Project the document camera .....	9
Project the Blu-ray player .....	9
Settings Menu .....	9

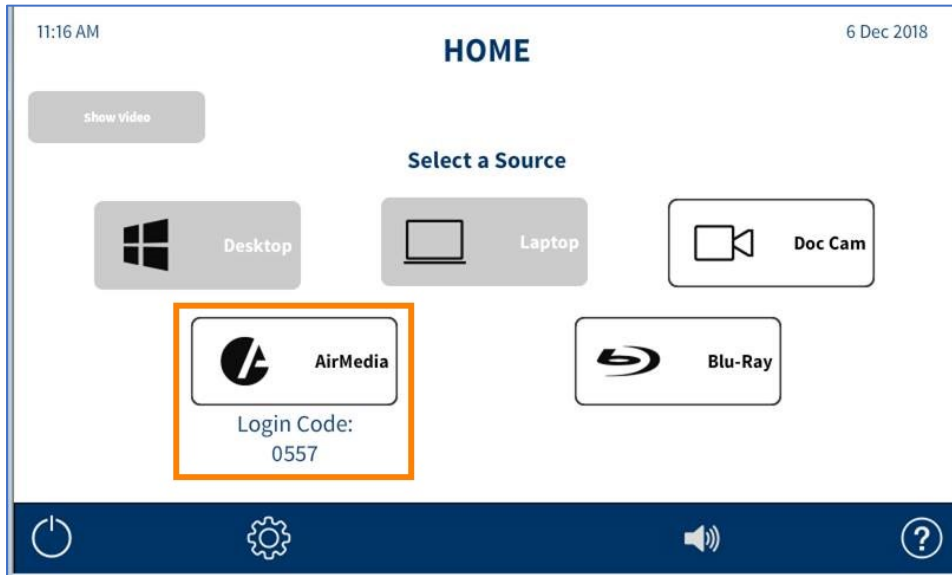

Touch the Crestron screen on the podium to activate it and select what you want to project on the wall-mounted screen.

- Choose **Desktop** and log into the computer on the podium – it is already connected.
- If you select **Laptop**, you need to connect a display cable on the podium to your laptop.
- If you want to project wirelessly from a laptop, tablet or phone, select **AirMedia** and follow directions below.

## Wireless Projection

1. Select **AirMedia** to wirelessly present your desktop or tablet screen.

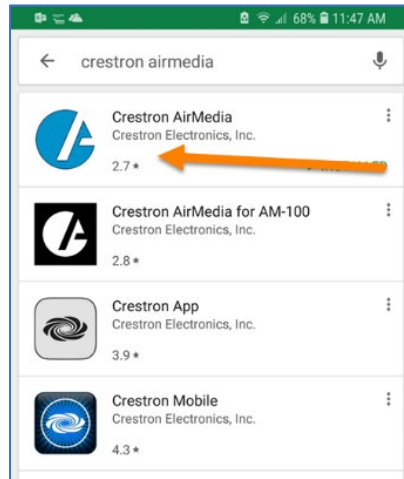

2. The screen on the wall will light up, showing the Crestron logo and the URL to use for presenting at the bottom of the screen.

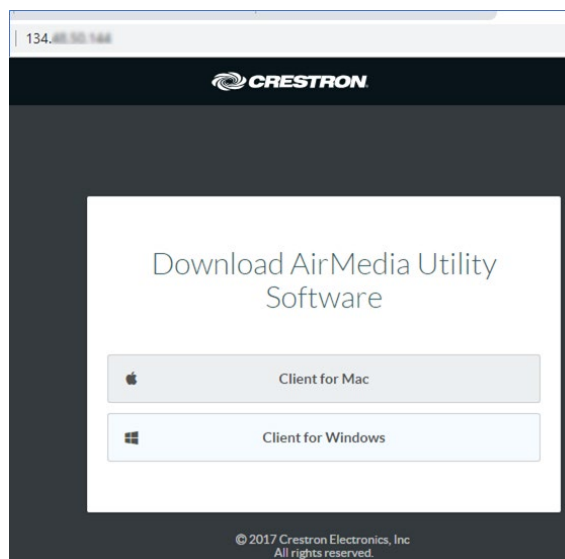

## Install the App the first time you use AirMedia on a laptop or device

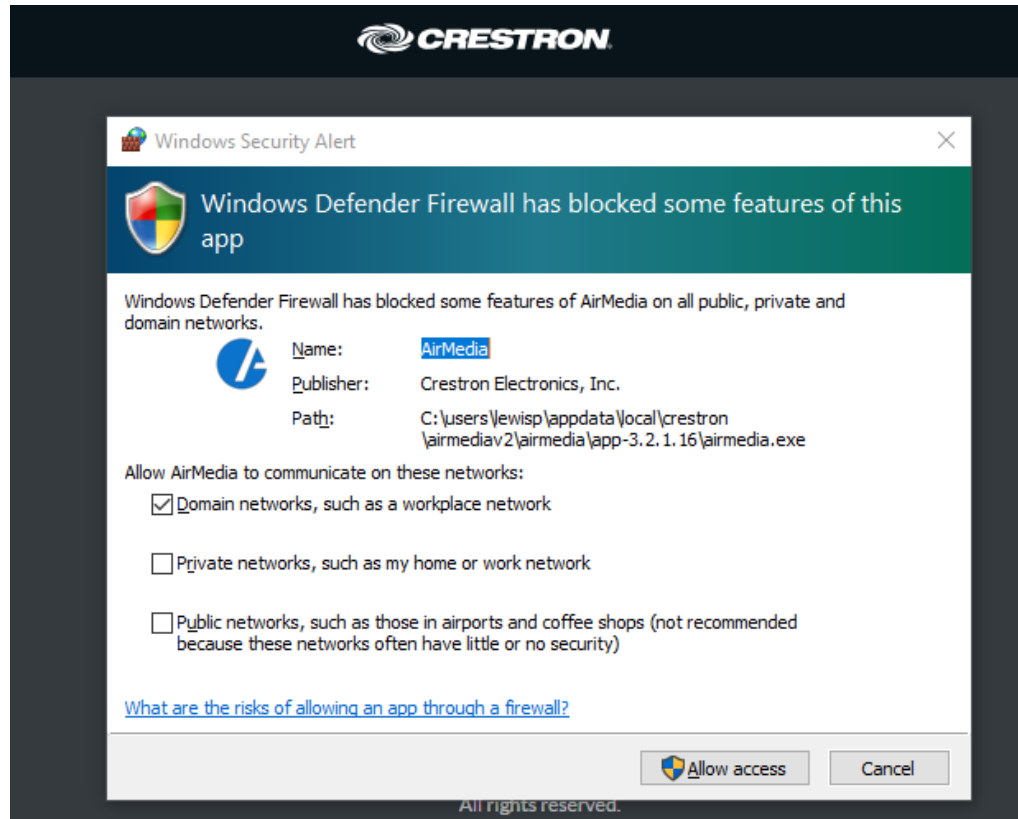

- If this is the first time you are using the **tablet** to present with AirMedia you need to download and install the AirMedia app (not Crestron AirMedia for AM-100)
  - Go to Apple's App Store or Google Play and download, install and open "Crestron AirMedia" App

- If this is the first time you are using a **laptop** to present with AirMedia, open a browser and enter the URL that shows at the bottom of the wall-mounted screen. Be sure to enter **http://** in front of the URL that is listed. You may receive a message saying that this site is not safe – you can ignore this message.
  - You will be prompted to download the AirMedia App. Select **Client for Mac** or **Client for Windows** and the app will download. Install it and open it.

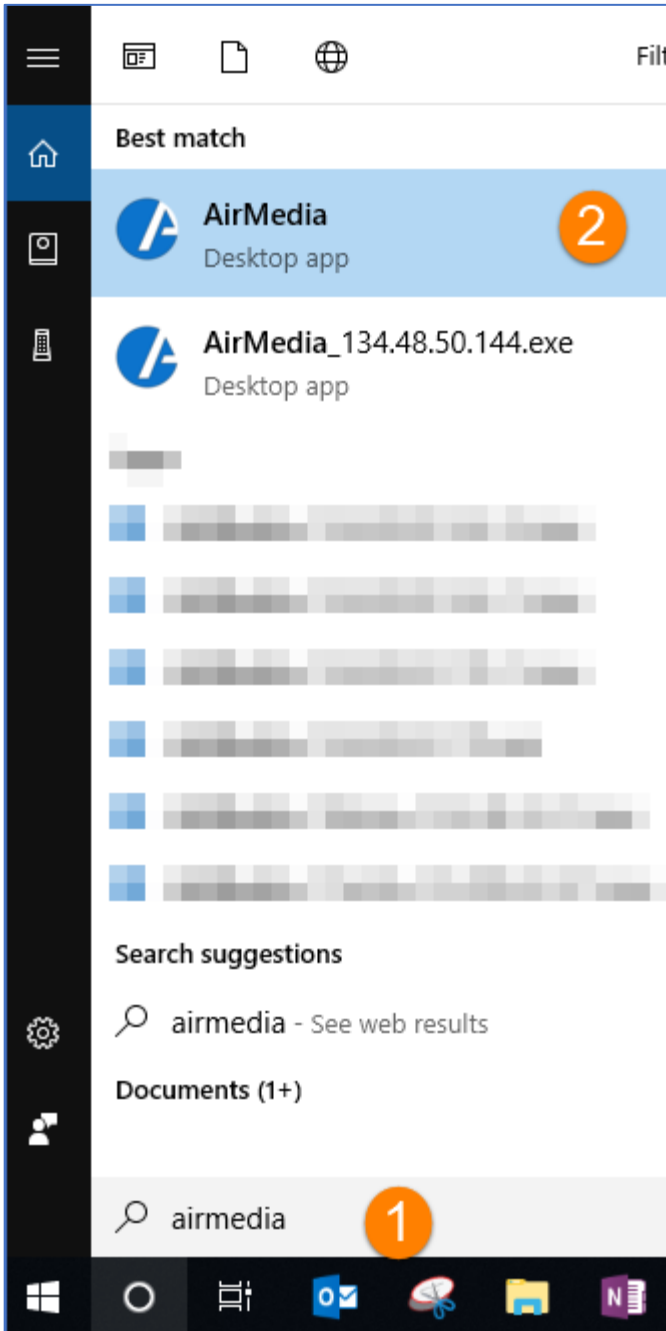

- Windows users may be prompted to allow Windows Firewall to unlock some features of the app. Click **Allow Access**.

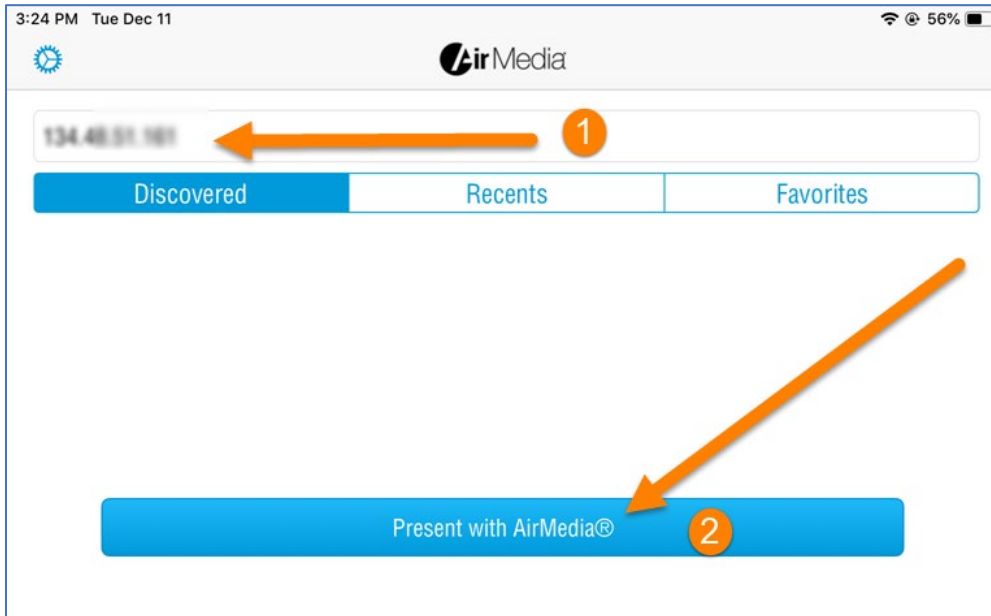

Once you have installed the AirMedia app, launch it and enter the four-digit room code

- Search your device for AirMedia (1) and open the App (2).

(Image below shows this step for Windows.)

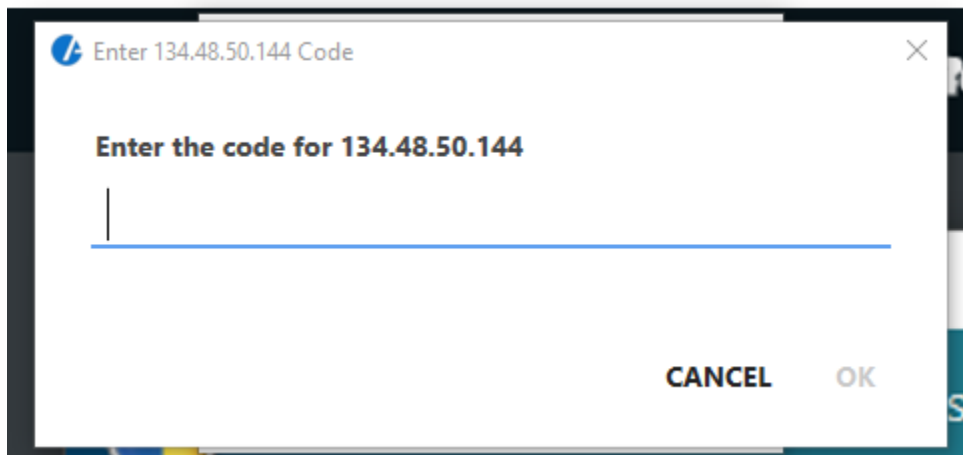

- Enter the numbers from the URL here (1), for example 134.48.50.144 and then select **Present with AirMedia** (2).

- You will be prompted to enter a four-digit room code that is at the bottom of the classroom screen and on the Crestron screen on the podium.

Note: The four-digit room code will change with each use of AirMedia.

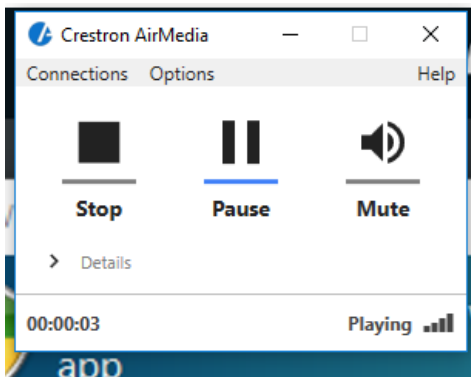

- **iPad users will need to connect using Airplay** – see [iPad instructions for connecting using Air Play](#) on page 8 and then continue with instructions here)

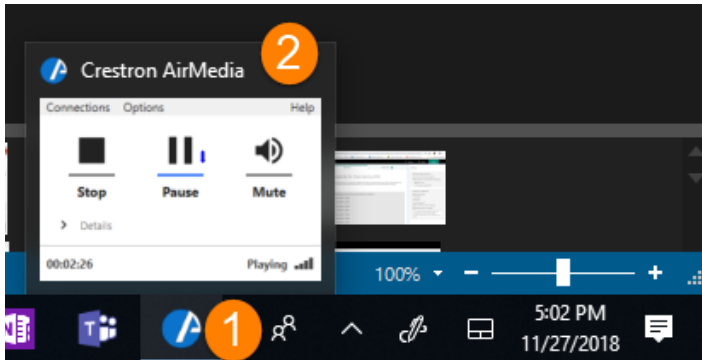

- Click or tap **OK**.

Play, pause and stop presenting (or you will continue to project your screen in the room)

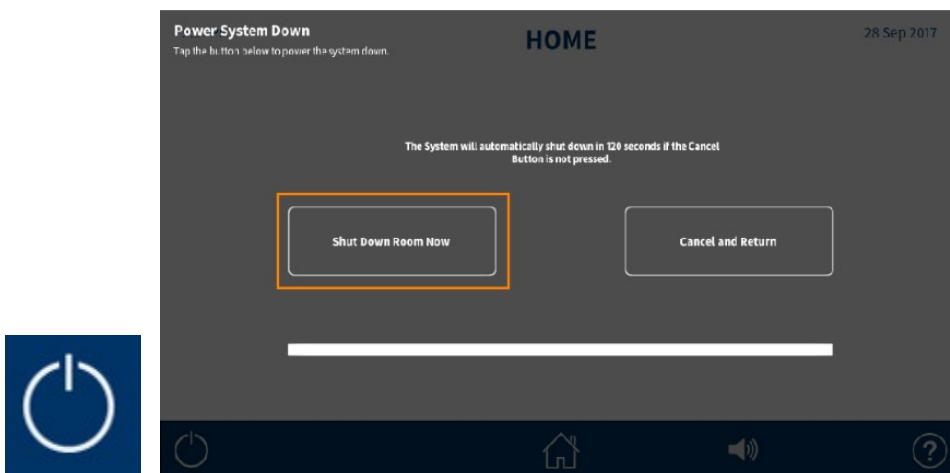

- Next, the device screen projects on the large screen in the classroom and the App shows “Playing” bottom right.

- To stop presenting, select **Stop** in the AirMedia app.  
(Windows users, hover over the AirMedia icon on your taskbar (1) to show the controls (2).)

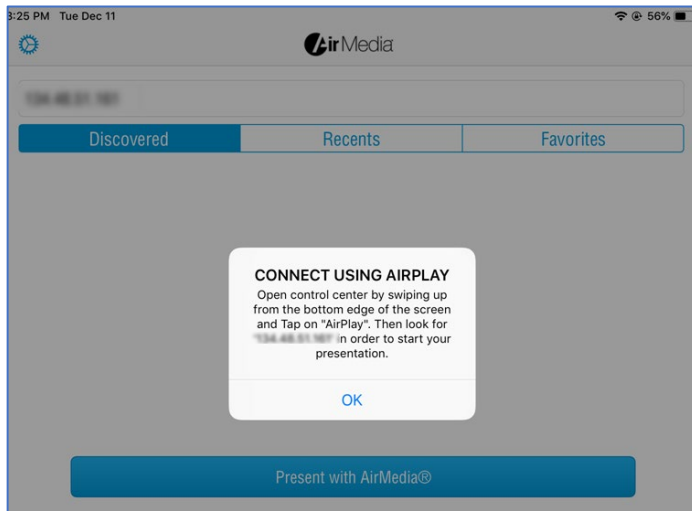

- Until you select **Stop**, the AirMedia app will still be running and connected, and even when you leave the room, you will continue to present your desktop.
- Tap the **Power** icon on the Crestron panel and then select **Shut Down Room Now**.

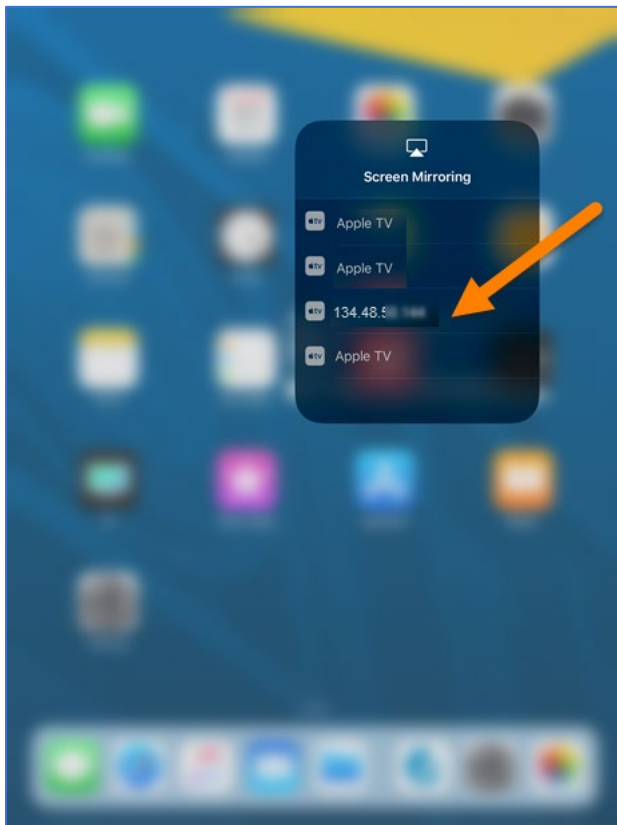

## iPad instructions for connecting using AirPlay

- After you open the AirMedia app and enter the numbers on the URL (1), tap **OK** to connect using AirPlay (2).

- Open Screen Mirroring on your iPad by swiping down from the top right corner. The room URL will show – select that and your tablet screen will present on the wall with AirMedia.

- Enter the four-digit room code from the Crestron or the big screen and press **OK**.
- Continue with instructions on page 6 for playing, pausing and stopping the presentation.

## Project the document camera

- On the **Home** screen, select **Doc Cam**. The Doc Cam Controls will be displayed.

## Project the Blu-ray player

- On the **Home** screen, select **Blu-ray**.
- The DVD Controls will be displayed.

## Settings Menu

- From the home menu, you can access the settings menu.
- Here you will find projector power controls and screen controls.
- There is also a mic specific volume control for rooms with a wireless mic.
