We are recruiting 8 to 12-year-old children and their parent/legal guardian to help us understand how children and parents complete neuropsychological tests and questionnaires.

Q: What are the requirements to participate in this study?
To participate:
• A parent/legal guardian must attend the research session with your 8- to 12-year-old child.
• Your child must be able to listen to verbal instructions, draw simple shapes, and push computer keys in response to numbers on a computer screen.
• Children with or without previous diagnosis of learning, attention, developmental, or psychological disorders are encouraged to participate.

Q: What will I have to do?
• The parent/legal guardian and the 8- to 12-year-old child must attend one research session that will last 90 minutes at the Marquette University Center for Psychological Services. Free parking will be provided.
• During a test session your child will answer questions and complete a drawing, a questionnaire, and a computer task.
• You will be asked to complete two paper-and-pencil questionnaires while your child is in the test session.

Q: What will I receive for participating?
• The parent/legal guardian will receive $20 cash immediately following the session.
• Your child will receive a junior researcher certificate, a McDonald's Be Our Guest coupon, and a prize from a prize box.

Q: What are the risks and benefits to participating?
• The risks for participation are very minimal and no greater than your child encounters in day-to-day life (e.g. possible frustration with a school like tasks).
• You and your child may enjoy participating in the study. This study could also benefit society by helping us understand how children complete tests and questionnaires that will be used in clinical neuropsychological evaluations and improve clinical care provided to others.

If you have additional questions or would like to participate in the research study, please contact Elisabeth Vogt or Kathryn Ritchie at 414-288-7221 or Elisabeth.vogt@marquette.edu or Kathryn.ritchie@marquette.edu.
