Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

Eighty-four percent of the students we met with in individual career counseling appointments understood the services and resources available to them and had a clear understanding of what they needed to do next in order to pursue their career goals.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

Based on the result that only 50% of students we met with in individual career counseling appointments are able to articulate their interests, skills, and values and convey a clear career goal. This is a long-standing obstacle due to career education being provided in several places across campus without a unified message. In spite of that incohesion, the MUCSC will consider specific activities and questions to be posed in individual career counseling appointments to prompt students to identify their interests, skills, and values and generate a clear career goal.
