

**Curriculum Vitae  
(December 15, 2010)**

**NAME** Vikram Cariapa, Ph.D., P.E.

**1. ADDRESS**  
(Office) Department of Mechanical Engineering  
Marquette University  
P.O. BOX 1881  
Milwaukee, WI 53201-1881  
Phone: (414) 288-3607  
FAX: (414) 288-7790  
Email: [vikram.cariapa@marquette.edu](mailto:vikram.cariapa@marquette.edu)

**2. EDUCATION:**

Ph.D.	1985	University of Arkansas Fayetteville, Arkansas Major: Industrial Engineering Dissertation: "The Concept of Modular" Robots: "Validated by a Designed and Manufactured Robot."
M.S.	1982	University of Arkansas Fayetteville, Arkansas Major: Industrial Engineering.
M.E.P.	1977	Indian Institute of Management Ahmedabad, India Major: Management Education Program.
B. Tech.	1969	Indian Institute of Technology Madras, India. Major: Mechanical Engineering

**3. PROFESSIONAL EXPERIENCE:**

*August 1992 – Present:*

Associate Professor, Industrial Engineering Program, Department of Mechanical and Industrial Engineering, Marquette University, Milwaukee, WI.

*August 1995 – August 1996:*

Adjunct Associate Professor (Clinical), Department of Restorative Sciences, School of Dentistry, Marquette University, Milwaukee, WI.

*August 1984- August 1992:*

Assistant Professor, Industrial Engineering Program, Department of Mechanical and Industrial Engineering, Marquette University.

*August 1988-Present:*

Principal Duties: Teaching, Development of Industrial Engineering undergraduate courses and laboratories.

*August 1984- August 1988:*

Principal Assigned duties: Development of Industrial Engineering undergraduate courses and laboratories.

*August 1980 – August 1984:*

Graduate Assistant, Department of Industrial Engineering, University of Arkansas, Fayetteville, AR.

Supervisor, Industrial Engineering and Robotics Laboratory, University of Arkansas. AR.

*November 1969 – August 1980:*

Design Engineer (1969-1976); Head of Tool Design Dept. (1976-1980); Bharat Heavy Electricals Limited, Tiruchy, India.

#### **4. CURRENT RESEARCH INTERESTS:**

Mass Finishing

Design of prosthesis for spinal cord injury patients

Rapid Prototyping Processes

Design of Implements for the Elderly

#### **5. PATENTS AWARDED:**

Patent #5,891,065 awarded April 6, 1999 for Mobile Extremity Pumping apparatus to Vikram Cariapa, Dean C. Jeutter, & Shih-Kang Liang

Patent #5,437,610 awarded August 1, 1995 for Extremity Pumping apparatus to Vikram Cariapa, Dean C. Jeutter, & Shih-Kang Liang

#### **6. SCHOLARLY ACTIVITIES:**

##### **I. Refereed Journals**

Sridhar Harivanam, Richard W. Marklin, Paula E. Papanek, Vikram Cariapa, “A Shovel with a Perforated Blade Reduces Normalized Energy Expenditure Required for Digging and Shoveling Wet Clay.” *Human Factors: The Journal of the Human Factors and Ergonomics Society* published online 8 September 2010, DOI: 10.1177/0018720810379850

## 7. GRANTS:

### **I. Proposals under review.**

NONE

### **II. Funded Proposals:**

NASA Summer Faculty Fellow at NASA Langley (VA). Summer 2006 (\$12,000).

NASA Summer Faculty Fellow at NASA Langley (VA). Summer 2005 (\$12,000).

NASA Summer Faculty Fellow at NASA Langley (VA). Summer 2004 (\$12,000).

NASA Summer Faculty Fellow at NASA Langley (VA). Summer 2003 (\$12,000).

Abrasive Finishing (Chelsea, Michigan) Media for mass finishing (\$6000) August 2003.

Kimberly Clark Phase 1 and 2 implementation of the Cross functional data lab. May 2001 – present. (\$60,000).

Kimberly Clark preliminary Study of Cross functional data lab. August 2000 – May 2001. (\$10,000).

Briggs and Stratton, Donation of 9 Engines (October 2000) (\$2250).

Brown and Sharp Coordinate Measuring machine (August 2000) (\$5000).

Autodesk Design Software (March 2000) (\$4500).

NSF “Re-engineering the manufacturing curricula” January 2001 to January 2002. (With Dr. J Domblesky)(\$80,036).

Rexnord Conveying equipment division research setup. May – June 1998. (\$25,000).

Material Handling Institute Teachers grant. June 1997 (\$5000).

Washington Mills mass finishing research media donation. August 1996 (\$5000).

MU center for Sensing Technology grant “Miniature edema sensor research and implementation.” April 1996 (\$13,600).

Rotofinish mass finishing equipment grant. November 1996 (\$25,000).

Marquette University Rapid Prototyping grant. July 1995 (\$45,000).

MU Research Challenge grant “proof of concept of computerized edema sensing system for patients with spinal cord injuries. January 1994 (\$9900).

NASA Summer Faculty Fellow at Huntsville (AL). Summer 1994 (\$11,000).

Allen Bradley programmable Controller project August Jan. 1994. (\$4200).

NASA Summer Faculty Fellow at Huntsville (AL). Summer 1993 (\$11,000).

Spinal Cord Society, “Development of a Miniature Portable Extremity Pump System,” August 1992-1993 with Dr. Jetter (\$20,378).

NSF Grant Number USE – 92515894, “Incorporating Ergonomics Theory and Practice into Industrial Engineering Undergraduate Education,” 1992-93 with R. Schoenmarklin. (\$25,082).

College of Engineering Research Foundation, MU, “Implementing Neural Networks for the Design of Adaptive Controlled Deburring,” 1990-1991 with K. Akbay. (\$12,000).

Sundstrand Aerospace Corp., stereolithography development grant, 1991. (\$8,000).

Rotofinish, Kalamazoo, Michigan, equipment grant, 1991. (\$6,000).

Briggs & Stratton Corp., research grants, 1991. (\$6,000).

Johnson Controls, Stereolithography resin grant, 1991. (\$3000).

Voell Machinery, Milwaukee, software grant, 1991. (\$5000).

Briggs and Stratton Corp., “Brush Deburring of Aluminum Alloy Materials,” 1989-90 with R.J. Stango. (\$21,500).

Briggs & Stratton Corp., “Development of an Automated Deburring Process,” 1990 with R.J. Stango. (\$20,000).

Briggs & Stratton Corp., Equipment grant, 1989. (\$15,000).

EKF Design and Development Corp., software grant, 1988. (\$6,500).

DataMyte Corporation, Minneapolis, MN equipment grants 1987. (\$24,000).

General Motors Corp., continuation grant for development of the Industrial Engineering Manufacturing Program, 1987 with J. Farrow. (\$250,000).

CADKEY, Micro Control Systems Inc., software grant, 1987. (\$50,000).

Allen-Bradley, equipment grant, 1986. (\$1,000).

Briggs & Stratton Corp., equipment grant, 1984. (\$1,200).

### **III. Development of External Educational Facilities**

In addition to the foregoing equipment and research grants, several companies and institutions (MATC, Briggs & Stratton, Kearny & Trecker) have provided the use of their facilities for instructional and research purposes. (Estimated value: \$ 150,000).

### **IV. Unfunded Proposals**

NSF, October 1, 2009, Exploring Intrinsic Properties of Granular Media. (\$ 737,071 for 36 months)

Marquette University Equipment Grant. February 27, 2009, A Non-Contact Surface Finish Measuring System. (\$105, 000).

NSF, February 16, 2009, Discovering Transport Mechanisms for Composite Granular Materials. (\$ 631,507 for 28 months)

A Mass Finishing Model to Predict Material Removal, NSF, Project Director, \$350,927, Sep. 28, 2005.

Mass finishing based on Process Models for Material Removal, NSF, Project Director, \$323,824, Jan 31, 2005.

Development of a Water Quality Analyzer for Astronaut Habitat Monitoring using X-Ray Fluorescence Spectroscopy for Determining Chemical Constituents. Co Investigator with Warren Kelliher from NASA Langley, \$286,129 for 3 years, Aug. 2004 - Aug. 2007.

NSF/Whitaker. "A methodology for reducing Health Care Costs: August 97-August 2000. (\$878,387).

NSF. "Design and evaluation of media for centrifugal disk mass finishing machines" August 1997-August 1999. (\$58,551).

Spinal Cord Society "Radio frequency bladder sealing machine" January 1997 – June 1997 (\$32,100).

Brown and Sharpe Metrology Grant, "Metrology grant program" April 1995 (\$ 11, 847).

NSF. "Investigation of characteristics of small holes produced by wire electrical discharge machining" November 1994 (\$30,000).

Marquette University Research challenge grant. "Proof of concept of computerized edema sensing systems for patients with spinal cord injury." January 1994. (\$9900).

Marquette University Research challenge grant. "Entrepreneurial strategy and success in turbulent industries." January 1994 (\$10,000).

Paralyzed Veterans of America, "Development of a Miniature Portable Extremity Pump System," January 1993 (\$98,630).

Brown and Sharpe Metrology Grant, "MicroVal PFX Personal Coordinate Measuring Machine," April 1993 (\$61,950).

Cleaver Brooks, Milwaukee, WI, "Design of Experiments," April 1993 (\$15,000).

Marquette University Schmitt Fellowship. October 1992 (\$8400).

Briggs & Stratton Corp., "Implementation of Adaptively Controlled Deburring with Nylon Abrasive Nylon Filamentary Brushes," April 1990 (\$49,500).

National Science Foundation, "Adaptive Control of Circular Filamentary Brushes in a Deburring Operation," January 1990 (\$59, 323).

NSF, "Principles and Applications of Robotic Assembly," November 1989 (\$93,380).

Brown and Sharpe Metrology, "The Evaluation of Surface Finish Generated by Rotary Compliant and Semi-compliant Tools, April 1989 (\$13,500).

NSF, "Real-time Robotic Process Control," November 1988 (\$98,950).

National Bureau of Standards, "Development of and On-Line Laser Based Surface Finish Control System," May 1988 (\$ 104,743).

SME Manufacturing Education Foundation, "Development of Interactive Lectures for Manufacturing Processes, January 1988 (\$26,363).

NSF, "Validating the Concept of Multimode Machine Tools," January 1988 (\$57,426).

Daedal Systems, Inc., Milwaukee, WI, "Quality Networking Software," December 1987.

NSF, "Utilization of a Computer/Projection System to improve Comprehension in Engineering Courses. November 1987 (\$23,287).

NSF, "Improvement of the Quality of Manufacturing Education Marquette University," November 1987 (\$84,512).

National Science Foundation, "Operationalizing the Concept of Universal Machine Tools," January 1987, (\$50,663).

Marquette University 1987 Summer Faculty Fellowship, "Development of Microcomputer Based Interactive Lectures on Manufacturing Processes," December 1986.

Society of Manufacturing Engineers, miniproposal for a Cybot robot which ahs to be used in the College of Engineering's Flexible Manufacturing Laboratory, February 1986, (\$4,000).

Marquette University 1986 Summer Faculty Fellowship, "Development and Implementation of Control Algorithms for On-Line Real-time Adaptive Control of Computer Controlled Robots," November 1985.

## **8. THESIS AND ESSAY DIRECTION**

## **9. SERVICE ACTIVITIES**

### **I. Committee Memberships**

Member, College Computer Resources Committee (1987-2000).

Member, Department Laboratory Committee (1987-present).

Member, Search Committee for Industrial Engineering Director (1988-1989).

Member, Marquette University Library Board (1986-1987).

Member, Milwaukee Area Technical College Curriculum Committee for Computerized Machining Technology (1988-1995).

Member, Milwaukee Area Technical College Curriculum Committee on Industrial Engineering (1988-1995).

### **II. Miscellaneous Service**

(a) 1984-1987 and 1991, 2000 – 2004 – Faculty Advisor to Student Chapter of Industrial Engineers at Marquette University.

(b) 1987-1990 – Young Scholars Programs.

(c) 1984-Present – Engineering Open House.

## **10. COURSE INTRODUCTION AND DEVELOPMENT:**

### **I. Graduate Courses Developed and Taught**

ENMA 282: Reliability and Design Failure analysis (2000).

ENMA 284- Total Quality Engineering (2001).

ENMA 285- Value Engineering (with William Dunbar) (2001).

MEEN 273- Computer Integrated Manufacturing (1991).

INEN 295- Research Topics in CIM, Neural Networks and Controls (1987-present).

### **II. Undergraduate Courses Developed and Taught**

INEN 120 Engineering Economy.

INEN 131 Industrial Simulation.

INEN 140 Engineering Statistics.

INEN 143 Manufacturing Engineering 1.  
INEN 144 Manufacturing Engineering 2.  
INEN 148- Design of Engineering Experiments.  
INEN 151- Work Measurement and Methods Development (with laboratory),  
INEN 153- Manufacturing Processes (with laboratory).  
INEN 160- Flexible Manufacturing Systems (with laboratory).  
INEN 163- Applied Robotics (with laboratory).  
INEN 195- Undergraduate Research Topic Courses in surface finishing, Stereo lithography and compliant tool deburring.

MEEN 146 Principles of Design.  
MEEN 147 Principles of Design.

### **III. Laboratory Development**

#### *A. Manufacturing Laboratory (1984-1992)*

The development (from ground up) of an undergraduate industrial engineering flexible manufacturing laboratory began in August 1984. The laboratory is used to validate principles in the Industrial Engineering Courses, particularly INEN 151- Work Measurement and Methods Development, INEN 153- Manufacturing Processes, INEN 155- Facilities Design, INEN 160- Flexible Manufacturing Systems, and INEN 163- Applied Robotics. The laboratory was completed in 1987. Equipment has been installed for metal cutting processes; robotics; press working; non-traditional manufacturing processes; computerized design, data logging and analysis; automated control and audio visual education.

#### *B. Controls Laboratory (1986-1990)*

An undergraduate/graduate laboratory was developed for advanced control applications in surface finishing control and deburring. Work on the laboratory began in 1986 and was completed in 1990. Experiments which establish concepts in automated control are developed in this laboratory before implementation in INEN 160 and INEN 163 courses.

#### *C. Rapid prototyping Research Laboratory (1989-2000)*

An undergraduate/graduate laboratory was designed and developed for rapid prototyping. This laboratory includes a stereolithography machine (SLA 250, \$220, 000) and peripheral equipment. The laboratory is used to support the courses INEN 146/147 and for graduate research.

#### *D. Cross-functional multi disciplinary information processing laboratory (2001-present)*

This laboratory will essentially simulate a small modern manufacturing facility, and educate students on the various aspects of generating data and processing this data to produce information that is required for successfully executing the necessary business and engineering activities such as planning, design and manufacturing. A long-range plan has been developed for

installing Computer Aided Design workstations, rapid prototyping machines, computer numerical controlled (CNC) metal removal machines, industrial robots, sensors, control computers and programmable logic controllers. In this laboratory, all of the machines will be networked and connected to a lab server. This lab will generate different types of data. This includes real time analog data, real time digital data, continuous signals, intermittent signals, on/off status data etc. These different types of data will be generated by experiments involving the various pieces of equipment that have been identified earlier in this section. All the data that is generated will be fed into data bases that will be used for educating students in the Industrial engineering, Manufacturing engineering and Business programs. Kimberly –Clark Corporation, donated \$35,000 for investigating the proof-of-concept for such a lab.

## **11. HONORS RECEIVED:**

- i. Society of Manufacturing Engineers Scholar – University of Arkansas (1983-84)
- ii. Alpha Pi Mu – Honor Society of the Institute of Industrial Engineers (1981-84)
- iii. Professional Engineers Registration in April 1993
- iv. Institute of Industrial Engineers Chapter 45-Member of the Year (92-93)
- v. Institute of industrial Engineers Chapter 45- President (93-94 and 94-95)
- vi. Institute of industrial Engineers Chapter 45 Board (1993-present)
- vii. NASA Summer Faculty 1993 (NASA/Marshall Space Flight Center, Huntsville, AL).
- viii. NASA Summer Faculty 1994 (NASA/Marshall Space Flight Center, Huntsville, AL).
- ix. NASA Summer Faculty 2003 (NASA Langley Research Center, Hampton, Virginia).
- x. NASA Summer Faculty 2004 (NASA Langley Research Center, Hampton, Virginia).
- xi. NASA Summer Faculty 2005 (NASA Langley Research Center, Hampton, Virginia).
- xii. NASA Summer Faculty 2006 (NASA Langley Research Center, Hampton, Virginia)
- xiii. Marquette University Senior design team placed 6<sup>th</sup> out of 41 teams in the International Capstone Design Fair (ICDF) held in Seoul National University of Science and Technology on November 17<sup>th</sup>, 2010.

## **12. MEMBERSHIP IN PROFESSIONAL SOCIETIES:**

- i. Alpha Pi Mu
- ii. Institute of Industrial Engineers, Senior Member (10/80).
- iii. Society of Manufacturing Engineers, Senior Member (10/80).
