

SPATIAL DATA ANALYTICS WORKSHOP

Join the **Workshop on Spatial Data Analytics** designed for undergraduate students interested in spatial data collection, analysis, and applications.

The workshop includes:

- interactive hands-on learning activities
- collaboration with community stakeholders
- collaboration with fellow students and faculty (Arts and Sciences and Engineering)

Participants will learn to:

- obtain crime, civic participation, environmental, and socioeconomic data
- create spatial visualizations of data using Geographic Information Systems (GIS)
- collect real-time data using advanced data collection technologies
- assess the utility of spatial analytics for big data

Participants earn a certificate of completion!

Students interested in participating in the workshop should send email to aleksandra.snowden@mu.edu with the subject line "Application for Workshop on Spatial Data Analytics." In the email application, students should describe in about 100 words their interest in the workshop.

January 10 - 12, 2018
Lalumiere Language Hall # 130

Cost: Free!

Daily Schedule

8:30am: Registration and
Breakfast (LLH # 177)

9am-12pm: Workshop

12pm-1pm: Lunch

1pm-3pm: Self-reflection and
Engagement with Community
Stakeholders

Application submission deadline:
December 15, 2017

Submit application to
aleksandra.snowden@mu.edu
