Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

In the past year 100% of our incoming PhD students have passed the math portion of the PhD Proficiency Exam administered in the first year of the students residency. This evidence suggests that our students have the essential math skills necessary to succeed in our program.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

While the majority of our students eventually finish their studies culminating in the PhD, the time to degree of our students is longer than we would like. It is clear well defined plans for workload with clear deliverables could help reduce this time.
