5. You will see this screen. You can then search using the Search bar. You will be able to filter once you start a search.

6. On the results page, you can filter by distance, languages, license type, treatment options, specialty, and more. If a provider is in this system, they are in-network. If a provider is not in this system, they are out-of-network.

Mental health benefits are not tiered, so a provider is either in-network or out-of-network. If the provider shows up in this search, they are in-network. If they do not, they are out-of-network.
