

A Century of Scholarship

1881 – 2004

Distinguished Scholars Reception Program
(Date – TBD)

Preface

A HUNDRED YEARS OF SCHOLARSHIP AND RESEARCH AT MARQUETTE UNIVERSITY

DISTINGUISHED SCHOLARS' RECEPTION (DATE – TBD)

At today's reception we celebrate the scholarship and creativity of Marquette faculty, staff and alumni throughout the last century, and we eagerly anticipate the coming century. From what you read in this booklet, who can imagine the scope and importance of the work Marquette people will do during the *coming* hundred years?

In addition, this gathering honors the recipient of the Lawrence G. Haggerty Faculty Award for Research Excellence, as well as recognizing the prestigious prize and the man for whom it is named. Presented for the first time in the year 2000, the award has come to be regarded as a distinguishing mark of faculty excellence in research and scholarship.

This program lists much of the published scholarship, grant awards, and major honors and distinctions among Marquette's faculty as well as similar research-oriented achievements among alumni. These scholarly accomplishments are numerous and significant; however, the listing is incomplete in two ways. First, it only reflects scholarship, which constitutes one-third of the professional responsibilities expected of a faculty member. Although teaching and service are not honored here today, faculty pedagogy is recognized through the Robert and Mary Gettel and Reverend John P. Raynor, S.J., Awards for Teaching Excellence. Second, the list of faculty accomplishments is extensive but is not comprehensive, while the alumni listing provides only a sampling of individuals'

outstanding accomplishments, excluding remarkable records in many non-scholarly pursuits. It is noted that the careers of some alumni have been recognized more fully over the years through various Alumni Association awards.

Given limitations, it is likely that some deserving individuals have been omitted and others have incomplete or incorrect citations in the program listing. Apologies are extended to anyone whose work has not been properly recognized; just as scholarship is a work always in progress, so is the compilation of a list like the one that follows. To improve the completeness and correctness of the listing, you are invited to submit to the Graduate School the names of individuals and titles of works and honors that have been omitted or wrongly cited so that additions and changes can be made to the database. For your convenience, a copy of the program and instructions for submitting data on-line can be found on the Internet at <http://www.marquette.edu/orsp/haggerty/index.shtml>, which is the website for Marquette's Office of Research and Sponsored Programs.

The list's shortcomings aside, it strives to highlight faculty recognized for published and/or researched work accomplished during their tenures at Marquette; alumni are acknowledged for scholarly and creative accomplishments during their entire careers. In cases where faculty graduated from Marquette, the list

identifies these individuals under faculty and includes data regarding graduation and scholarship. College and departmental designations for both faculty and alumni reflect those in use today.

Lastly, it is significant to indicate that inclusion in the program listing, as well as faculty and alumni invitations to today's reception, were based upon the following specific categories reflecting scholarly activities or honors:

Chairs and Distinguished Professorships

Authors, Editors, and Translators of Books

(If no further designation is provided, the named individual is the sole author of the work.)

Distinguished Career Funding

(Individuals who have obtained over \$1,000,000 in career funding.)

Major Grants and Contracts

(Generally includes grants or contracts greater than \$10,000.)

Editors of Scholarly Journals and Book Series

Fellowships and Visiting Professorships

Research Published Principally Through Articles

Prizes, Awards, Distinctions, Offices in Professional Societies, and Other Forms of Recognition

Patents

(Patent description, year, and number are generally indicated.)

Lawrence G. Haggerty
and the Lawrence G. Haggerty Award for Research Excellence

The Lawrence G. Haggerty Faculty Award for Research Excellence recognizes scholarly distinction at Marquette University. In 1998, Haggerty Enterprises, Inc., announced the endowed award, established to honor Lawrence Haggerty.

Lawrence George Haggerty graduated *summa cum laude* from Marquette's College of Engineering in 1940, with a major in mechanical engineering. As a student, he became a member of several honorary, engineering and fraternal societies, including Alpha Sigma Nu, Pi Tau Sigma, Tau Beta Pi, the Knights of St. Patrick, and Sigma Phi Delta. Indeed, the new Sigma Phi Delta house on campus bears Mr. Haggerty's name. Professionally, the North Dakota native worked in the managerial and manufacturing sectors of various companies from 1940 to 1967. These included the Radio Corporation of America, F. L. Jacobs Company, International Telephone and Telegraph, Farnsworth Electronics, and Warwick Electronics, which was a manufacturing firm he owned with Sears and eventually sold to Sanyo.

Building upon his vast business experience, Mr. Haggerty was president of the Illinois-based Lawrence G. Haggerty and Associates, Inc., an international merger and acquisitions consultant to top management. Thereafter, he founded Haggerty Enterprises, Inc.,

ventures, the successful entrepreneur maintained affiliations with approximately ten other corporations, among which were Medequip and Management Resources.

While active with his many professional interests, Mr. Haggerty was a devout Roman Catholic. He and his wife, the late Mary Ellen Sweeney Haggerty, were members of Saints Faith, Hope, and Charity Parish in Winnetka, Illinois, and Saint William's Parish in Naples, Florida. They were honored through respective Papal appointments as Knight and Lady Commander of the Star of the Equestrian Order of the Knights of the Holy Sepulchre—the Roman Catholic unit that honors the chivalry of those who have defended Christ's tomb in Jerusalem since before the Crusades.

In addition to being dedicated to the Church, Lawrence Haggerty was a devoted family man. He and Mary Ellen raised nine children at their Winnetka home: Michael E., Catherine (deceased), Eileen (AS '69), Patrick B., Margaret E. (L '89), Sheila B., Maureen E. (AS '79), Timothy J. (B '85; MBA '91), and Monica L. (C '95). While five of his children graduated from Marquette, Mr. Haggerty had other family connections with the university, including sons-in law John F.

Lawrence G. Haggerty
and the Lawrence G. Haggerty Award for Research Excellence

Warmuth (PT '84). A brother, the late Patrick E. Haggerty was a 1936 graduate of the College of Engineering and was a co-founder of Texas Instruments. Patrick and his wife, Beatrice, are recognized names throughout the Marquette campus. Patrick E. Haggerty Hall and the Patrick and Beatrice Haggerty Museum of Art stand as tributes to a couple who—similar to Lawrence and Mary Ellen Haggerty—has generously supported Marquette's mission of excellence.

The Haggerty family's strong bond with Marquette University also includes Lawrence Haggerty's service to his alma mater. From 1968 to 1968, he was a member of the Board of Regents—the first university governing body to include both lay and Jesuit representatives. Thereafter, he served as one of the first lay trustees from 1969 through 1988, after which he was trustee emeritus until 1994. This role as a trustee partially coincided with the presidency of the Reverend John P. Raynor, S.J., to whom Mr. Haggerty was a dear friend, trusted advisor, and mentor.

Marquette recognized Lawrence Haggerty's association with the university, his extraordinary commitment to serve, and his illustrious career by honoring him with the Distinguished Engineering Alumnus Award in 1970.

In addition, Lawrence Haggerty was the co-founder of the Marquette Club of Chicago, and the Club's Distinguished Alumnus Award is named for him.

Such honors attest to the integrity of an individual committed to doing one's best. Throughout his career and until his death in 1994, Mr. Haggerty generously supported this commitment in an educational sense at Marquette through various initiatives. Among these was sponsorship of the Reverend John P. Raynor, S.J., Faculty Award for Teaching Excellence, which he established. Thus, it is only a fitting tribute that the Lawrence G. Haggerty Faculty Award for Excellence in Research complements, in the name of scholarship, Lawrence Haggerty's all-encompassing belief in excellence.

James R. Kincaid

Chemistry

Professor Kincaid is one of Marquette University's most prolific and talented researchers. Since arriving at Marquette in 1984 and establishing his laboratory here, he has garnered more than \$3 million of extramural research funding from a dozen research projects, published 88 journal articles which have been cited more than 2400 times by other researchers, and served as research mentor for 11 Ph.D. students, 10 M.S. students, 5 undergraduates and 11 postdoctoral fellows. Professor Kincaid's area of research is in spectroscopic techniques of resonance Raman and time-resolved Raman spectroscopy. His work with zeolites show great promise in resolving significant issues of "back-electron transfer" which have hindered solar energy research in the past. His findings, published in *Nature*, have gained him international acclaim and promise to open the door to significant breakthroughs in energy research. His zeolite research also holds promise for new areas of research in the biological sciences as well. Professor Kincaid has received numerous honors for his research including the National Research Service Award from the National Institutes of Health (1975-1978), the Wehr Professor of Chemistry Chair at Marquette from 1993 –1998, and the Milwaukee Section Award from the American Chemical Society in 1998. He has served his discipline as an NIH peer reviewer since 1981. Professor Kincaid has served his Marquette students, and his discipline with his research, publication, service and teaching.

2001

Robert H. Fitts

Biology

Professor Fitts has established himself as one of the premier exercise physiologists in the world. His research has focused on three areas of interest: the cause of muscle fatigue, the effect of regular exercise on the function of single muscle cells, and muscle atrophy caused by exposure to a zero-gravity environment. Professor Fitts' research has provided leadership in sports medicine, geriatrics and long-term care, as well as the NASA space program. His research lab, which has garnered more than \$4.7 million of extramural funding, has produced the publication of more than 73 refereed journal articles, 18 book chapters, 90 abstracts, and more than 105 conference presentations. Professor Fitts has served his discipline as a member of the Editorial Board of the *Journal of Applied Physiology* since 1983, as a member of the Editorial Board of *Gerontology Journal: Biological Sciences* since 1993, as a member of the Grants Review Board of the American Heart Association Wisconsin Affiliate, and a member of NIH Geriatrics and Rehabilitative Medicine Study Section Reviewer for the NIH Reserve Board. Awards include NIH Fellow 1972 - 1975, MDA Fellow 1975 – 1976, NIH Career Development Award 1980 – 1986, NIG Senior Research Fellowship 1986-87, Citation Award from the American College of Sports Medicine 1999, Marquette Chapter of Sigma XI Award 1995 and the Wehr Distinguished Professor of Biology from 1997 to the present. He has served as research mentor for 10 Ph.D. students and 2 M.S. students, and all of his doctoral and postdoctoral students have secured

positions in academic institutions. He is a popular teacher, and graduate students and postdoctoral scholars come to Marquette specifically to work with him. Professor Fitts is the consummate scholar-teacher, and he brings a world-class reputation in exercise physiology to Marquette University.

Athan Theoharis

History

Dr. Theoharis is truly one of Marquette University's most respected and most productive historians. Early in his career, he made a name for himself as a specialist in the history of the Truman presidency and he continues to be the Department's premier historian of the 1950s in the United States. More recently, he has established himself, by virtue of his assiduous research and prolific publication, as one of a handful of highly respected and highly sought experts on the history of the Federal Bureau of Investigation. His analyses are often cited by other scholars, and his commentary is often sought by both national and international media. Moreover, his work is of public significance. As a Jesuit university, Marquette has made social justice a centerpiece of its public identity. Dr. Theoharis epitomizes this by combining his careful, accurate, and fair scholarship with a deep commitment to civil liberties and social justice. His work informs our understanding of public policy. It stimulates us to think about the nature and purpose of our policy. It advocates a public commitment to justice and strong respect for all people. Thus Dr. Theoharis's scholarship serves as a model for his colleagues and students alike. A respected teacher, a trusted colleague, and an impressive researcher, Professor Athan Theoharis brings honor and international renown to Marquette University.

2003

Rev. Roland J. Teske, S.J.

Philosophy

Rev. Roland J. Teske, S.J. is quite simply one of the most respected and prolific scholars in Medieval Philosophy today. His curriculum vitae shows that he has produced a truly prodigious output of internationally distinguished books and scholarly articles, including seven books currently in press. He has assumed leadership in his field from his scholarship, his editorial work, and his membership in six professional societies. The inaugural Donald J. Schuenke Professor of Philosophy at Marquette, he has also held distinguished visiting chairs at three other universities. Fr. Teske has brought the full range of his scholarship to bear in teaching at the undergraduate and graduate level, in specialized courses and in the core philosophy courses required of all Marquette undergraduates. St. Thomas Aquinas once wrote that "among all human pursuits, the pursuit of wisdom is more perfect, more noble, more useful and more full of joy." Fr. Teske's life has been devoted to the pursuit of wisdom. Through his scholarship and teaching, he has communicated and shared this wisdom with his colleagues and students, and, through them the world.

2004

Gerald F. Harris

Biomedical Engineering

There can be no doubt that Dr. Harris is a leader and visionary in Orthopaedic and Rehabilitation research. Dr. Harris has an intense personal dedication to helping children and adults with crippling diseases. His first priority is helping children afflicted with cerebral palsy, lower limb amputation, and brittle bone syndrome. Dr. Harris' early leadership training in the U.S. Marine Corps, the Naval Academy and in graduate business and management has served him well. He has published and presented his scholarly work abundantly and his research and programmatic funding of nearly \$16 million provides tangible evidence of his accomplishments. Dr. Harris' research and interdisciplinary collaborations are world-class.

He is a consummate biomedical engineering researcher – an individual who can be cited as a role model for future generations of researchers. Dr. Harris' work has facilitated and enabled more effective surgical procedures that help children and adolescents with crippling disabilities. Through his interdisciplinary research with institutions such as the Medical College of Wisconsin and Chicago Shriners' Hospital, Dr. Harris has not only helped numerous patients, but has also helped foster and develop future researchers, medical doctors, and clinical personnel.

In short, Dr. Harris is a role model for anyone interested in improving the delivery of health care to individuals with disabilities and in mentoring future researchers.

2005

Chieu Tran

Chemistry

Professor Chieu D. Tran is an exceptional researcher well-known for his innovative design of new instrumentation for use in fundamental studies in analytical chemistry and materials science. His pioneering work has resulted in the design of novel spectrometers based on thermal lensing effects and use of acoustic optical tunable filters which can be used for ultrasensitive detection of a wide variety of chemical substances. His development of multispectral imaging techniques has further led to the ability to provide spatially-resolved characterization of physical and chemical properties. Included among the many fundamental studies he has performed with his unique instrumentation are solvent purity determination and detection of biochemically-relevant species such as chlorophyll and nucleosides. His work addresses critical issues in many frontier areas of modern chemical research including characterization of nanoscaled materials, development of high performance chemical and biochemical sensors, and the design of environmentally-benign chemical processes known as green chemistry.

Professor Tran has received numerous awards in recognition of his accomplishments including the Society for Applied Spectroscopy's Gold Medal Award, a Shannon Award from the National

Institutes of Health, an Invitation Fellowship for Research in Japan, Marquette University's Sigma Xi Chapter Award for Distinguished Scientific Research Achievement, and the American Chemical Society Milwaukee Section Award. In addition to participation of undergraduate, graduate, and postdoctoral associates in his research laboratory, Chieu Tran has established productive collaborations with several international scientists. His research program at Marquette has attracted over 3 million dollars in external support from federal, corporate, and foundation sources.

In recognition of his truly significant and highly productive research career at Marquette University, it is indeed a pleasure to present the Lawrence G. Haggerty Faculty Award for Excellence in Research to Professor Chieu Tran.
