

PPO Plan Provider Network
Health EOS
www.healtheos.com | (800) 279-9776

To find in-network providers for the PPO Plan, you will need to contact Health EOS. Below are the steps you should follow to find an in-network provider using their website: **www.healtheos.com**.

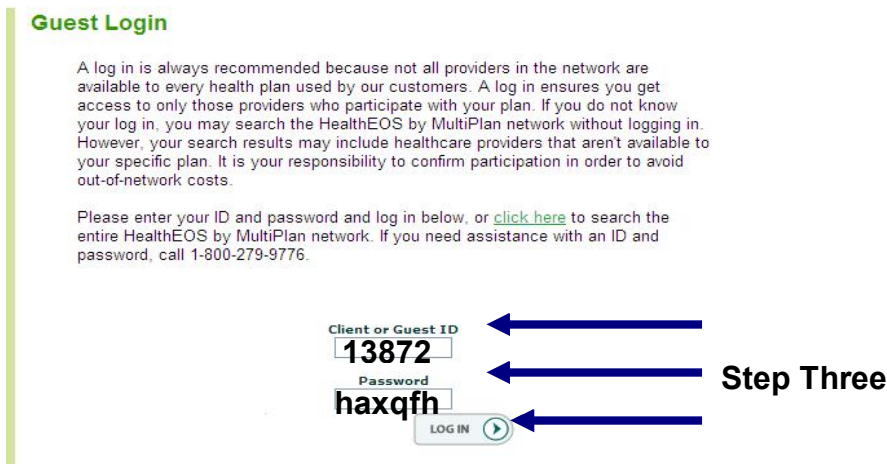

1. Go to www.healtheos.com and click on “**Search the Networks.**”

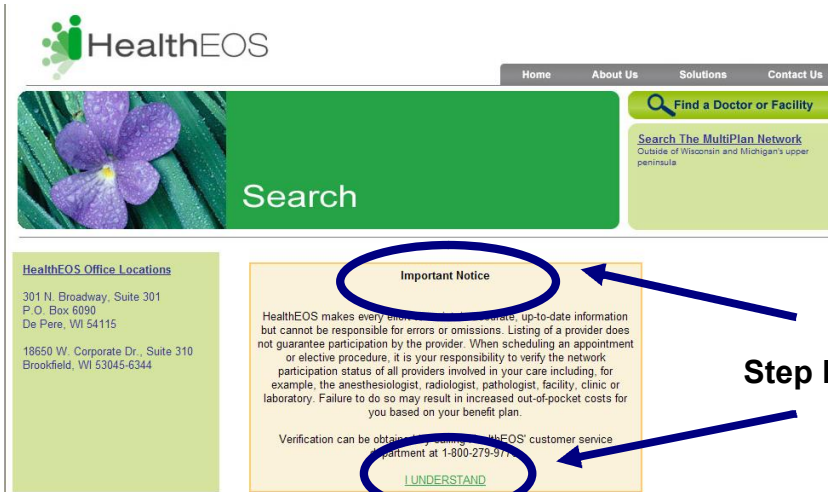

2. You will be directed to the Network Search Page. Click on the “**HealthEOS H+**” icon to begin your search.

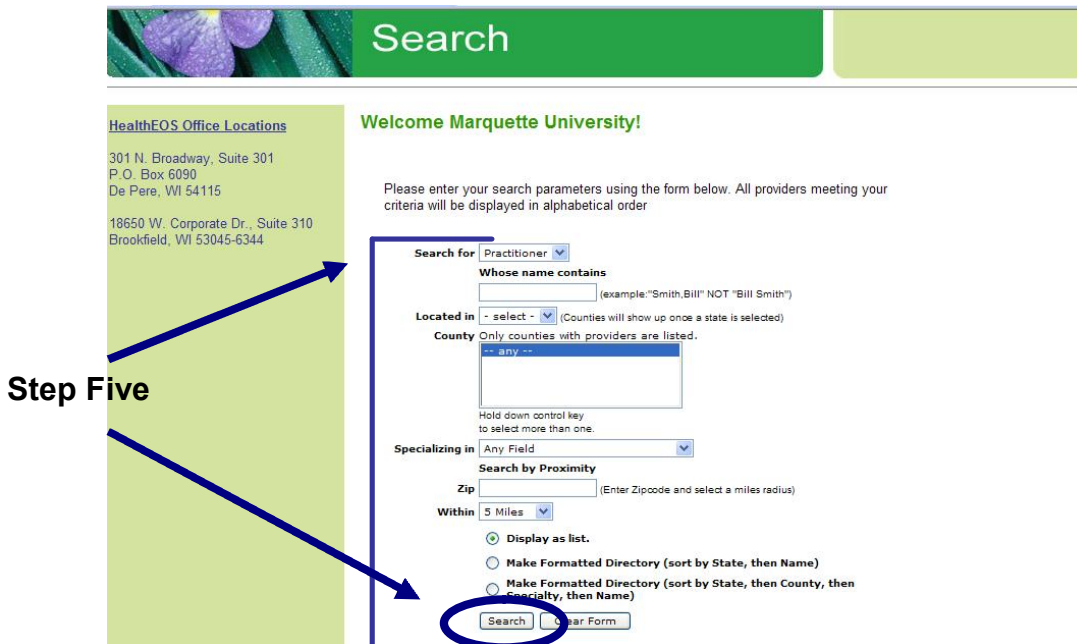

3. The Guest Login screen will prompt you to enter Marquette’s Client ID and Password. **Click in the text field** and enter the **Client ID: 13872** and **Password: haxqfh**. After you have entered this information, click “**Log In.**”

4. Read the website's disclaimer. If you are in accordance with the disclaimer, click "I Understand."

5. The in-network provider search tool will be displayed before you. Enter your physician's information and click search. If your physician is in-network, you *must* go to the location listed on the website. If your physician is out-of-network, your search will not have any results and the screen will be blank.

For additional confirmation that your physician is in-network, you can also call Health EOS at (800) 279-9776.

Marquette University offers, at no cost to you, a travel wrap-around network called the Private HealthCare Systems network (PHCS). This network should be used only when you are seeking coverage when traveling outside of Wisconsin. If you see a PHCS provided your medical services will be paid in-network.

Go to www.phcs.com. Under Health Plan Members, **click search for a provider**. You will be directed to a welcome page. After reading the PHCS disclaimer and agreeing to the PHCS provisions, **click search on-line**. Next, step one will ask you to **provide a physician or hospital name**. Step two will ask you to **choose a network, select Healthy Directions**.

If you find an in-network provider, you should always print the information you find.
