Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

Our sophomores at a five to one advantage are already able to articulate and to defend a valid scientific argument in front of their peers.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

Several of our seniors apparently have lost fundamental knowledge of physical principles in their quest for analyzing more complex physical analysis. We will encourage them to maintain their sense of practical knowledge as they advance in their careers.
