Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

We need to institute a capstone course. We are in discussions to develop a course titled "international business strategy," as a capstone class and require all IB Majors to take this course in lieu of our Mana 4101 (business strategy). We would then only assess this course and measure all of the IB learning outcomes on a consistent basis.

Alternatively, we may use the "Global Perspectives Inverntory (GPI)" to assess a series of relevant outcomes for our IB Majors. If adopted, we may need to re-examine our learning outcomes in light of the items most relevant in the GPI program.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

See above.
