

Cisco VPN client installation for Mac OS X version 10.4 or newer, including Intel-Macs.

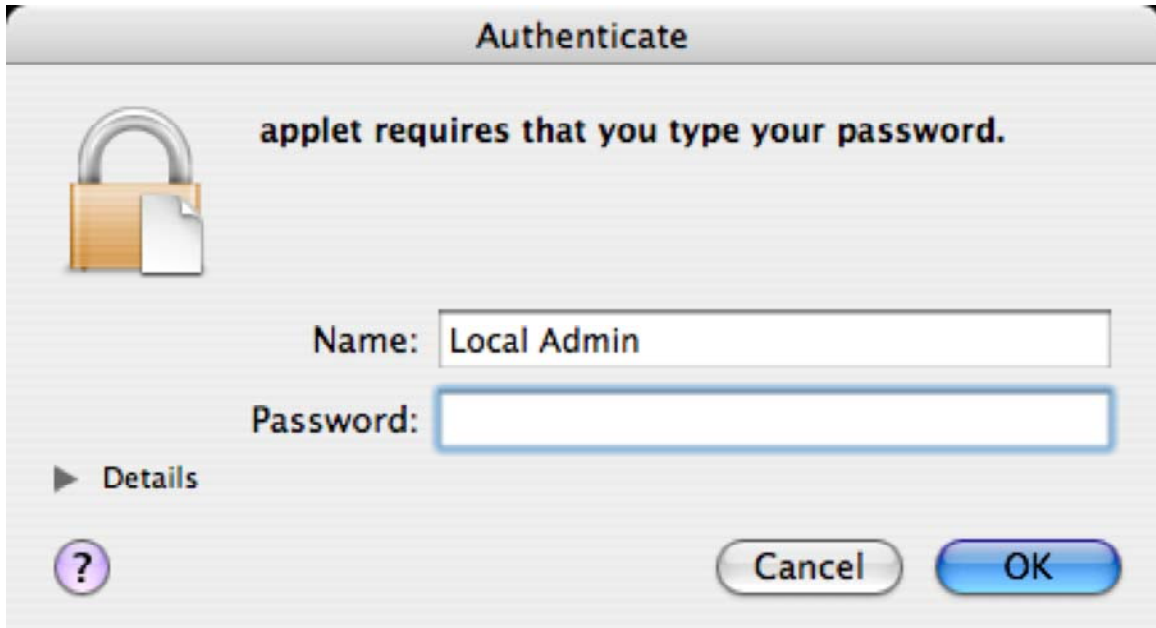

1. Click on the link [Download Cisco VPN for Mac OS X](#).
2. Open the downloaded file, **VPN Client 4.9.01.0080.dmg.gz**, and then double-click **VPN Client 4.9.01.0080.dmg**
3. To begin installation, double-click **VPN Client Installer 4.9.01.0080**

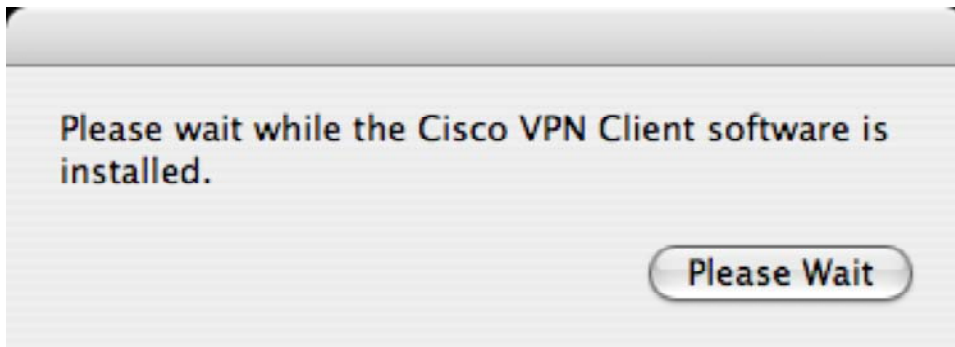

4. Click **OK**.

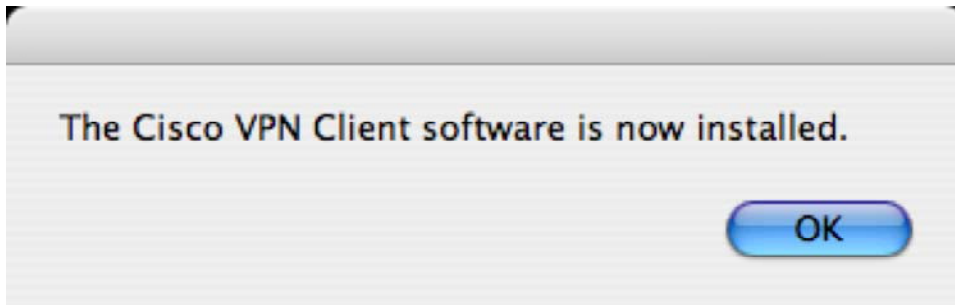

5. Authentication is required to proceed with the software installation.
Enter the password that you use to log into your Mac and then click **OK**.

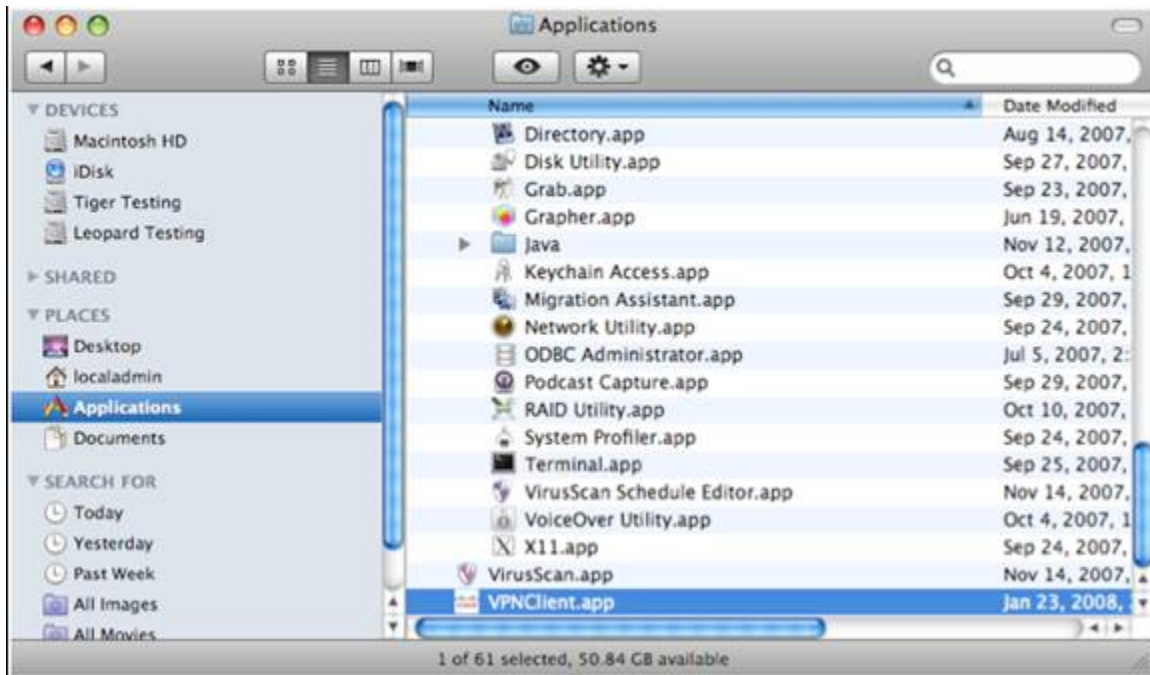

6. A window similar to the one pictured here will open.

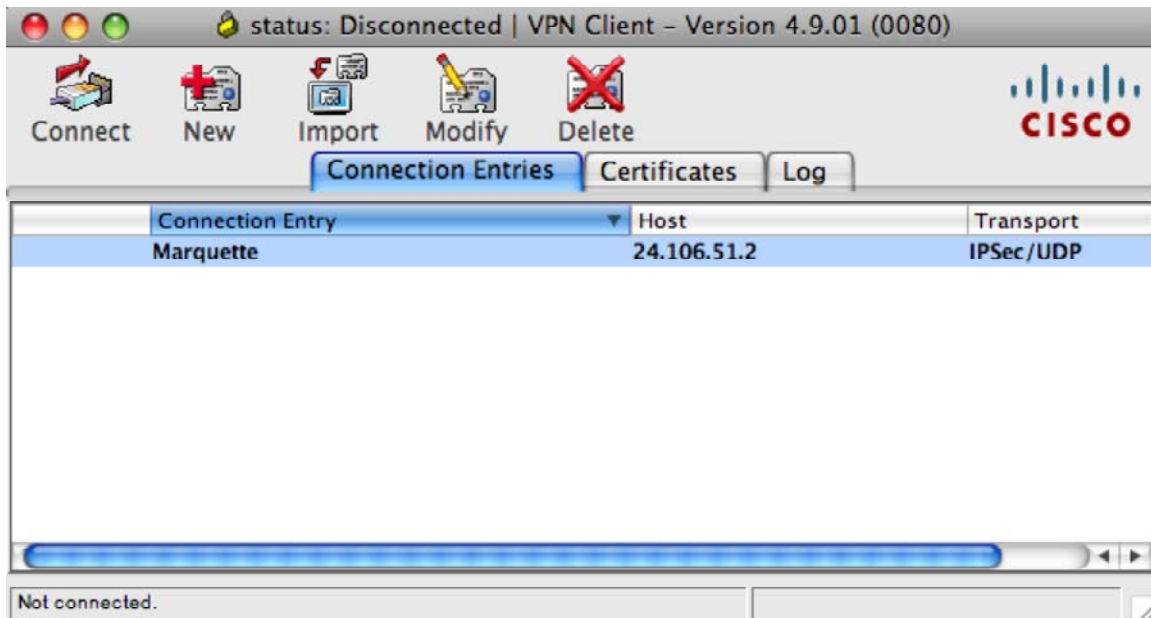

7. When the software is finished installing, you will be presented with a screen as shown here. Click on the **OK** button to complete the installation.

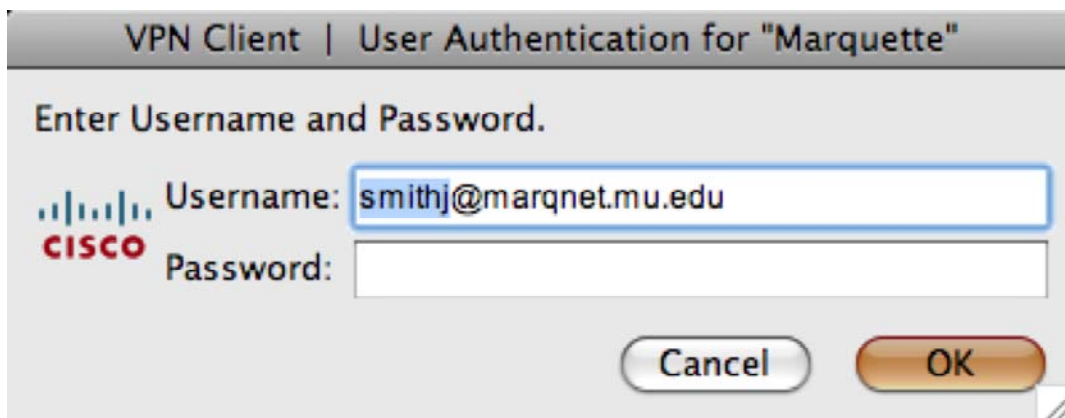

8. Navigate to the **VPNClient.app**, located in your Applications folder as shown here. Double-click on the application to launch.

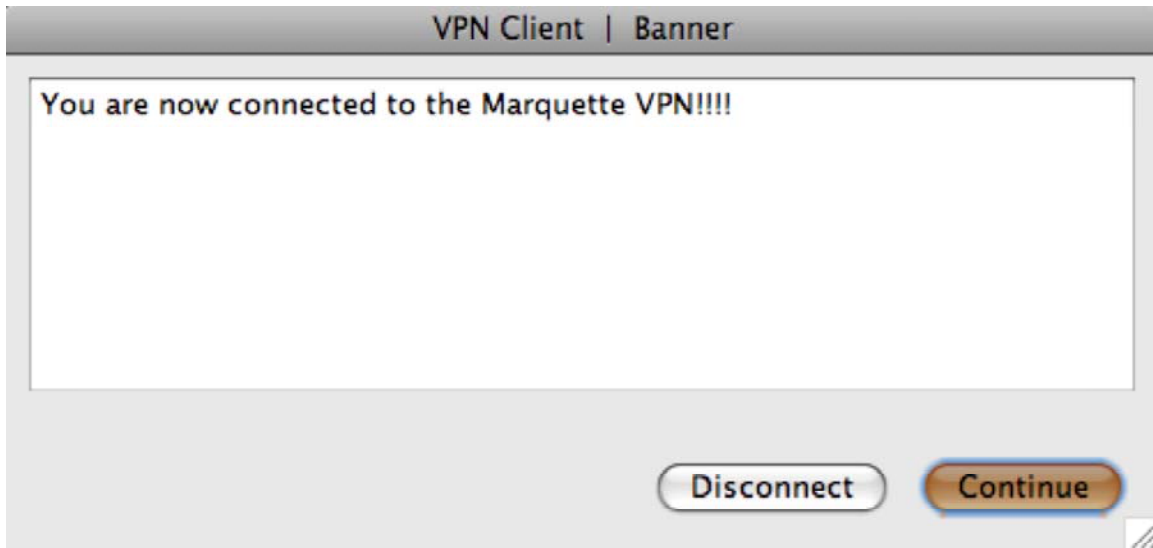

9. When the application launches, the connection window opens. Click on the **Connect** icon in the upper left section of the window.

10. When the authentication window opens, enter your MARQNET (email) username to the left of the "@" symbol, leaving the marqnet.mu.edu as shown. Enter your password and then click **OK**.

11. You are now connected to the Marquette VPN. Click **Continue** to begin working on Marquette's network.

12. When you are ready to disconnect from the Marquette network, simply click on the **Disconnect** button in the upper left corner of the connection window and then quit the application.
