

Marquette Electrical and Computer Engineering's Dr. Chandana Tamma has been named an Engineering Unleashed Fellow for 2020 by the Kern Family Foundation KEEN Program!

As noted by the Kern Foundation, "Dr. Tamma is truly an ambassador of excellence for Marquette University and is distinguished both through a Fellows Project and through interactions with the greater Engineering Unleashed community." Dr. Tamma is one of 29 faculty members from higher education institutions across the country that have been named fellows. Engineering Unleashed's website explains, "These faculty members participated in the Engineering Unleashed Faculty Development Program, creating resources that will help them and intercollegiate colleagues advance the community's mission to integrate entrepreneurial mindset into practices that benefit their students, their institutions, and greater society."
