NIH Project Narrative Guidance

December 2017

The "Project Narrative" attachment is required for all applications.

Format:

This section is limited to 2-3 sentences, and must follow the required font and margin specifications.

Content:

Describe the relevance of this research to public health in, at most, three sentences. For example, NIH applicants can describe how, in the short or long term, the research would contribute to fundamental knowledge about the nature and behavior of living systems and/or the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. If the application is funded, this public health relevance statement will be combined with the project summary (above) and will become public information.
