MARQUETTE UNIVERSITY
Program Assessment Report (AY2009-2010)
Athletic Training Major

Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

The athletic training major has achieved 100% of our learning outcomes in the "Met" or "Exceeds" category. These are based on clinical evaluations of our students’ performance, and are done independently by active clinicians in the field of athletic training. Further, 85% of our students pass the national athletic training certification exam, compared to the national average of 39%, lending support to the notion that this is one of the top programs available in athletic training.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

A few of our clinical skills that are evaluated had responses of "N/A" that approached 5-6%. The Clinical Coordinator of Clinical Education will explore whether there are clinical placements or feedback for the clinical instructors that can decrease the number of "N/A" responses on the clinical evaluations.
