

## Brain Dissection and Neuroscience: Applications to Disorders of Language and Speech Functions

### Comments by 2006 participants

Amy Carle, CCC-SLP, Tempe, AZ.

"An outstanding course that attempted to address the breadth and depth of neuroscience. I loved the multi-disciplinary approach and speakers from a variety of disciplines. Excellent handouts and reference materials."

Erica Reisig, CCC-SLP, Chicago, IL.

"This course fully integrates neural physiology with functional clinical diagnoses and decision-making. The brain dissection provides an excellent means to learning neural anatomy..."

Laura Maxwell, District Manager, Aegis Therapies, MCD-CCC-SLP.MS.

"After 30 years of practice, I finally have a clear understanding of neurological function and speech/language disorders."

Christine Bove-Ferreira, CCC-SLP, Oxford, NJ.

"This coursework should be required in all graduate programs in speech-language pathology. It has given me a wonderful working knowledge of neuroscience and speech pathology."

Johanna Imbesi, CCC-SLP, Ellicott City, MD.

"SUPERB!! I could take this course again. The breadth of information surpasses that of my other courses (cont. ed.) that I have taken. Many thanks for a great learning experience."

Cristina Harman, CCC-SLP, Oriedo, FL.

"The course was everything in one...enlightening, comprehensive, educational, enjoyable, and fascinating."

Carol Lynn Rasploch, CCC-SLP, South Milwaukee, WI.

"Outstanding! Beautifully orchestrated! Provided a tremendous service to our profession, to our community (Milwaukee and Marquette), and to those patients we serve. Thank you!! I feel privileged to have attended this high-quality in-depth course!"

Patricia Partin, CCC-SLP, Crown Point, IN.

"This course had an illuminating "hands on" approach to applying neuroscience principles to the "real world" of utilizing clinical skills to assess patients with neurological deficits..."

Kelly Maatz, CCC-SLP, Grosse Ile, MI.

"Finally—a course that lives up to its advertising! Content: invaluable. Faculty: unparalleled. I thought it almost impossible to find a course of this caliber."

Darath Fisher, CCC-SLP, IA.

"My understanding of neuroscience has increased one-hundred fold. I will be a better clinician after attending this conference."

Heike Kessler-Heiberg, MA CCC-SLP San Diego, CA.

"By far, one of the best courses I have ever taken! Covered a tremendous amount of material. The actual brain dissection helped me understand the CNS in a way that photographs could never do."

Lois Mishkin, Mountainside, NJ.

"In 35 years in this field this rates as one of the best courses I have ever taken and should be a requirement in universities!"

Tami Brancams. Reno, NV.

"Thank you for compiling such a knowledgeable group of professors who are passionate with what they do and generous to share their knowledge and time with us. Time, energy and money well spent in my professional growth."

Sheila Lundstrom M.A. CCC-SLP. Woodland, CA.

"The course was by far the most beneficial neuroanatomy class I've taken. Information was presented in a very clear and interesting way. The brain dissection was instrumental in understanding and memory of brain anatomy."

Jacquie Kurland: Newburyport, MA.

"This is an outstanding summary of a year's coursework packed into three days-incredible."

Renxe McClure: Bloomington, IL.

"This is such an excellent review for teaching our Neuro courses. So good I did it twice."
