# WANT TO BECOME AN EXPERT IN DATA?

## GET STARTED WITH OUR M.S. IN APPLIED STATISTICS

Statistics is the science of data utilizing a principled foundation in mathematics with applications in many fields such as social sciences, engineering, business, biomedical sciences and economics. The M.S. in Applied Statistics is intended for students who have a mathematical background (not necessarily having a degree in mathematics or statistics) that want to develop strong data analytic skills to answer complex, real world problems.

### Who should apply?

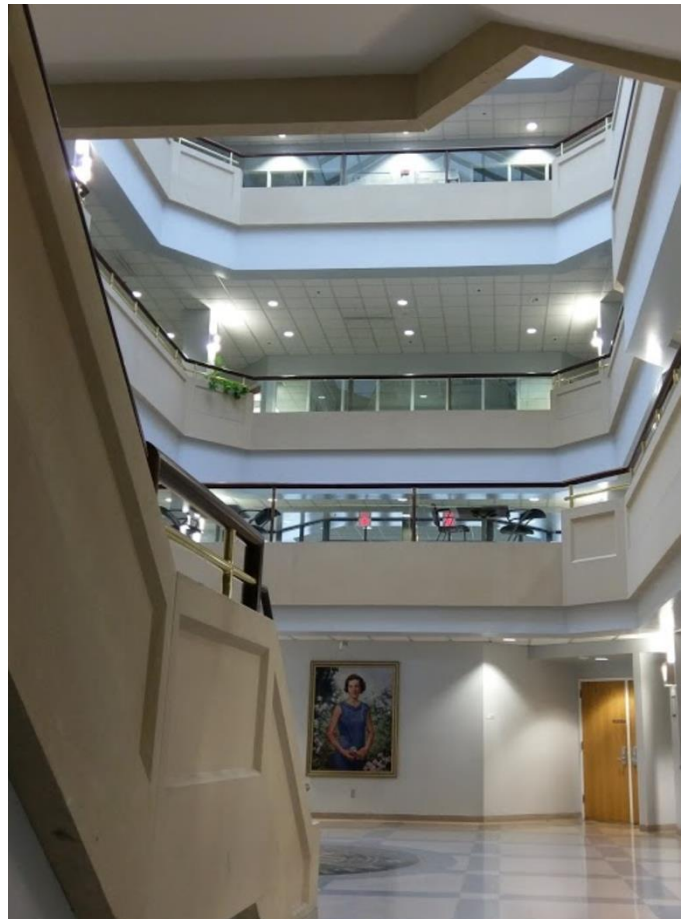

- Bachelors in mathematics, statistics, computer sciences, engineering, or other quantitative field
- Students interested in pursuing a career in the science of data

### Job opportunities after graduation:

- Finance
- Health Sciences
- Industry
- Government
