Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

Our undergraduate nursing program has many strengths and produces graduates who are able to pass the national licensing examination (NCLEX) and practice competently as baccalaureate prepared nurses. The NCLEX results consistently exceed the national pass rate, and the clinical evaluations performed during the senior year demonstrate a high level of clinical competency.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

The benchmark on Physiological Adaptation content was not met. Undergraduate faculty are reviewing the core science courses for opportunities to strengthen science content and its integration into the curriculum. Physiological concepts have also been incorporated into patient care simulations.
