FS 300 Helpful Hints

(1) Record by hitting the record button [16].

(2) You can see what you are filming through the digital screen [13].

(3) To see a replay of what you have filmed, click the playback button [17], or turn the camera mode dial [15] to playback. The playback icon looks like this: 

(4) Stop and start your playback using the proper buttons [19, 20].

(5) Search through the menu in playback mode using the joystick [22], and press down the joystick to select the option you want.
**FS 300 Quick Guide: How to Link to a Computer**

(1) You may remove the SD card from the camera and use an SDM card slot to read the data. This is available from the Media Studio only.

(2) To connect the camera to a computer, the power needs to be plugged in. This can be done using the power cable, and plugging it in to the A/V slot on the back, right-hand side of the unit.

(3) Take the USB cable and plug it in the slot on the inside of the camera.

(4) The computer should automatically detect the camera.
