Earn the prestige of the Marquette name.

The Master of Supply Chain Management program has a specific emphasis on preparing students to lead their firms’ transition from the physical to the digital supply chain world, a focus that is in high demand. This transformation to a digital supply chain, coupled with the growing skills gap arising from the retirement of many senior and middle-level supply chain professionals, prompted the need for a program that addresses emerging industry issues, primarily centered on digital transformation.

MARQUETTE PREPARES YOU TO:

- Function as a leader and key decision-maker in your organization.
- Leverage digital supply chains to achieve organizational success.
- Align supply chains with organizational strategy.

The changes brought on by this digital revolution are going to fundamentally alter the rules of the game for supply chain and operations professionals — and companies at large. OEM, supplier and customer expectations are increasing. This master’s program is intended to position graduates for maximum impact and value, as they help lead their companies through the needed transition.

MARK J. COTTELEER, Bus Ad ’88
Founding Adviser, Center for Supply Chain Management at Marquette University, Managing Director, Deloitte Consulting, LP

Applicants without supply chain management background will be required to complete the Supply Chain Management Foundations course.
APPLICATION REQUIREMENTS

Applicants must have completed a four-year undergraduate degree from an accredited college or university. In addition, applicants must submit:

- Online application form and fee
- Official transcripts from each college or university attended (other than Marquette)
- GMAT or GRE score
- Resume
- Two letters of recommendation
- TOEFL scores (only for international applicants whose native language is not English)
