Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

Our results do vary from year to year based on the cadet class and the tailoring of the Leadership Development and Assessment Course each year. But we take critiques from the returning cadets who participated in training and make adjustments off their results and suggestions. This year, we've noticed that physical fitness is a continued issue with cadets. We also notice that while are cadets are well prepared for LDAC, they lack the knowledge of what they need to do to achieve the highest rankings. That will be a focus of this year's preparation.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

Leadership is always a big focus for this program, and this year will be no different. But we will incorporate more opportunities for leadership assessment, fair/accurate evaluations, and more detail in what can be done to go above and beyond the basic requirements for all the leadership positions. We will also be compiling training suggestions from the returning cadre and cadets from LDAC to make training more realistic and beneficial. All cadets will be required to pass certain common skills tests in order to attend LDAC next summer. We will also be adding more training opportunities to our schedule to ensure that cadets have an appropriate and balanced number of in class sessions as well as hands on opportunities.
