Course Title: The Bible through the Ages

Description:
This course is designed to provide students with a general history of the Bible with two main emphases: 1) how the Bible came to be (its origin, canon formation, and transmission), and 2) how the Bible has been interpreted by various Christian communities throughout the centuries. As an historical investigation students will have the opportunity to explore ancient, medieval, and modern texts. An important overarching goal of the course is to help students learn to read the Bible theologically.
