Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

Our students performed very well (4.56, 4.57/5.0) in designing and implementing individual and group exercise programs, respectively. This is an improvement from previous and may be due to the advanced personal training and prescription programming created due to last year's assessment data.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

We have already begun the planning process on both the advanced elective course as well as the 0 credit seminar series, which students would be required to enroll in and attend each semester excepting the semester of their senior practicum.
