

INRC Seminar Schedule

September 29

“Modeling and Optoelectronic
Realization of an Artificial
Cortex”

Ramin Pashaie, Ph.D.
University of Wisconsin -
Milwaukee

October 13

“Modulation of glycine-
activated ion channel function
and pharmacology by
intracellular G β signaling”

Luis G. Aguayo, Ph.D.
University of Concepcion, Chile

October 15

“Aging, training, and control of
muscle force”

Brian Tracy, Ph.D.
Colorado State University

November 3

“Stress, drugs, and dopamine:
interactions that increase
addiction susceptibility”

Michaela Marinelli
Chicago Medical Center

November 17th

“Neural Systems regulating
anxiety states: focus on
serotonergic systems”

Chris Lowery, Ph.D.
University of Colorado

December 1st

TBA

Janet Neiswander, Ph.D.
Arizona State University

December 8th

“Dietary amino acids and
proteins influence serotonin
synthesis in brain: functional
implications”

John Fernstrom
University of Pittsburg

All seminars will be held in Schroeder Complex 256 at 3:30
