

COVID-19 Screening Guide

A positive symptom screening which would send someone home:

If someone has one or more of the following symptoms:

- Fever (temperature of 100 degrees or higher)
- Chills
- Cough
- Shortness of breath

Or 2 or more of the following symptoms:

- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Additionally, if yes to either of these questions the employee will be sent home:

- 1) Have you been exposed to or in contact with anyone who has tested positive or is a presumptive positive for COVID-19 in the last 14 days?
- 2) Have you been exposed to or in contact with anyone showing symptoms of COVID-19 in the last 14 days?

Temperature Check

In addition to the questions, observation of overt symptoms and temperature screening utilizing an infrared no touch thermometer will be conducted by a department designee to check for anyone with a fever of 100 or higher.

- **If an employee has a temperature of 100 degrees or higher, they will be sent home.**
