

## PUBLICATIONS

- 2006** Li, S., L. Yin, E.S. Cole, R.A. Udani, and K.M. Karrer. 2006. Progeny of germ line knockouts of ASI2, a gene encoding a putative signal transduction receptor in *Tetrahymena thermophila*, fail to make the transition from sexual reproduction to vegetative growth. *Developmental Biology*, 295:633-646.
- Eisen, J.A., R.S. Coyne, M. Wu, D. Wu, M. Thiagarajan, J.R. Wortman, J.H. Badger, Q. Ren, P. Amedeo, K.M. Jones, L.J. Tallon, A.L. Delcher, S.L. Salzberg, J.C. Silva, B.J. Haas, W.H. Majoros, M. Farzad, J.M. Carlton, R. K. Smith, Jr., J. Garg, R.E. Pearlman, K.M. Karrer, L. Sun, G.M. Manning, N.C. Elde, A.P. Turkewitz, D.J. Asai, D.E. Wilkes, Y. Wang, H. Cai, K. Collins, B.A. Stewart, S. R. Lee, K. Wilamowska, Z. Weinberg, W.L. Ruzzo, D. Wloga, J. Gaertig, J. Frankel, C.-C. Tsao, M.A. Gorovsky, P.J. Keeling, R.F. Waller, N.J. Patron, J. M. Cherry, N.A. Stover, C.J. Krieger, C. del Toro, H.F. Ryder, S.C. Williamson, R.A. Barbeau, E.P. Hamilton, E. Orias. (2006) Macronuclear genome sequence of the ciliate, *Tetrahymena thermophila*, a model eukaryote. *PLoS Biology* 4:9:e286:1-23
- 2005** Liu, Y., X. Song, M.A. Gorovsky and K.M. Karrer. 2005. Elimination of foreign DNA during somatic differentiation in *Tetrahymena* is dosage dependent. *Eukaryotic Cell*, 4:421-431.
- 2004** Wuitschick, J.D., P.A. Lindstrom, A.E. Meyer and K.M. Karrer. 2004. Homing endonucleases encoded by germ line limited genes in the ciliate *Tetrahymena* have APETELA2 DNA binding domains. *Eukaryotic Cell*, 3:685-694.
- 2003** Wuitschick, J.D. and K.M. Karrer. 2003. Diverse sequences within Tlr elements target programmed DNA elimination in *Tetrahymena thermophila*. *Eukaryotic Cell*, 2:678-689.
- 2002** Karrer, K.M. and T.A. VanNuland. 2002. Methylation of adenine in the nuclear DNA of *Tetrahymena* is internucleosomal and independent of histone H1. *Nucl. Acids Res.*, 30:1364-1370.
- Udani, R.A. and K.M. Karrer. 2002. ASI1, a gene encoding a novel leucine zipper protein, is induced during development of the macronucleus in *Tetrahymena*. *Mech. Dev.*, 118:215-218.
- Wuitschick, J.D., J.A. Gershan, A.J. Lochowicz, S. Li and K.M. Karrer. 2002. A novel family of mobile genetic elements are limited to the germ line genome in *Tetrahymena thermophila* *Nucleic Acids Res.*, 30:2524-2537.
- 2000** Patil, N.S. and K.M. Karrer. 2000. A developmentally regulated deletion element with long terminal repeats has cis-acting sequences in the flanking DNA. *Nucl. Acids. Res.*, 28:1465-1472.
- Gershan, J.A. and Karrer, K.M. 2000. A family of developmentally excised DNA elements in *Tetrahymena* is under selective pressure to maintain an open reading frame encoding an integrase-like protein. *Nucl. Acids Res.*, 28:4105-4112.
- 1999-00** Karrer, K.M. and T.A. VanNuland. 1999. Nucleosome positioning is independent of histone H1 *in vivo*. *J. Biol. Chem.*, 274:33020-33024.
- 1998-99** Karrer, K.M. and T.A. Van Nuland. 1998. Position effect takes precedence over target sequence in determination of adenine methylation patterns in the nuclear genome of a eukaryote, *Tetrahymena thermophila*. *Nucl. Acids Res.*, 26:4566-4573.

## PUBLICATIONS (continued)

- 1997-98** Patil, N.S., P.M. Hempen, R.A. Udani and K.M. Karrer. 1997. Alternate junctions and microheterogeneity of Tlr1, a developmental regulated DNA rearrangement in *Tetrahymena thermophila*. *J. Euk. Microbiol.*, 44:518-522.
- 1995-96** Van Nuland, T.A., E.E. Capowski and K.M. Karrer. 1994. Position effect for adenine methylation in the macronuclear DNA of *Tetrahymena*. *Gene*. 157:235-237.
- 1994-95** Wells, J.M., J.L.E. Ellingson, D.M. Catt, P.J. Berger and K.M. Karrer. 1994. A small family of elements with long inverted repeats is located near sites of developmentally regulated DNA rearrangement in *Tetrahymena*. *Mol. Cell. Biol.*, 14:5939-5949.
- 1992-93** Karrer, K.M., S. L. Peiffer and M.E. DiTomas. 1993. Two distinct gene subfamilies within the family of cysteine protease genes. *Proc. Natl. Acad. Sci.*, 90:3063-3067.
- 1990-91** Karrer, K.M. and S. Stein-Gavens. 1990. Constancy of adenine methylation in the macronuclear DNA of *Tetrahymena*. *J. Protozool.*, 37:409-414
- Stargell, L.A., K.M. Karrer, and M.A. Gorovsky. 1990. Transcriptional regulation of gene expression in *Tetrahymena*. *Nucl. Acids Res.*, 18:6637-6640.
- Wuitschick, J.D. and K.M. Karrer. 1999. Analysis of genomic G+C content, codon usage, initiator codon context and translation termination sites in *Tetrahymena thermophila*. *J. Euk. Microbiol.*, 46:9-17.
- 
- At Marquette University
- 1989** Rogers, M.B. and K.M. Karrer. Cloning of *Tetrahymena* genomic sequences whose message abundance is increased during conjugation. *Devel. Biol.*, 131:261-268.
- Harrison, G.S. and K.M. Karrer. Methylation of replicating and nonreplicating DNA in the ciliate *Tetrahymena*. *Molec. Cell. Biol.*, 9:828-830.
- Capowski, E.E., J.M. Wells, G.S. Harrison, and K.M. Karrer. Molecular analysis of N<sup>6</sup>methyladenine patterns in *Tetrahymena thermophila* nuclear DNA. *Molec. Cell. Biol.*, 9:2598-2605.
- 1988** Huvos, P.E., J.A. Sanchez, K.M. Kramer, K.M. Karrer, and L.J. Wangh. Two-dimensional DNA gel electrophoresis as a method for analysis of eukaryotic genome structure: evaluation using *tetrahymena thermophila* DNA. *Biochem. Biophys. Acta*, 942:325-333.
- Karrer, K.M. and M.-C. Yao. Transformation of *Tetrahymena* with hypermethylated rRNA genes. *Molec. Cell. Biol.*, 8:1664-1669.
- 1987** Stein-Gavens, S., J.M. Wells, and K.M. Karrer. A germ line specific DNA sequence is transcribed in *Tetrahymena*. *Devel. Biol.*, 120:259-269.
- 1986** Harrison, G.S., R.C. Findly, and K.M. Karrer. Site specific methylation of adenine in the nuclear genome of a eukaryote. *Tetrahymena Molec. Cell Biol.*, 6:2364-2370.
- Allitto, B.A. and K.M. Karrer. A family of DNA sequences in reproducibly rearranged in the somatic nucleus of *Tetrahymena*. *Nucl. Acids Res.*, 14:8007-8025.

**PUBLICATIONS (continued)**

- 1985** Karrer, K.M. Nonrandom localization of DNA sequences in the crescent micronucleus of *Tetrahymena*. *Protozool.*, 32:555-557.
- Rogers, M.B. and K.M. Karrer. Adolescence in *Tetrahymena thermophila*. *Proc. Natl. Acad. Sci. U.S.A.*, 82:436-439.
- Harrison, G.S. and K.M. Karrer. DNA synthesis, methylation and degradation during conjugation in *Tetrahymena thermophila*. *Nucl. Acids Res.*, 13:73-87.
- 1984** Karrer, K.M., S.S. Gavens, and B.A. Allitto. Micronucleus specific DNA sequences in an amiconucleate mutant of *Tetrahymena*. *Devel. Biol.*, 105:131-129.
- 1983** Karrer, K.M. Germ line specific DNA sequences are present on all five micronuclear chromosomes in *Tetrahymena thermophila*. *Molec. Cell Biol.*, 3:1909-1919.
- 1980** Cech, T.R. and K.M. Karrer. Chromatin structure of the ribosomal RNA genes of *Tetrahymena thermophila* as analyzed by trimethylpsoralen crosslinking *in vivo*. *J. Molec. Biol.*, 136:395-416.
- 1976** Karrer, K.M. and J. G. Gall.. The macronuclear ribosomal DNA of *Tetrahymena pyriformis* is a palindrome. *J. Molec. Biol.*, 104:421-453.
