Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

Based on the results of a national credentialing examination for counseling, department students score about 47.5% higher than the national mean averages for the same examination and 34% higher than CACREP accredited programs. The department faculty are very pleased that these current test scores have remained consistently at this high level of performance for the past three years.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

Few students at the time of graduation had a portfolio they could present to prospective employers that represents their accumulative work in the program. The faculty are currently revising the portfolio process, and will require students to develop a portfolio that is more reflective of the practicing professional counselors.
