\* Those students planning to attend medical or dental school are advised not to accept AP credit or placement in physics.

# Science and engineering majors should note that credit received does not include lab credit. Labs must be completed at Marquette.

Degree-seeking matriculated students may be granted advanced placement or credit for college level courses taken in high school. Usually such courses are under the auspices of the Advanced Placement Program of The College Board, and tests are taken upon the recommendation of high school teachers. The tests are administered by The College Board only in the high schools.

Marquette University faculty committees review the content of the Advanced Placement Program to determine course equivalents and required scores. Test results, sent by the College Board Advanced Placement Program, are received during the summer prior to enrollment. Students are notified by mail of the decision concerning advanced placement shortly after the university has received the test results.

The following chart lists the advanced placement subjects accepted at Marquette and the amount of credit that may be awarded for each score. AP credit awards are similar to transfer credit in that they are not calculated into the student's cumulative grade point average. Students with AP credit awards are encouraged to consult with respective departments prior to registering for more advanced courses in the freshman year.

Additionally, pre-medical or pre-dental students should consult with the health professions adviser before accepting AP credits.
