Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

Attendance by students to optional tutorial sessions (groups meet once per week throughout the semester) remains above 75%, a rate that suggests students strongly value the learning opportunities provided by the group tutorial sessions/model. Given that we arranged tutorial groups for over 2400 student requests last year, this high attendance rate suggests that increased demand has not diminished the student perceived learning value of the tutorial services offered.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

We are more concerned with identifying measures that tell us more than we already can observe about program effectiveness related to student learning. That will be our focus this academic year.
