Clinical Laboratory Science

YOUNG SCHOLAR PROGRAM

The Young Scholar Program provides an enriched experience in college-level science, medical diagnostics and laboratory testing, all while participants earn a college credit at Marquette University.

Young Scholar Program

- College lecture and laboratory experience
- Experience in clinical chemistry, hematology and diagnostic microbiology
- Case-study and problem-based learning

Requirements for eligibility:

- High school junior or senior
- In the top 25 percent of your high school class
- Have taken or concurrently taking biology and chemistry

Successful completion of the program:

- A Marquette University credit will give you a head start to your college career.
- Clinical laboratory knowledge can help with your college major decision.

To participate in the Young Scholar Program return the application, registration forms and essay. For questions and concerns, contact ysp@marquette.edu or call 414.288.7566.

laboratory tests on patient specimens to help with diagnosis, treatment and monitoring of disease. At least 70 percent of all medical decisions rely on laboratory testing. A major in clinical laboratory science leads to various types of careers — within hospital laboratories, clinics, biotech companies and government agencies.

Marquette's clinical laboratory science major:

- Freshman direct-admit program.
- All faculty are doctorally trained and labs are NOT taught by teaching assistants.
- Undergraduate research opportunities.
- Students are guaranteed clinical internships required for board certification.
- 100 percent employment rate following graduation.
