Third World Politics

This course deals with the socioeconomic and political challenges that developing or "third world" countries face in today's globalized world. It focuses on such topics as the nature of underdevelopment, colonial experiences and their legacies, the extent and implications of ethnic, cultural, and religious divisions, relationship between economic and political development, and the consequences of the development models and strategies to which third world countries have been subjected by their own governments and by foreign powers and international institutions. The readings include "third world" novels by Achebe and Mahfouz (students will choose one), an Annual Editions anthology of short (3- to 10-page) articles and essays on development topics; a book by a Nobel Prize-winning Indian economist (Amartya Sen); Handelman's text on the challenges of Third World development; and the 2006 U.N. Human Development Report that analyzes the global water crisis.

The course will require active student participation. Students will be assigned to work groups that will function both in and outside of class, helping students to digest course materials, to prepare for classes, quizzes, and essay exams, and to participate more effectively in class discussions by formulating questions and responding to those by others. Grades will be assigned along the following lines: participation – 20%; quizzes (4) – 20%; the mid-term essay exam – 20%; and the final essay-exam – 40%. The questions for both the mid-term and final essay-exams will be distributed roughly a week in advance of the day on which the essays are to be submitted.

The following books should be purchased by all:

Amartya Sen, Development as Freedom, Anchor, paperback;
Annual Editions, Developing World 07/08, 17th edition;

In addition, students should purchase either one of the following:

Chinua Achebe, A Man of the People, Anchor, paperback; or Naguib Mahfouz, Adrift on the Nile, Anchor, paperback.

May 3rd – The Importance of Politics (on electronic reserve)

Final Essay - Exam Due - May 7th
(challenging the view that successful development requires utterly free markets, reductions in state spending and involvement, and governments capable of resisting popular demands and pressures);

Theoretical perspectives geographic - crucial geographical differences between and within countries and regions; vs. institutions; the “right” economic policies; cultural values and attitudes;

Globalization vs. its critics - it is not globalization as such, but truncated or one-dimensional globalization (of capital but not labor) that is problematic for most third world countries.

Why politics (functional and predictable political institutions) and economics (access to markets, investment in worker productivity, are important
