Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

100% of our students in this program have been assessed at satisfactory or exemplary on three separate measures in three different courses for this learning outcome: Analyze political, social, economic, legal and cultural issues in an educational organization. Across three courses 66-75% of our students have been rated "exemplary" on most indicators for this outcome.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

The Performance Indicator under Outcome #1 (Analyze political, social, economic, legal and cultural issues in an educational organization) states: Analysis presents understanding of how the past can inform an understanding of the extent to which current educational policies promote equity in a democratic society. Of the 11 students completing this task, 9 receive an "met expectations" rating and 2 received an "exceeds expectations" rating. We plan to discuss this with the instructor (Bob Lowe) of the History Course to determine ways in which student performance could be improved.
