Want to Get Dirty?

HUSCO International is hosting a Digger Day for students interested in learning more about being a leader in the development and manufacture of hydraulic and electrohydraulic controls for off-highway and automotive applications. Get a chance to operate some heavy construction equipment, see some awesome automation equipment, and learn how our products work first-hand.

When: 1:00pm-4:30pm, Friday, September 18
Where: HUSCO International, 2399 Pewaukee Road, Waukesha, WI

We will pick you up outside of Engineering Hall at 1pm (16th and Wisconsin) and take you to HUSCO.

HUSCO provides engineering students the foundation to build an engineering career within a fast-paced, industry leading and entrepreneurial organization. Students on co-op closely with experienced engineers, customers and suppliers from concept to production for 1-2 product programs. A successful HUSCO engineer is hands-on, has strong technical background, and a focus on building relationships. These skills, combined with flexibility, a problem-solving orientation, solid communication skills and attention to detail, enable employee and company success!

Learn more about what we’re hiring for and why you want to work at HUSCO!

This event is limited to 15-18 students. If you are interested in attending or have questions, please email Jessica Cain at Jessica.Cain@huscointl.com to reserve your spot! RSVP deadline is Tuesday, September 15 or until the spots are full.

*Attire: jeans and closed-toed shoes
