

## Marquette University's

# CENTRAL SERVICE CENTER

Open for Business June 2022

The newly opened Central Service Center (CSC) will provide a number of services from across the campus. The Marquette community and beyond is welcome to engage in these services. Below you will find the current services that are available. More service will be added throughout the year.

### ***M-Teams***

Leveraging the talent of our students the M-Teams service is a program that brings together multi-disciplinary students from across campus to work on projects from corporate and community partners under the direction of faculty coaches. By convening students from across different disciplines on campus, M-Teams truly provides a unique opportunity to address complex issues and immerse our students in a project-based learning environment reflective of the multidisciplinary landscape of business and industry.

#### M-Teams specifics:

Student teams are multidisciplinary with no less than four students on a M-Team

Corporate or organizational sponsor take an active role in the M-Team experience, and are an important part of the overall team. Sponsors are expected to meet (in person or virtually) with the students on a weekly basis to provide feedback and direction to the project.

Each M-team also has a faculty "coach". These faculty members help act as a resource to the students but do not contribute any of their own intellectual property to the project.

M-Teams logistics and contracting are coordinated in partnership between the CSC and Innovation Alley.

#### Cost of M-Teams project are as follows

\$30,000 - \$40,000 which includes:

Up to five undergraduate students, one graduate student, a faculty mentor and supplies.

Also includes the overhead charge of 53%.
