Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

The communication skills survey results show that our students are communicating effectively which confirms anecdotal evidence from recruiters. The CPA exam results show show good results for the testing period 2008 (results lag by one year because of feedback from national organization), however one area where we could improve is Regulatory.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

Since students are expected to be confident, enthusiastic and have the ability to ask questions we need to address these items in our classes, particularly for those classes with group or individual presentations. While the results are satisfactory for the Regulatory section of the CPA exam, this is an area that we can improve performance.
