Rajendra “Raj” Rathore
The Habermann Distinguished Professor of Chemistry

Departed … February 16, 2018

He lived to discover while also discovering how to live … becoming a loving husband and father, as well as a selflessly generous colleague and inspiring mentor and teacher.

Just when his candle was so brightly burning … in 2017 he and his small group published 15 papers in highly prestigious journals, including JACS, Angewandte Chemie, J. Phys. Chem. Lett. and others.
