- 12:45 p.m. Closing remarks
- 12:50 p.m. Event end

Panelists

Michael Janasik, Account Manager

BloodCenter of Wisconsin | michael.janasik@bcw.edu | 414-937-6290 | www.bcw.edu

My diverse educational background includes a bachelor's degree from UW-Madison in Biochemistry and Economics, the Specialist in Blood Banking Program at the BloodCenter of Wisconsin and I am currently enrolled in the Masters of Transfusion Medicine program at Marquette. Upon completion of the MSTM I will likely pursue a MBA.

Jennifer L. Kujawa, Identification Technician

Milwaukee Police Department | jlkuja@milwaukee.gov | 414-935-7386 | www.milwaukee.gov

I attended the University of WI-Oshkosh and the University of WI-Milwaukee and majored in Criminal Justice. I have been on the Milwaukee Police Dept since 1993. I have attended and received many certificates of completion in many different forensic areas consisting of fingerprint training, crime scene evidence training, evidence photography, footwear and tire track impressions, DNA, courtroom testimony and advanced death investigations and many others (approximately 400 hours of above and other various training). Other activities include ID Division forensic training and instructor for the recruit classes, new detective classes and new supervisor classes throughout the Milwaukee Police Department. The Forensic Organizations I am a member of include the International Association for Identification (IAI) since 1999 and the Wisconsin Association for Identification (WAI) since 1999. I am a member of the Police Officer Support Team (POST) for the department and am an "oral rater" for the oral interview application process for the Milwaukee Police Department.

Brad Pietz, MS, Director of Product Development

BloodCenter of Wisconsin | brad.pietz@bcw.edu | 414-937-6266 | www.bloodcenter.com

All of my completed formal education has been in the biotechnical arena. I have undergraduate and graduate degrees from the University of Wisconsin, Madison in Biochemistry, Molecular Biology, and Microbiology. I am currently in my second semester of the executive MBA program at UW-Milwaukee. I worked for several years in molecular biology research product development at Sigma Chemical Company (St. Louis, MO). I have been with BloodCenter for 6 years, originally hired as a development scientist in the Diagnostic Laboratories. I have assumed increasing responsibilities since then (including business development and project management experience). I now manage the operations of the Product Development Laboratory and our new product pipeline. I also evaluate emerging technologies and coordinate contract research efforts. I have additional on the job business experiences gained while managing our family mirror and glass fabrication business for several years. My biggest career challenge and success are one in the same, transitioning from an individual contributor (bench research scientist) to a research and development manager with strategic planning responsibilities.
