  Seminar in Accounting
- **ACCO 6525**
  Governmental Accounting
- **ACCO 6570**
  Auditing: Ethical, Legal, Professional and Reporting Responsibilities
- **ACCO 6590**
  Accounting Theory

---

Accounting Analytics is STEM designated and international graduates may be eligible to apply for 36 months of optional practical training.
The Master of Science in Accounting Analytics Program (MSAA) is designed to provide students with the broad range of skills that successful accounting professionals need in today’s complex and changing business environment. Courses emphasize technical knowledge in the functional areas of accounting, stress communication skills and promote awareness of the accountant’s ethical and social responsibilities. Accounting Analytics provides grounding in accounting, auditing and financial reporting coupled with the analytics skills vital for today’s data-rich environment.

Admission Requirements

Admission decisions are based on a variety of criteria, each of which is intended to measure the applicant’s ability to succeed in the program and the applicant’s career. Admission to the MSAA degree requires a four-year bachelor’s degree from an accredited college or university with a major in accounting or equivalent undergraduate course work. Students admitted without sufficient undergraduate accounting coverage may be required to successfully complete relevant undergraduate courses. No application can be evaluated until all of the required official documents have been received.

In addition, the applicant must submit the following items to the Marquette Graduate School of Management, Straz Hall Executive Center:

- A completed online application and application fee
- Official transcripts from previously and currently attended colleges and universities (other than Marquette) – The minimum GPA is 3.000.
- Official test scores of the Graduage Management Admission Test (GMAT)
  There is a waiver of the GMAT exam for MS Accounting Analytics applicants that have earned an overall quality point average of 3.25 or higher with proof of quantitative course coverage from an AACSB accredited school.
- Essay questions on the application form
- Resume or job profile
- Two letters of recommendation if applying for financial aid
- International applicants whose native language is not English, and who have not received a degree from an accredited academic institution in the United States, also must submit official TOEFL (Test of English as a Foreign Language) or IELTS scores.

The graduate accounting analytics and accounting programs meet the American Institute of Certified Public Accountants (AICPA) requirement for individual membership in that organization, and eligibility to take the CPA examination. These programs are accredited by the Association for the Advancement of Collegiate Schools of Business (AACSB-International) and reflects the high standards and expectations of that accreditation.

Bachelor’s-Master’s Program (Advanced Degree Program [ADP])

Marquette University student may earn both their undergraduate and MSAA degrees in five years. See Graduate School of Management bulletin for details.
