

## **2 New Majors beginning in the fall of 2009**

### **Physiological Sciences major for Physical Therapy (P.T.) Students**

Within the Physiological Sciences major there is a track for direct admit P.T. students to earn a B.S. degree after their 4<sup>th</sup> year. Ideal major for P.T. students interested in combining clinical practice with a research career.

### **Biology for the Professions**

A second major for students in the College of Education with a desire to teach high school biology. It is specifically designed for middle and secondary school majors in the College of Education. The new major addresses the need for middle and high school science teachers locally and nationally and meets the content standards required for teacher licensure by the Wisconsin Department of Public Instruction.
