

New Printer Installation

Installing a New Canon Printer Driver for macOS

****The following must be completed while connected to the campus network (either onm site *OR* connected via VPN)**

1. Install Canon drivers

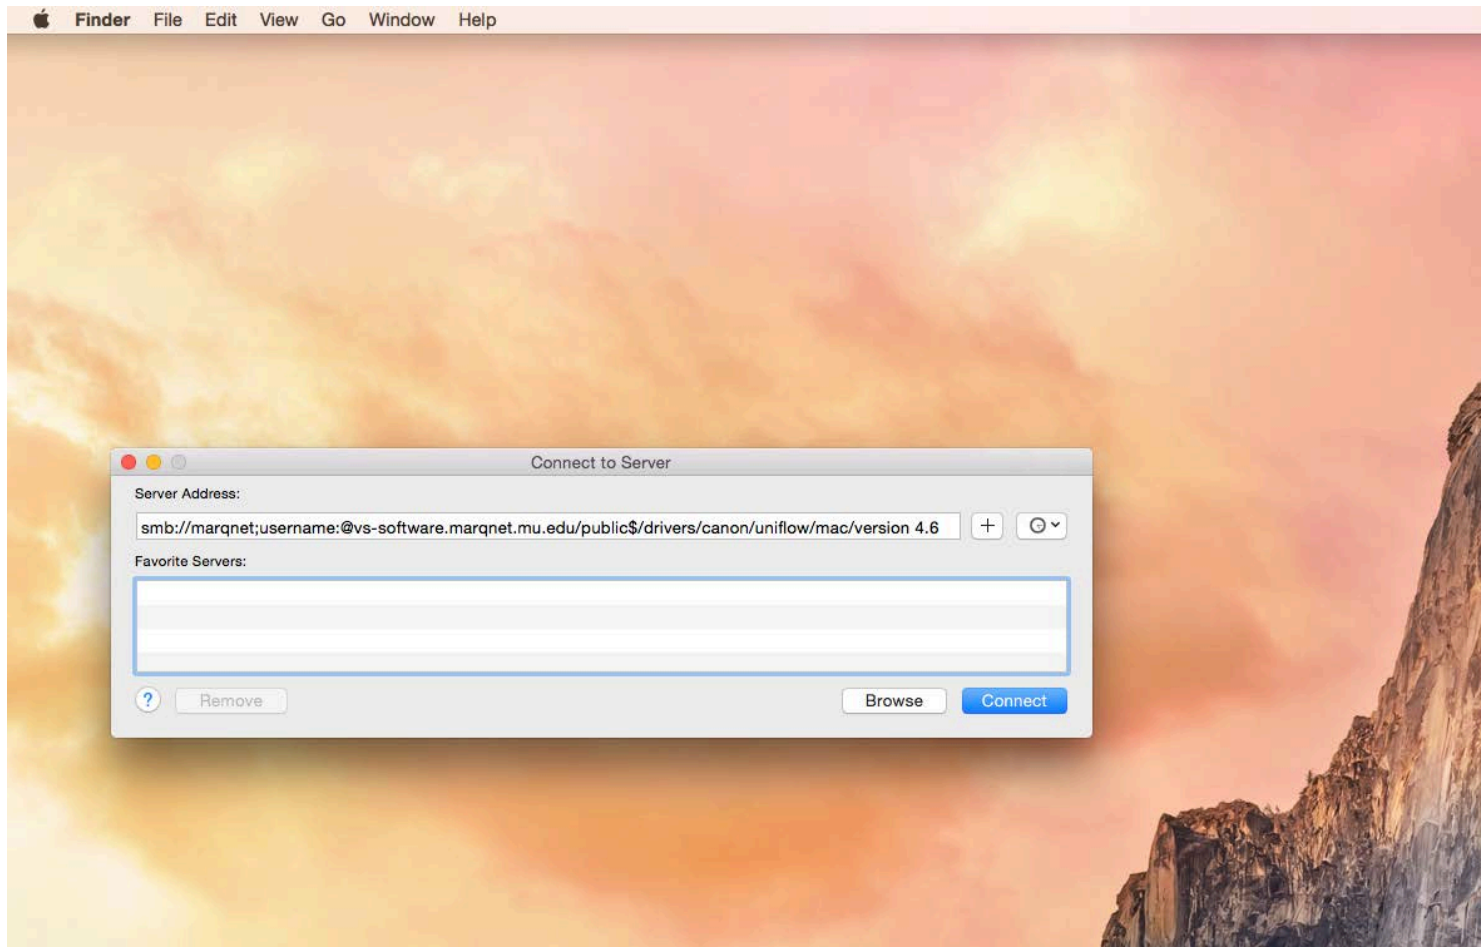

Click a blank space on your Desktop. Navigate to the 'Go' menu on the top of your screen and choose 'Connect to Server'.

New Printer Installation

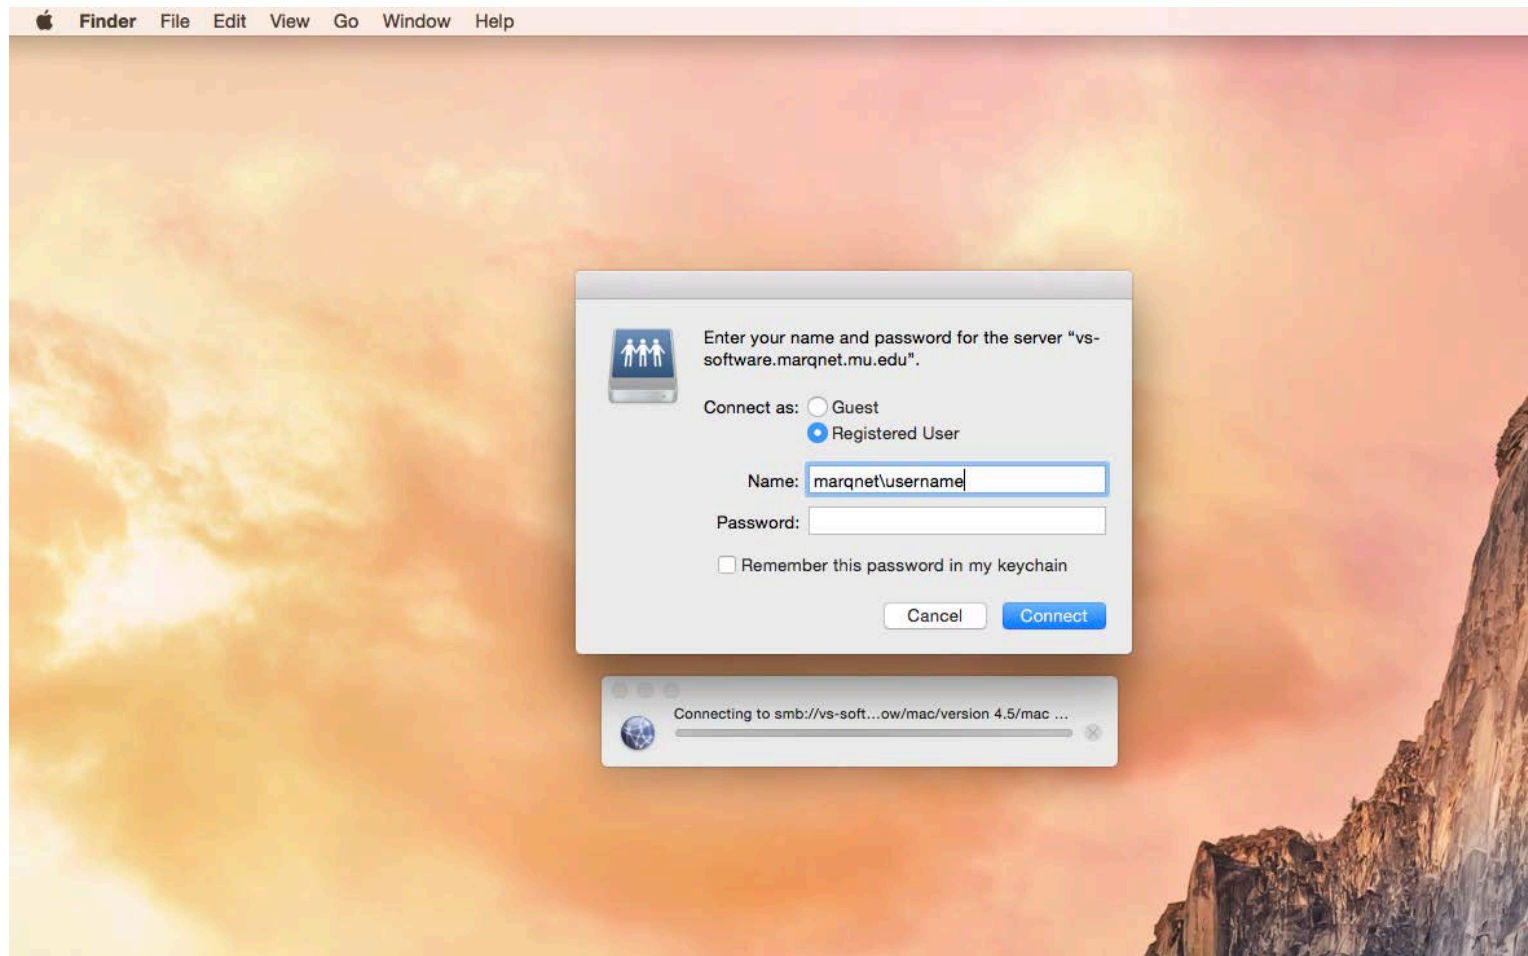

A new window will pop up asking for a server address. Enter the following verbatim and click 'Connect':

smb://marqnet;username:@vs-software.marqnet.mu.edu/public\$/drivers/canon/uniflow/mac/version 4.6

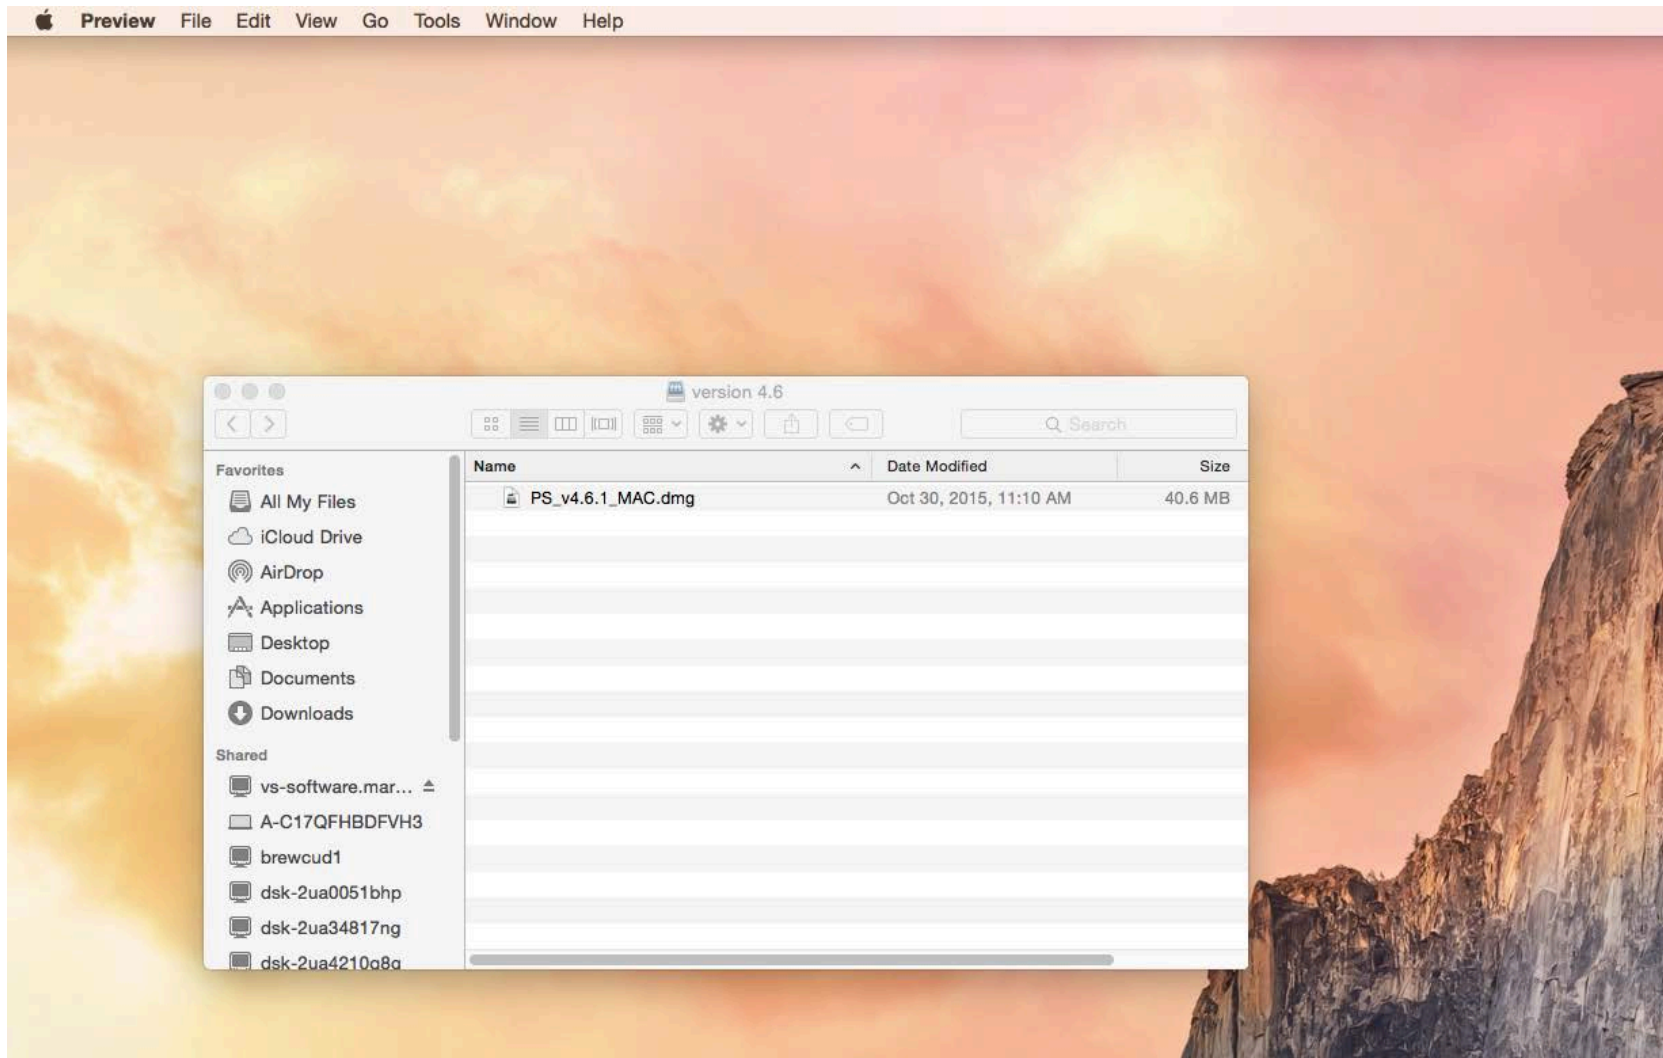

New Printer Installation

A window will pop up asking for your credentials. Delete the word 'username' and enter your Marquette username. Leave the 'marqnet\' in place. Enter your Marquette password and click 'Connect'.

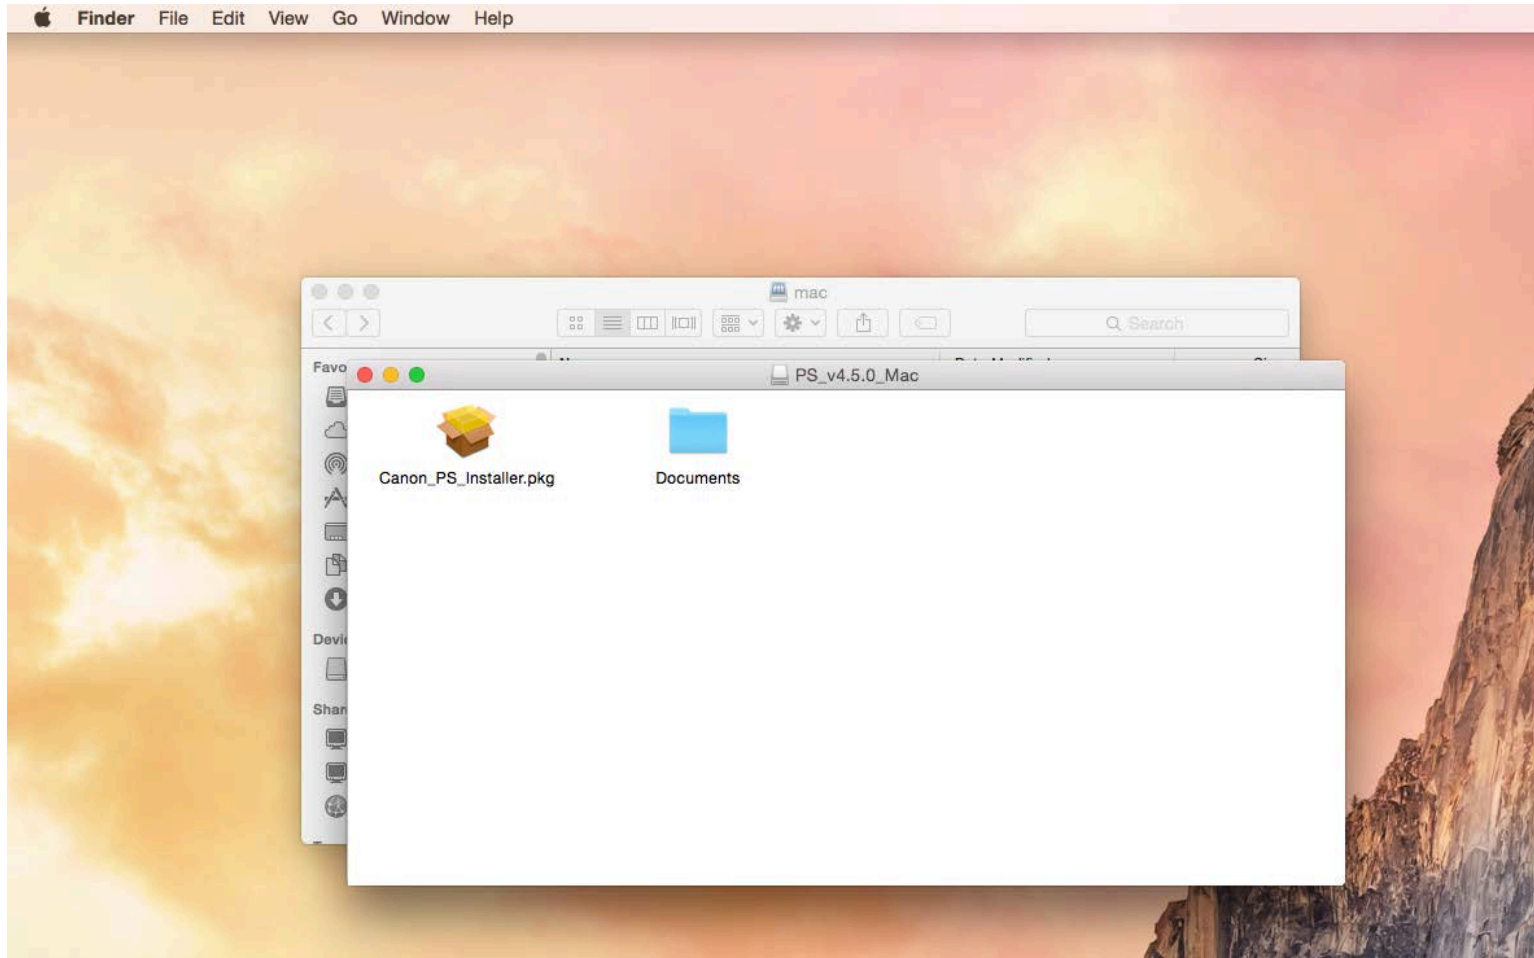

New Printer Installation

A finder window will appear. Double-click the 'PS_v4.6.1_MAC.dmg'.

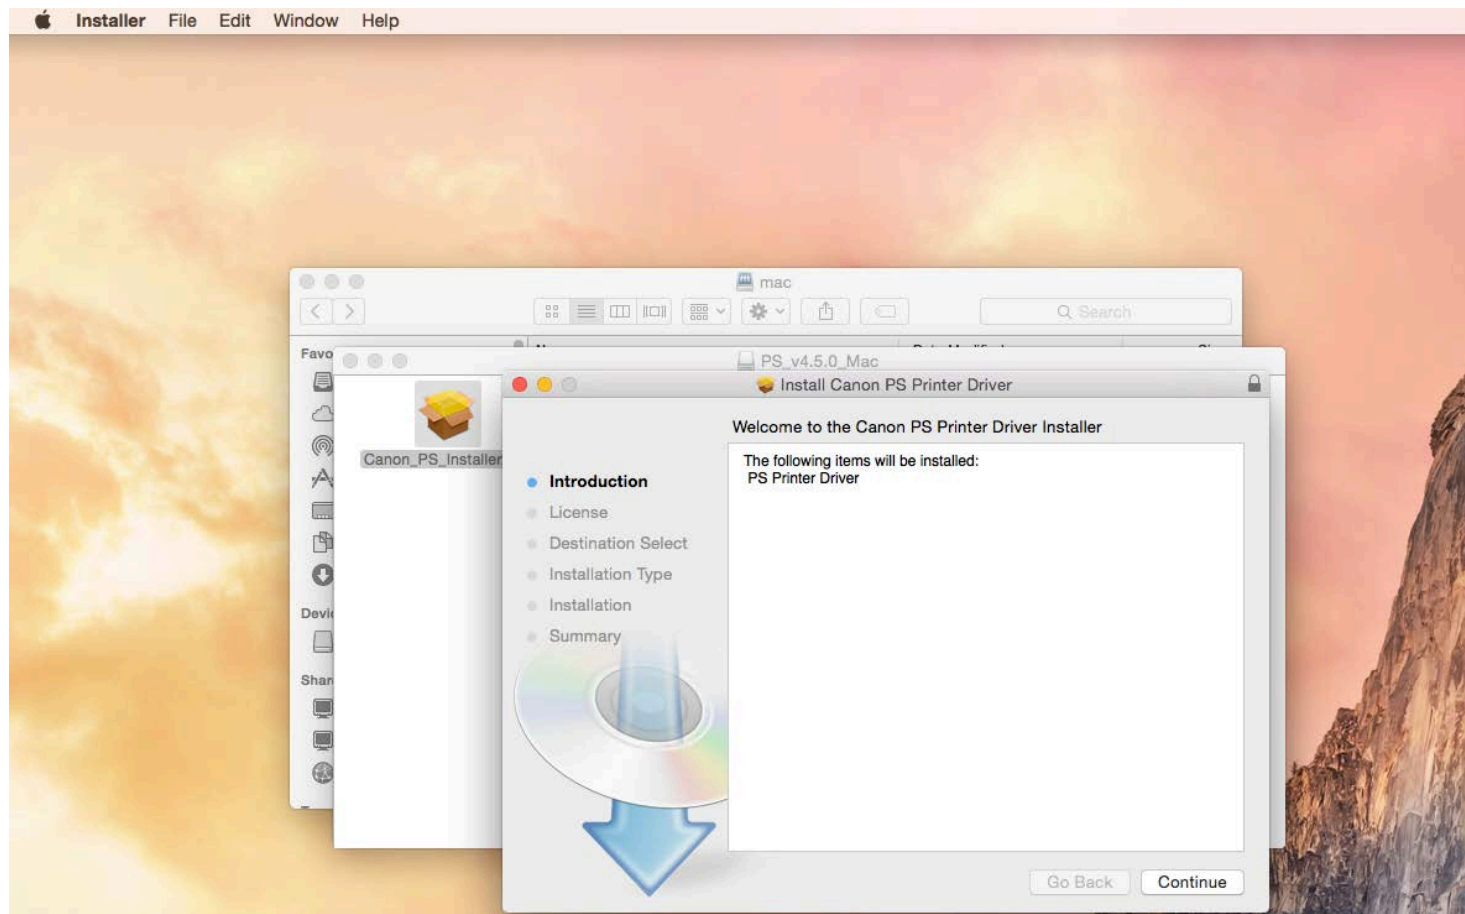

New Printer Installation

Another window will pop up with the actual installer. Double-click 'Canon_PS-Installer.pkg' to initiate the process.

New Printer Installation

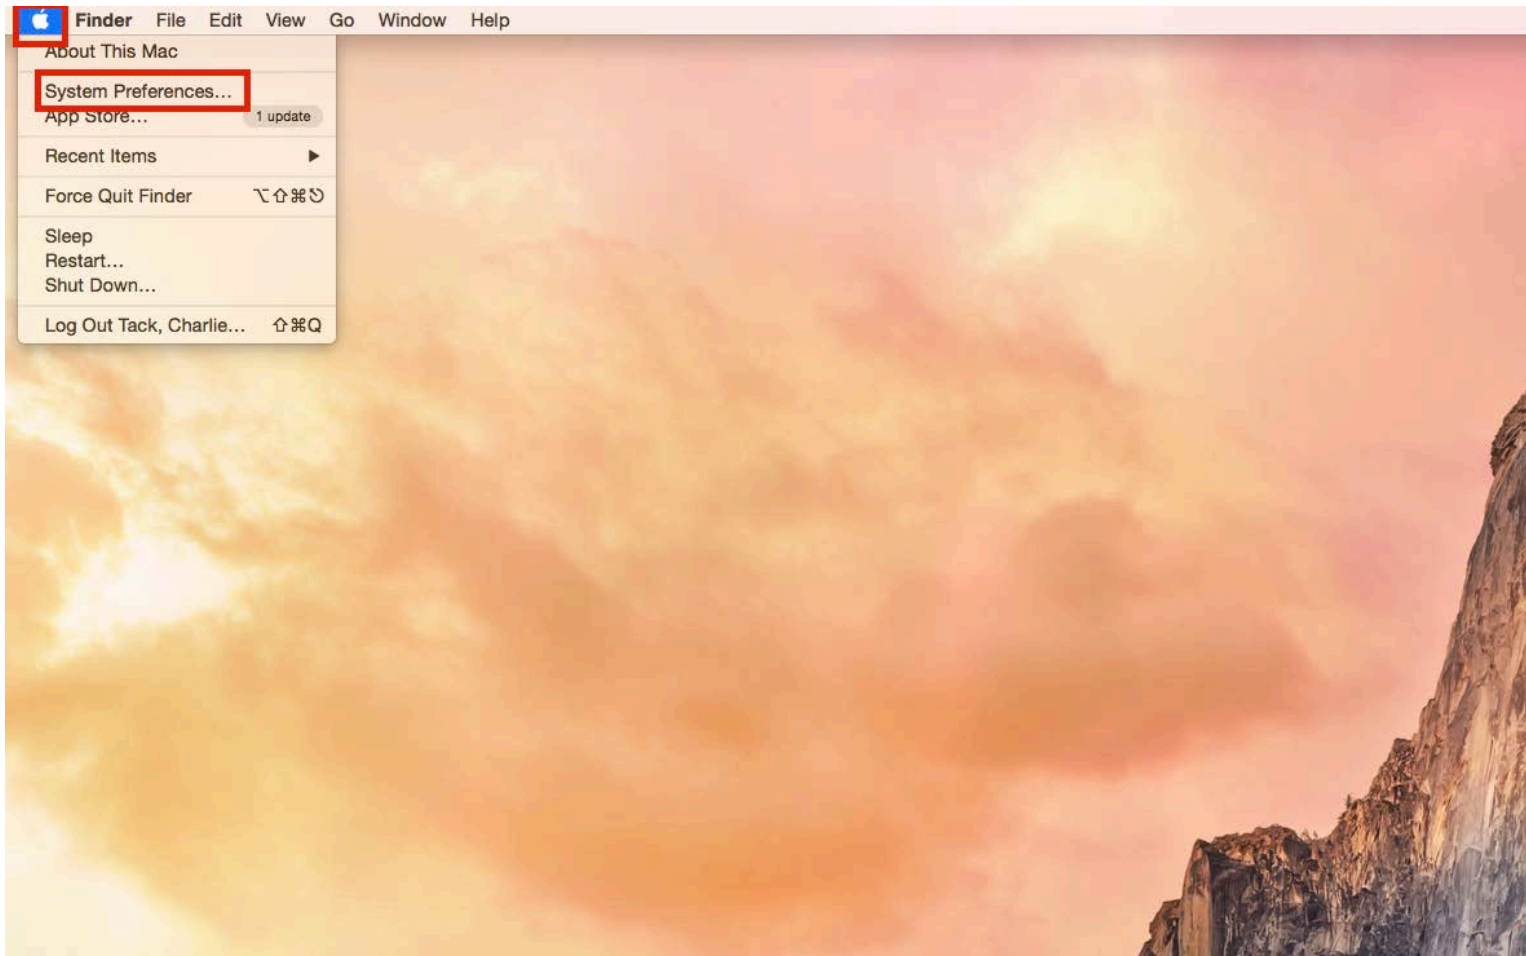

The installation wizard will appear. Continue the installation process to obtain the set of Canon drivers required for printing. You will have to authenticate with your Marquette username and password to finalize the install.

New Printer Installation

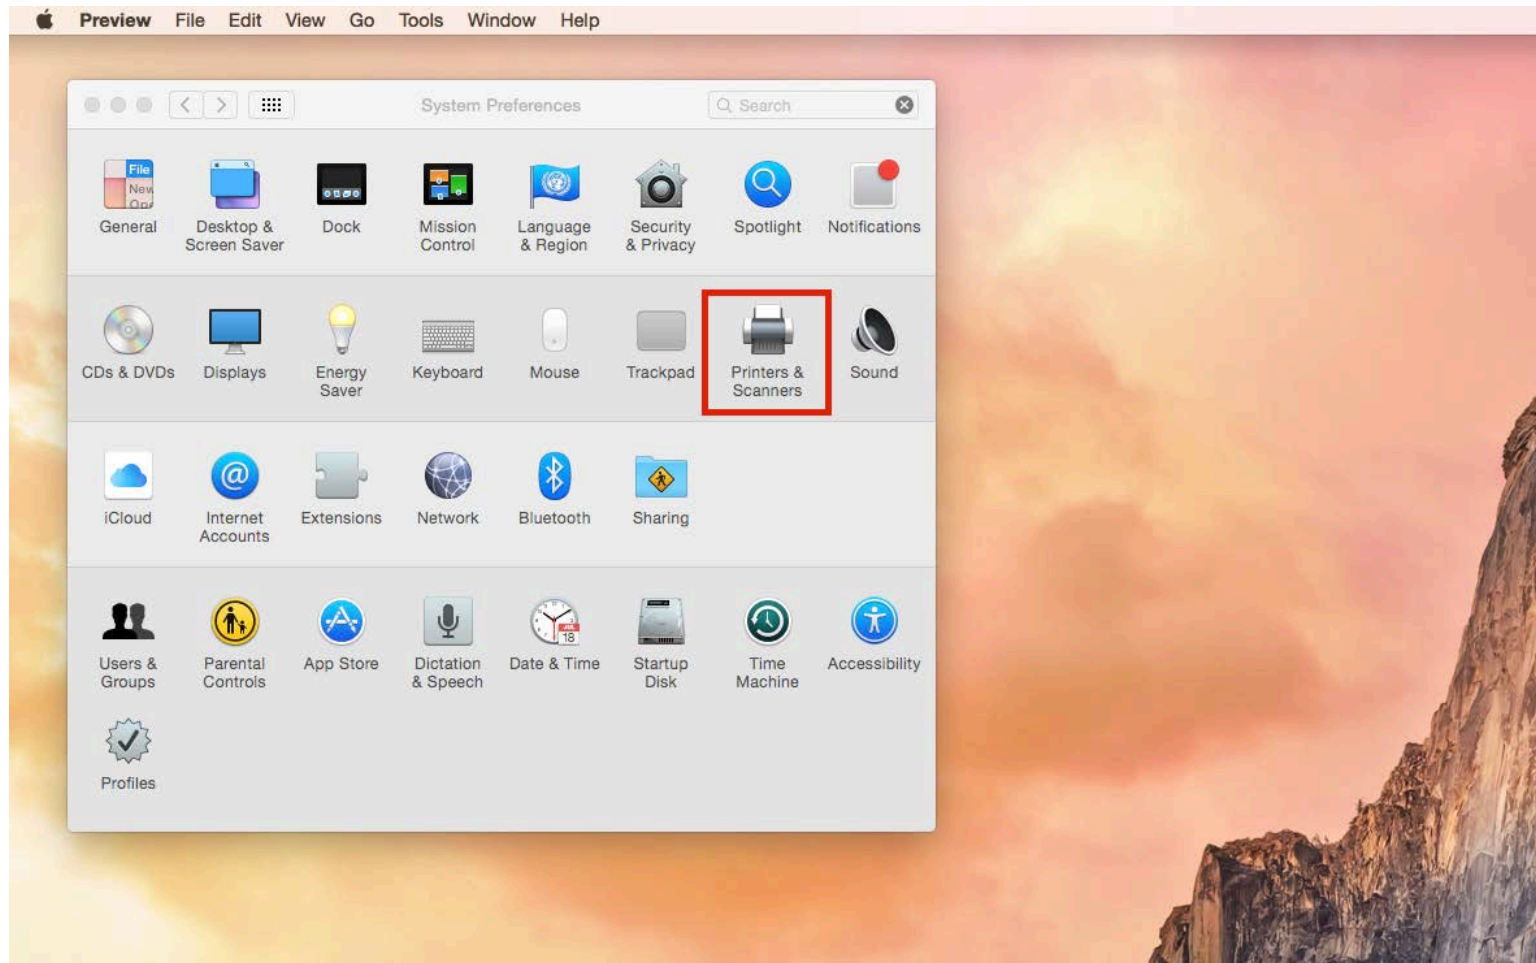

2. Remove old printers

Now that we have the drivers installed, we will remove any old secure print entries. Start by opening System Preferences from the Apple menu at the top of your screen and choosing 'System Preferences'.

New Printer Installation

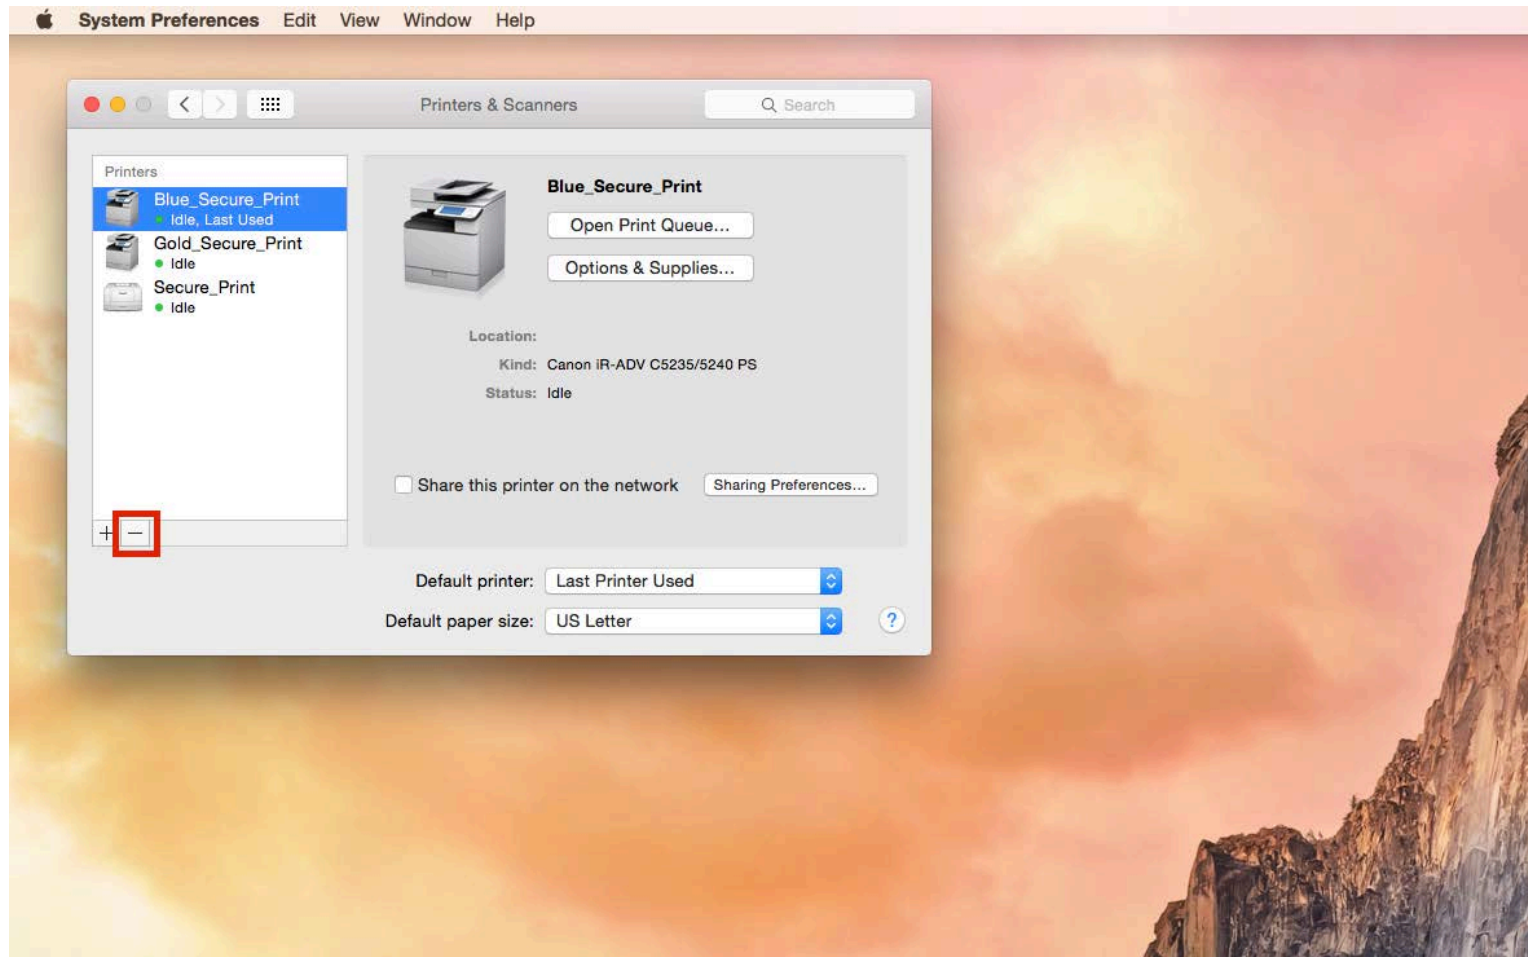

Click 'Printers and Scanners' on the screen.

New Printer Installation

Highlight each of the old printers (***Blue_Secure_Print***, ***Gold_Secure_Print***, ***Secure_Print***) one at a time, and click the (-) sign near the bottom left of that popup.

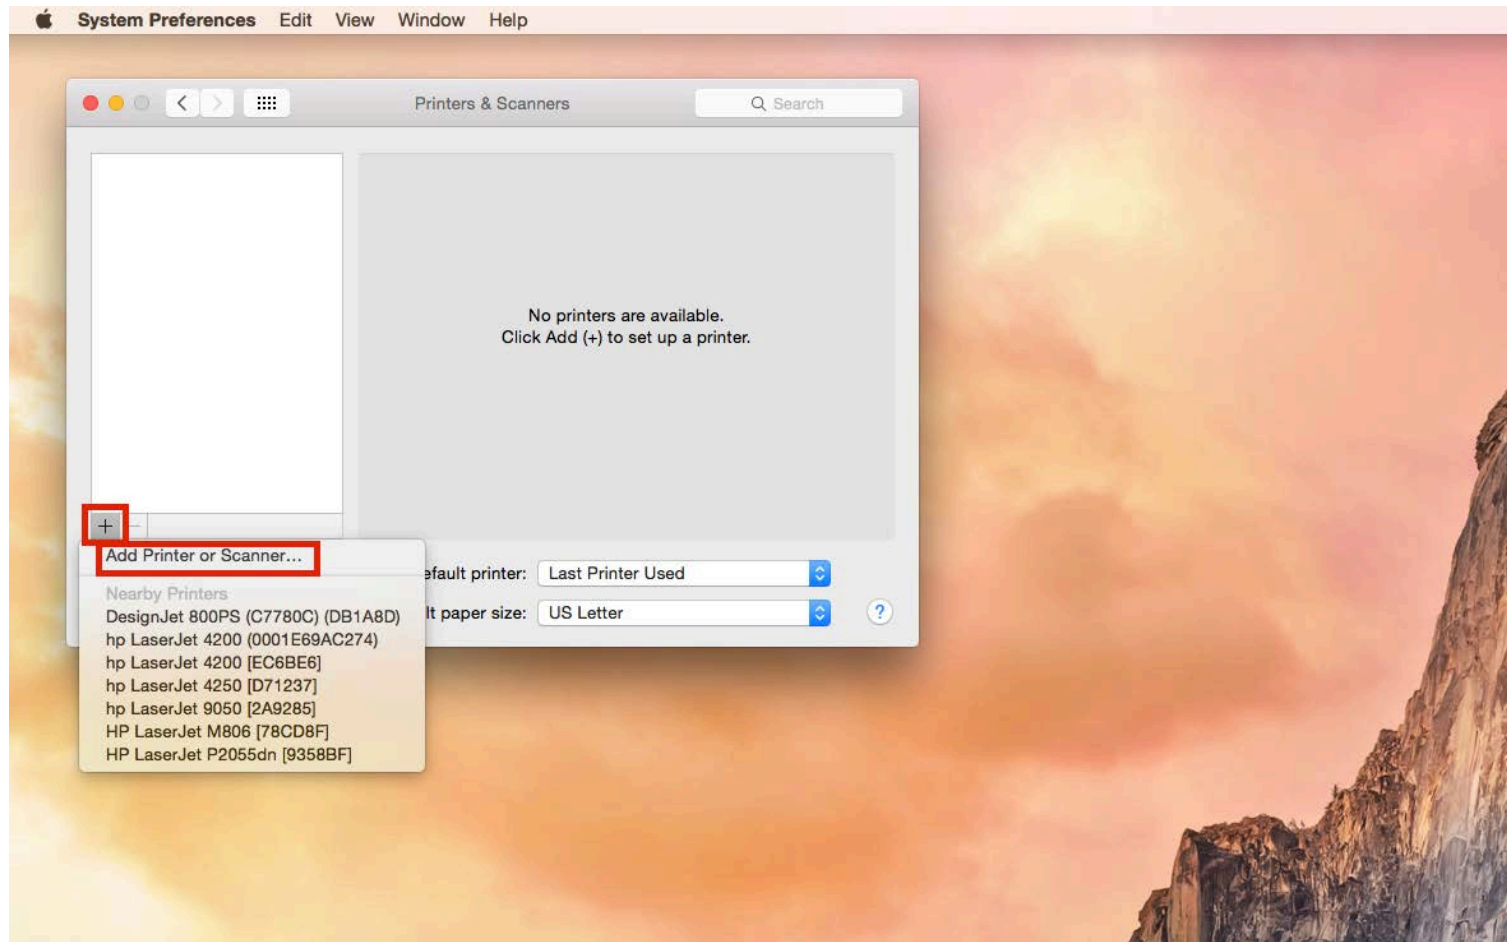

Don't delete any desktop printers you might have—only those labeled with *Secure_Print***

New Printer Installation

3. Install new printers

Now that the old printers are gone, we can install the new printers. Click the (+) sign at the bottom left and choose 'Add Printer or Scanner'.

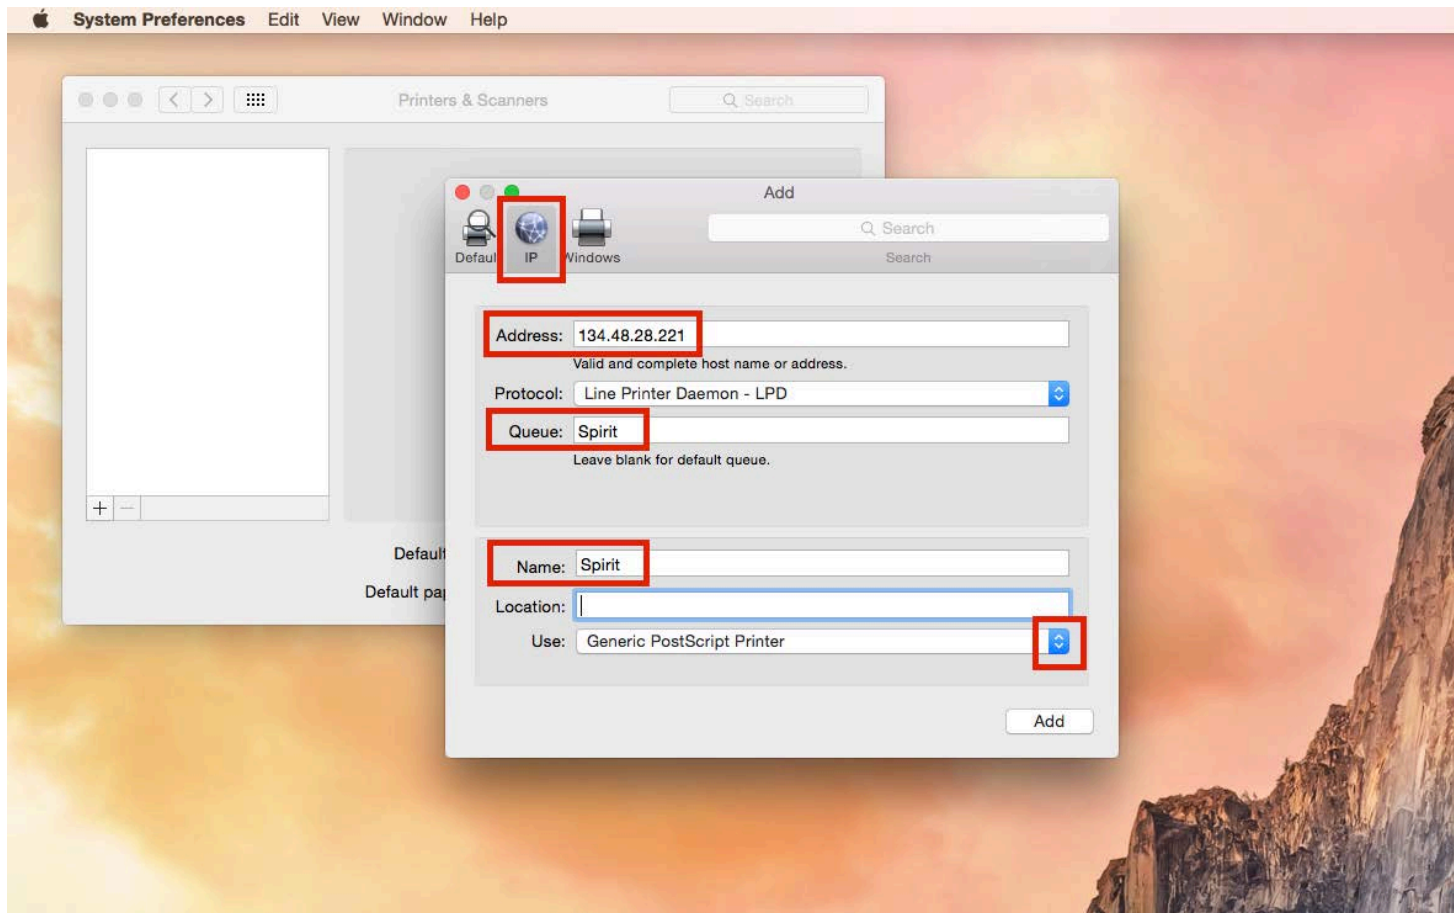

New Printer Installation

Click the 'IP' tab along the top of the new window. Enter the information exactly as seen below to add the Spirit printer.

Address: 134.48.28.221 **Queue:** Spirit **Name:** Spirit

Once you enter that information, click the up/down arrows to the right of Generic PostScript Printer and click 'Choose Software'.

New Printer Installation

Based on the model of your printer, choose the correct driver from the list in the new window. You can find your printer's model on the device itself, directly above the touch screen.

The models and corresponding drivers are as follows:

Black and White

400if	Canon iR-ADV 400/500 PS
1435if	Canon iR1435 PS
4225	Canon iR-ADV 4225/4235 PS
4235	Canon iR-ADV 4225/4235 PS
4245	Canon iR-ADV 4245 PS
6255	Canon iR-ADV 6255/6265 PS
6265	Canon iR-ADV 6255/6265 PS

Color

C5035	Canon iR-ADV C5030/5035 PS
C5045	Canon iR-ADV C5045/5051 PS
C5235A	Canon iR-ADV C5235/5240 PS
C5235	Canon iR-ADV C5235/5240 PS
C5250	Canon iR-ADV C5250/5255 PS
C5251	Canon iR-ADV C5250/5255 PS
C7260	Canon iR-ADV C7260/7270 PS

Once you highlight the correct driver, click 'OK'. Finish the printer installation by clicking 'Add'.

New Printer Installation

Repeat this process to add the second printer by again clicking the (+) icon.

Click the 'IP' tab along the top of the new window. Enter the information exactly as seen below to add the Eagle printer.

Address: 134.48.28.222 **Queue:** Eagle **Name:** Eagle

Once you enter that information, click the up/down arrows to the right of Generic PostScript Printer and click 'Choose Software'. The driver will be the same as the Spirit printer (driver list on previous page). After highlighting the appropriate driver, click 'OK'. Finish the installation by clicking 'Add'.
