PROGRAM COMPONENTS

AGBL in Mexico is a chance for students of all majors to get hands-on experience with social entrepreneurship projects. These are for-profit endeavors with a great emphasis on creating social change and fostering local development. In Mexico, we will be partnering with a Jesuit University called ITESO in Guadalajara. By working with our ITESO counterparts, students will experience another culture, people, and a different system of business values. ITESO and Marquette students will focus on providing sustainable business solutions while preserving cultural ideals.
