¹ This represents 10.9% of all eligible voters (compared to final election turnout of 8.9% in Fall 2008 and 9.5% in Fall 2007).

² The MUSG Election Committee found the Halunen campaign responsible for violating an election rule and as a result penalized him 50% of the votes he received in the election. His campaign still has the opportunity to appeal, and although it may affect the final vote total and percentages, it does not affect the ability to determine a winner in the election.
