YOUR PASSPORT TO LIFE AT MARQUETTE
It’s your Marquette ID. It’s an access pass to the libraries, rec centers and computer labs. It’s a way to pay the Domino’s Pizza guy (really!). It’s your Marquette Card, and it’s an essential tool for campus survival.

REC CENTERS
All students receive free membership to Marquette’s top-notch recreation centers, located at each end of campus. Your Marquette Card gets you in.

RESIDENCE HALLS AND MEAL PLANS
Show your Marquette Card at the front desk of your residence hall for access to your building. (It’s an important safety feature.) Your meal plan also resides on your Marquette Card.

LIBRARIES
Besides allowing you to check into the libraries, your Marquette Card lets you check books out when you leave. The bar code on your card also allows you to log into the libraries’ special research databases on and off campus.

PRINTWISE
Your Marquette Card comes fully loaded with $21 worth of laser printing on the university’s computer lab printers — that’s 300 black and whites. If your account runs dry, your print charges will be automatically deducted from your MarquetteCASH account. The non-transferable $21 allocation is renewed automatically at the beginning of every academic year.

NEXT STEP
Students who attend PREVIEW can have their picture taken during their visit, and their Marquette Card will be available for pick up at New Student Orientation.

All remaining students can have their picture taken at New Student Orientation or at the fall carding event during the first week of classes.

MARQUETTECASH
Don’t have exact change (or any change, for that matter)? No problem. Your Marquette Card includes a prepaid, stored-value account, kind of like a debit card. When you deposit money into MarquetteCASH on your Marquette Card, you have access to these locations.

You can make a deposit into your MarquetteCASH account in a number of ways, including online or by phone at (414) 288-1518. You also can deposit in person at Marquette Central, residence hall stores, Union Station or value transfer stations throughout campus.
