Provide an example of the program’s most interesting or important assessment finding that demonstrates the program’s success associated with a program learning outcome.

We measured that 5 out of 6 students met or exceeded our standards of our MA exam. 5 out of 5 met or exceeded our thesis/final paper standard. We observed that sufficient discrimination in assessment criteria that differentiate between proficient and non-proficient results.

Describe an assessment result that indicates an opportunity for improvement and identify the specific actions the program will take to improve student learning.

In instances of borderline students, we observed that they need more assistance in preparation for exams. Faculty routinely and consistently volunteer to do this.
