Grants and awards

Congratulations to the following individuals and groups on their recent accomplishments:

- **Drs. Nathan Weise, assistant professor in electrical and computer engineering,** and Anthony Bowman, research assistant professor in mechanical engineering, have received a \$632,437 award from the U.S. Department of Energy titled, "Advanced Parallel Resonant 1MHz, 1MW, Three Phase AC-to-DC Ultra-Fast EV Charger." Their project will develop a small, compact, lightweight and efficient 1MW battery charger for electric vehicles that, if successful, could help dramatically reduce charging times to a matter of minutes for large batteries.
