Trainers Association (NATA).

2. Apply critical thinking and evidence-based decision making in creating and implementing plans of care for both athletic and general populations with a variety of both acute and chronic conditions.

3. Exhibit values consistent with the Jesuit tradition of lifelong service and caring for others through the safe and ethical practice of athletic training as outlined by the National Athletic Trainers Association Board of Certification (NATABOC).
