Marquette University  
Department of Physical Therapy  
COLLEGE OF HEALTH SCIENCES  
GENERAL DEPARTMENT INFORMATION

Office Location
Department of Physical Therapy: Schroeder Complex Room 346
Program in Exercise Science: Cramer Hall Room 215
Marquette Physical Therapy Clinic: Cramer Hall Room 215
Neuro Recovery Clinic: Cramer Hall Room 104

Office Staff
Mrs. Cynthia Swiatkowski: Records Secretary/Office Associate
Ms. Eliza Gomez: Office Associate
Mrs. Diane Slaughter: Program Coordinator
Ms. Patty Przybylka: Office Associate, PT Clinic
Ms. Lucie Wehbe: Office Associate, Neuro Recovery Clinic
Mrs. Marjorie Klatt: Patient Account Rep – PT Clinic and Neuro Recovery Clinic
Ms. Yolanda Webb: Program Development Coordinator; Program of Exercise Science

Office Hours and Telephone Numbers
The main offices are open Monday through Friday, 8:00 a.m. to 4:30 p.m.
Main Office: (414) 288 - 7161
Fax: (414) 288 - 5987
*Exercise Science: (414) 288 - 5069
Marquette Physical Therapy Clinic: (414) 288 - 1400
Neuro Recovery Clinic: (414) 288 - 6122

DEPARTMENT OF PHYSICAL THERAPY MISSION

The mission of the Department is to prepare future health care practitioners and researchers with an education rich in clinical experiences, community outreach, and research opportunities to develop leaders guided by the values of “Cura Personalis.”

DOCTOR OF PHYSICAL THERAPY (DPT) PROGRAM

Vision

The Physical Therapy Department at Marquette University will be among the best educational programs in preparing Physical Therapy graduates who excel in academics, leadership, clinical practice, and service to others.

Mission

To graduate entry-level physical therapist professionals who are ethical practitioners, knowledgeable of current practices, skillful in applying their knowledge, motivated to address the needs of the underserved community, and self-directed lifelong learners who will become leaders in their profession and community.

Furthermore, in an effort to meet the current health care needs in under-served areas, the department is committed to supporting programs of outreach that will enhance the enrollment and training of disadvantaged students and service to disadvantaged populations.

Our primary goal is to graduate physical therapists that are recognized by consumers and other health care professionals as general practitioners of choice to whom consumers have direct access for diagnosis of, interventions for, and prevention of impairments, functional limitations, and disabilities related to movement, function, and health.

Philosophy

Consistent with the Ignatian practice of Examen which makes a Jesuit education unique, the Department of Physical Therapy aspires to transform students into critical thinkers who respect the dignity and worth of others, through the process of reflection and discernment.

The teaching-learning process is recognized as a dynamic interaction of shared responsibility among the academic faculty, clinical faculty, and students. The Department of Physical Therapy supports the educational view that students learn in a multitude of ways, necessitating a variety of learning experiences. These experiences are important for the development of a life-long autonomous learner who is self-motivated and self-directed. The departmental faculty are a resource and role model in the development of these traits by providing quality instruction, contributing to the general body of knowledge through an active research agenda, maintaining personal clinical competence including the operation of on-campus Physical Therapy clinic, demonstrating professionalism, respecting the dignity of others and advocacy for patient and professional causes. It is the goal of the faculty to help students to become educated members of society, active members of their profession and role models for peers and future physical therapists.

Expected Global Student Outcomes

One of the defining characteristics of a Marquette education is the focus on cura personalis – care of the whole person. In that vein, we expect that Graduates of the Doctor of Physical Therapy program will embody that characteristic. Graduates of the Physical Therapy program will be able to:

1. Demonstrate the skills necessary to practice autonomously within a direct access environment in essential practice areas as defined by the Guide for Physical Therapist Practice.

2. Use testing and differential diagnosis to screen individuals in order to determine appropriateness for physical therapy services, and/or to determine the need for referral to other health professionals.

3. Apply evidence-based decision making in planning patient care.

4. Address social determinants of health within the plan of care.

ACADEMIC STANDARDS - REQUIRED TO ENTER INTO THE PROFESSIONAL PHASE

Students are still subject to the Scholastic Censor policy outlined in the Undergraduate Bulletin for their undergraduate coursework. However, physical therapy related prerequisites and pre-professional phase courses are subject to the Department of Physical Therapy Academic Standards. To proceed into the professional phase (i.e. 4th year) of the six-year, two summer DPT Program, students are required to successfully meet the following six requirements:

1) A 2.67 GPA or greater and a grade of a C or better (C- is not acceptable) in the following prerequisite courses for 32 total credits (refer to form on page 13):

<table>
<thead>
<tr>
<th>Required D.P.T. Prerequisite courses*</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biology</td>
<td>3 Cr</td>
</tr>
<tr>
<td>Chemistry I and II</td>
<td>8 Cr</td>
</tr>
<tr>
<td>Introduction to Physical Therapy</td>
<td>1 Cr</td>
</tr>
<tr>
<td>Physics I and II</td>
<td>8 Cr</td>
</tr>
<tr>
<td>Statistics</td>
<td>3 Cr</td>
</tr>
<tr>
<td>**Anatomy &amp; Physiology</td>
<td>6 Cr</td>
</tr>
<tr>
<td>***Intro to Lifespan, Abnormal or</td>
<td>3 Cr</td>
</tr>
<tr>
<td>Developmental Psychology Course</td>
<td>32 Credits</td>
</tr>
</tbody>
</table>

** The anatomy and physiology requirement can be fulfilled with the options below depending on your undergraduate degree requirements and meeting course prerequisites:

- Anatomy options: BISC 1035 4 cr. or BISC 3135 4 cr.
- Physiology options: EXPH 2045 3 cr., BISC 4145 4 cr. or BIOL 4701 4 cr.

Abnormal or developmental psychology prerequisite options are PSYC 2101, 3101, 3120 and 3401 at MU. Psych majors should still consult with their advisors and may need the 3000 level courses. Non-psychology majors can take PSYC 2101.

*It is strongly encouraged that all D.P.T. prerequisite courses be completed at accredited four-year institutions. Courses taken elsewhere may be completed in-person or online with the exception of Chemistry 2, Physics 2, Anatomy & Physiology, which must be taken in-person (Search for Classes by Instruction Mode). No online repeats of a prerequisite course are allowed unless completed at Marquette with the exception of Chemistry 2, Physics 2, Anatomy & Physiology. Advanced Placement (AP) International Baccalaureate (IB) and/or dual enrollment college credits may be applied towards DPT prerequisite courses with the exception of CHEM 1002, PHYS 1002, Anatomy & Physiology. These prerequisite courses are strongly recommended to be taken at an accredited 4-year institution.

2) To maintain direct-admit status:

a) No more than two prerequisite courses can be completed with a grade of C. A grade of C- or lower is not acceptable for prerequisite courses.

b) Students can retake no more than one prerequisite course. If a course is repeated, the higher grade is used in the D.P.T. prerequisite GPA calculation.

c) It is strongly encouraged that all D.P.T. prerequisite courses be completed at accredited four-year institutions. Courses taken elsewhere may be completed in-person or online with the exception of Chemistry 2, Physics 2, Anatomy & Physiology which must be taken in-person. (Search for Classes by Instruction Mode) No online repeats of a prerequisite course are allowed unless completed at Marquette with the exception of Chemistry 2, Physics 2, Anatomy & Physiology. Note: AP, IB and dual enrollment credits awarded by MU are credit-bearing only and are not included in grade point average (GPA) calculations. Prerequisite courses taken outside of MU after high school are included in the D.P.T. prerequisite GPA calculations, even though they are not included in the university GPA calculation.

d) At least one-half of the 32-prerequisite credits must be taken at Marquette University. Credits awarded for test and/or dual credits completed in high school do not count as prerequisite credits taken at Marquette University.

e) Students can take no more than seven prerequisite credits outside of Marquette post high school and must follow the policy for Study at Other Institutions. Prerequisites not taken at MU after high school are included in the D.P.T. prerequisite GPA calculations, even though they are not included in the university GPA calculation.

3) A demonstrated plan for completion of a bachelor’s degree at the end of the spring term of the DPT5 year in the professional phase (years 4, 5 and 6) of the program. Students who do not complete their undergraduate degree in the expected time frame (4.5 years for EXPH majors, 4 years for all other majors), must submit a written plan to the Physical Therapy department chairperson no later than June 1 that outlines degree completion before the end of the spring term of the DPT5 year. Students failing to have an approved plan cannot matriculate to the professional phase.
Students accepted to the Athletic Training/Physical Therapy dual-degree program must complete all requirements for the Master of Athletic Training degree prior to entering the final two terms of the Doctor of Physical Therapy program.

4) A student that forfeits early assurance direct admit status can still apply as an internal applicant in their third or fourth year and are no longer time bound for when they need to start the professional phase. This is a competitive admission window without a guarantee of enrollment.

The sequence of courses in the professional phase begins in August of each academic year and includes both summers of the three-year program. Following acceptance into the professional phase of the program, students follow the curriculum as outlined for the three-year professional phase unless prior approval is received from the department chairperson.

Grade points are awarded on a 0 to 4 scale: *A = 4.00; A-= 3.67; B+= 3.33; B = 3.00; B-=2.67; C+= 2.33; C=2.00; C- = 1.67; D+ = 1.33; D=1.00; and an F is 0 grade points. A grade point average is calculated by dividing the total grade points achieved (grade points for grade earned x course credits) by the total number of credits earned.

Example:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Grade</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemistry</td>
<td>4</td>
<td>A-</td>
<td>3.67 x 4 = 14.68 grade points</td>
</tr>
<tr>
<td>Biology</td>
<td>3</td>
<td>C</td>
<td>2.00 x 3 = 6.0 grade points</td>
</tr>
<tr>
<td>Physics</td>
<td>4</td>
<td>B</td>
<td>3.00 x 4 = 12.0 grade points</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>11</strong></td>
<td></td>
<td><strong>32.68 grade points GPA (32.68 QP/11 cr) = 2.971 GPA</strong></td>
</tr>
</tbody>
</table>

**CR/NC Grade Option:** University guidelines allow junior and senior students to elect one course per term (to a maximum of four courses) for which only a CR or NC grade is assigned, given certain requirements are met. Refer to the undergraduate bulletin for the specific requirements. However, this CR/NC option is not available for any course that is part of the 32 prerequisite core credits, nor any course normally required in the professional phase of the program.

**Assessment of student requirements for admission to the professional phase**

Assessments of students’ fulfillment of the above criteria are made June 1, prior to students entering the professional phase of the program in the summer of their third year. Students who have successfully met the requirements outlined above in undergraduate academic regulations are guaranteed admission into the professional phase of the program with the class they entered as freshmen. Students who do not meet or do not have an approved plan to meet the criteria forfeit automatic admission into the professional phase in the fall term.

**Request to Delay Entry:** Any request to delay entry into the professional phase, or to enter another cohort, either before or after the one in which the student originally entered as a freshman, is not guaranteed. Any such request must be submitted in writing to the Chairperson of the Department.

5) **Course Sequence:** Taking courses early and out of sequence is discouraged. No online prerequisite courses are accepted except if offered at Marquette. Students who fail to meet these requirements may be placed on academic probation and required to retake professional phase courses. Students cannot withdraw/drop a required D.P.T. class without permission from the department chairperson.

6) **Students cannot take professional phase courses (PHTH courses or BISC 7130) during the pre-professional phase.**

**Admissions Hearing**

Direct admit students who complete the prerequisite courses with GPA below 2.670 or fail to meet any of the other admission requirements, including loss of direct admit status, are not admitted to the professional phase of the program. A DPT 3 student may request to use the summer session to retake one prerequisite if it would be their first retake in order to achieve the 2.670 GPA. Such a request is made in writing to the departmental chairperson and approval is not guaranteed. Students who do not successfully remediate deficiencies, or who have lost their direct admit status may request a hearing with the Academic Standards Committee.

- **Statistics**
- **MU**

☐ I have a minimum of 2.67 of prerequisite coursework.

☐ I have completed no more than two prerequisites with grade of C. I understand C- is not acceptable, and that all other prerequisites have been completed with a C+ or higher.

☐ I understand D.P.T. prerequisite courses taken elsewhere may be completed in-person or online with the exception of Chemistry 2, Physics 2, and Anatomy & Physiology which must be taken in-person. I also understand repeated prerequisite courses taken elsewhere cannot be taken in online format.

☐ I took Chemistry 1002, Physics 1002, Anatomy and Physiology in person.

☐ I understand up to 7 credits can be taken at a community college, 2-year, or technical school.

☐ I have at least 16 credits of the prerequisite course credits (32) completed at Marquette

☐ I understand Advanced Placement (AP) International Baccalaureate (IB), and/or dual enrollment credits may be applied towards DPT prerequisites with the exception of Anatomy and Physiology, CHEM 1002, and PHYS 1002. Please note AP, IB, and/or dual enrollment credits awarded by MU are credit bearing only and are not included in grade point (GPA) calculations.

☐ I will be receiving my undergraduate degree, ________________________,

in ______________________ of ______________________

☐ Date Submitted
**ACADEMIC INTEGRITY and MISCONDUCT**

**Rationale**

Academic integrity is central to maintaining the high standard of academic excellence to which Marquette University is dedicated. All members of the university community – including faculty, staff, and students - share the responsibility for the academic standards and reputation of the university. Academic honesty is essential for ensuring that students’ skills and knowledge are fairly and accurately assessed. Conversely, academic dishonesty is destructive of the values of the University, and it is unfair and discouraging to the majority of students who pursue their studies honestly. Instances of academic misconduct during the pre-professional phase must be reported to the Department of Physical Therapy by the student and the student may be placed on probation during the professional phase. Failure to report instances of academic misconduct within 6 months of the investigation could result in dismissal from the physical therapy program.

Please refer to undergraduate bulletin at [http://bulletin.marquette.edu/undergrad/](http://bulletin.marquette.edu/undergrad/).

**ACCRREDITATION**

The Doctor of Physical Therapy Program (DPT) at Marquette University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; telephone: 703-706-3245; email: accreditation@apta.org; website: [http://www.capteonline.org](http://www.capteonline.org). The accreditation period will last until December 31, 2026. The CAPTE accreditation applies only to the DPT program and not to Exercise and Rehabilitation Science formerly the Clinical and Translational Rehabilitation Health Sciences Master’s and PhD programs nor to the Marquette University Neurologic PT Residency Program Co-sponsored by Zablocki VA Medical Center. The Neurologic Residency program is accredited by the American Board of Physical Therapy Residency and Fellowship Education until November 30, 2025.

**Current Accreditation Status:** Accreditation  
**Five-year history:** Accreditation

**ADVISING**

Academic advising is an important aspect in your college life allowing you maximum educational potential through communication and information exchanges with your advisor.

Students are assigned an advisor in the major in which they are enrolled for their undergraduate major. The College of Arts and Sciences has a pre-DPT advisor. Ms. Yolanda Webb and Ms. Michelle Schuh provide advice in the pre-professional phase for students in the Program in Exercise Science and the College of Health Sciences, respectively. In the third year of the pre-professional program, each student is assigned a Physical Therapy (PT) faculty advisor. Students of other Colleges are welcome to contact Ms. Michelle Schuh, Assistant Dean of the College of Health Sciences with questions about the PT program. PT Department advisors are available during the week of all-university advising. Please contact the PT Department office if you would like to meet with a PT advisor at any other time during your academic career. Additionally, there will be mandatory class meetings with the Department Chair for advising, questions, and program updates. If you cannot attend a mandatory meeting, it is your professional responsibility to notify the Department and make other arrangements to receive the information conveyed.

Your PT advisor will be able to answer your questions concerning:

1) Physical therapy  
2) Marquette University Doctor of Physical Therapy curriculum  
3) Other health related disciplines  
4) Physical therapy course requirements and sequencing of course material  
5) Graduate education, continuing education and career opportunities in physical therapy

Your PT advisor probably will **not** be able to answer questions concerning:

1) Financial aid  
2) Course requirements in physical therapy programs other than Marquette  
3) Degree requirements in other units or majors at Marquette

Please arrive for your appointment on time.  
After selecting your courses, check that the section numbers are correct, that you have taken the course pre-requisites, and that there are no time conflicts with other courses.
Appointments at pre-registration advising are short. If you need more time to speak with your advisor, it would be advisable to make an appointment outside of pre-registration time.

**ALTERNATE INSTITUTIONS**

University guidelines state that students who plan to study at another institution must obtain written approval for each course prior to enrollment in the course (see undergraduate bulletin). If prior approval is not obtained, the university reserves the right to not accept the credits earned at the other institution. Course approval forms may be obtained from the student’s college office. See 2c in *Academic Standards - Required to Enter into the Professional Phase* on page 11.

**ATTENDANCE POLICY (IN THE PROFESSIONAL PHASE)**

**Classroom**

A student is expected to attend every meeting, lecture, lab, or clinical experience of the courses in which he or she is registered. Any absence, regardless of the reason, prevents the student from getting the full benefit of the course and renders the student liable to university censure. In the Department of Physical Therapy, class attendance requirements and the impact that absences may have on a student's grade are made by the individual instructors. The attendance policy in each Physical Therapy course will be published in the course syllabus. Also, see Uniform Expectation #3 Classroom Behavior.

Students who are ill or anticipate absence for a family emergency must contact the administrators in the physical therapy department immediately (Chair, Allison.Hyngstrom@mu.edu and academic standards Chair, D_Pinto@marquette.edu). All students must consult with the instructor of the course(s) missed for makeup, if necessary. Absences of two or more weeks of content or 10% of content in shorter sessions during the fourth, fifth or sixth years of the program may be considered as grounds for repeating the entire term.

For short term absences (e.g., 1-2 class meetings), students are expected to get notes from classmates. Please do not ask instructors for exceptions to this policy. The department understands that certain situations (e.g., a medical emergency) may arise where students are absent from an in-person class for several days. Notification to the PT department is required. Only extreme circumstances discussed at the departmental level in advance or at the time of absence, may warrant accommodation such as streaming lectures. Decisions will be made by the Department Chair and Chair of Academic Standards. Students will then be expected to contact the individual faculty member to determine if accommodation is possible. If a lecture is recorded for viewing later, it will be for personal use only.

**AWARDS (GRANTED IN THE PROFESSIONAL PHASE)**

**M. Patricia Murray Award.** This award is given to the outstanding physical therapy graduate in recognition of academic excellence, scholarship, and potential contribution to the profession. The recipient of this award is selected by the faculty of the Department of Physical Therapy. The award was instituted in 1985 in memory of the late M. Patricia Murray, Ph.D. Dr. Murray was a dedicated teacher who was part of the physical therapy faculty from the beginning of the Program at Marquette until her death in 1984. She was a researcher who was well known through her many published articles, especially in the area of locomotion.

**Daniel Strelnick Clinical Award.** This award is given to the outstanding clinician in the last year of the professional phase. Faculty members nominate candidates, and the final choice is determined by the students’ clinical evaluations. The award is based on evidence of assertiveness, leadership, rapport, and clinical skills. Daniel Strelnick was closely associated with the program at Marquette for over 30 years. He was Director of Physical Therapy at the Veterans Administration Hospital and a clinical adjunct faculty member with the program at Marquette.

**Dr. Lawrence G. Pan – Dr. Richard H. Jensen Service Award.** This award is presented annually by the faculty to a graduate who demonstrates exemplary humanitarianism, professionalism, leadership, and service. The award was renamed in 2018 to honor retiring Department Chair, Dr. Lawrence Pan (Chair 1996-2018) and retired Chair Dr. Richard H. Jensen (Chair 1978-1996). The students of the DPT-6 class select nominees for this award in the fall semester prior to graduation. The Class will submit no more than five names with the award winner or winners selected by the physical therapy faculty.

**Research Awards.** Research Awards. These awards are given annually to the graduates who: 1) complete research projects and present at state or national professional meetings, or 2) are published authors in papers, or 3) present their research at Marquette’s Forward Thinking Poster Session.
**Academic Honors.** The Department of Physical Therapy will follow the University guidelines for honoring those who graduate summa cum laude (>3.9 GPA), magna cum laude (>3.7 GPA), and cum laude (>3.5 GPA).

**WPTA SE District Award.** This award is given annually by the Southeast District of the Wisconsin Physical Therapy Association to graduating student(s). Students submit an application on the basis of academic achievement, extra-curricular activities, and involvement in the American Physical Therapy Association and/or its components. The executive committee of the District selects the recipient(s) following brief interviews with the nominees. Information about this award and application procedure is presented in the final year of the DPT program.

**CLINICAL EDUCATION EXPERIENCES**

Please refer to the Department of Physical Therapy - Clinical Education Experience Manual. This manual is located on the Marquette University Clinical Education Information website. The manual has information and policies including but not limited to CEE course sequence, descriptions, advising, site selection process, attendance policy, professional behaviors, performance expectations and clinical education experience requirements.

**COLLEGE OF HEALTH SCIENCES ALUMNI ASSOCIATION**

The College of Health Sciences Alumni Association has been recently established to allow equal representation of all the Departments within the College of Health Sciences. The goal is to foster synergies and strength within and among the Departments as well as increasing the College's identity among both alumni and current students.

The College of Health Sciences Alumni Association will sponsor a mini-lecture series, book scholarships, career nights, and special activities, as well as participating in University-Wide alumni events.

**C.P.R. CERTIFICATION**

Certification in basic life support that includes child, infant and both one- and two-person adult CPR along with AED (automatic external defibrillator) training is required of all students. This requirement needs to be met prior to October 18th of the fourth year of the DPT program. The Department of Physical Therapy only accepts CPR certification through the American Heart Association. It is required that students maintain continued certification throughout the remainder of the DPT curriculum. Failure to maintain and report current certification to the PT Office may jeopardize enrollment in subsequent PTH courses and reduce priority for internship site selection. Students should contact their local American Heart Association office. Please note there is a new two-part procedure for attaining CPR certification. The first part is the instruction and exam which can be done in person or on-line. The on-line course is called HeartCode BLS. The link is https://elearning.heart.org/course/437. The second part is a hands-on in person training at a local American Heart Association Facility or at Marquette University. You will need to do both parts to get your CPR certification.

**EXAMINATIONS**

During written or practical exams, quizzes, and all other graded evaluations, use of any materials: printed or electronic (including but not limited to: computer, cell phone, smart watch, etc) are not allowed except with the permission of instructor. Such devices should be turned off, physically removed, and stowed properly during the assessment.

**FERPA POLICY**

The Department recognizes and abides by the Family Educational Rights and Privacy Act (FERPA) of 1974, as amended. FERPA controls the confidentiality of, and access to, student education records. The entire policy is found in the University Student Handbook. The Department hereby adopts FERPA policy with respect to the maintenance, inspection, review, and disclosure of student “education records.”

**GRADE APPEAL**

The Department of Physical Therapy follows the College of Health Sciences undergraduate grade appeal guidelines. (See Appeal Procedures in the College of Health Sciences section of the University Bulletin).

Standard rounding of above and below .5 to be utilized.

INCOMPLETE (I) GRADE POLICY

This grade must be initiated by students and approved by the instructor prior to the end of the session in which the class is offered and must be assigned by the instructor prior to the final grading deadline for the term/session in which the class is offered. The student must expressly ask the instructor to issue an Incomplete grade and explain the extenuating circumstances keeping them from completing their remaining assignments and/or final exam by the deadline. The instructor may consider the request only if the student has participated in the class consistently during the term and up to the time of the request, including completion of at least 60 percent of the class as measured in weeks of attendance or participation in the session. The instructor may not consider the request if they deem the student incapable of earning a passing grade at the time of the request.

This grade is cleared through the college office of the college offering the course. If not cleared or changed to the grade of IE by the date specified in the Academic Calendar the grade is automatically turned into a permanent grade of F or other non-passing grade based on the grading options of the course. Retroactive withdrawals may not replace an I grade. Because these grades denote that the student did not fulfill all course requirements and/or the final exam, the university views these grades with the same seriousness as the grade of F or WF.

Any exception to the assignment of this grade must be approved by the college offering the course; however, retroactive withdrawals may not replace an I grade, regardless of an approved exception.

INTERNAL TRANSFER ADMISSIONS TO THE PROFESSIONAL PHASE

Marquette students who were not admitted as freshmen may apply to transfer into the professional phase of the program. Historically about 10 spaces have been offered to Marquette pre-physical therapy students (PREPS); however, neither the number of spaces nor transfer admission are guaranteed. To apply for this window of admission, students must have completed or are in the process of completing half or more of the 32 physical therapy prerequisite credits at Marquette University and meet or exceed all requirements for the undergraduate phase. Further details of entrance requirements are available from the Department of Physical Therapy.

LIBRARY SERVICES

Reference materials and current periodicals will be at the Marquette libraries at the start of the semester. Consult the Marqcat Catalog for the location of all other items.

All Physical Therapy students may also take advantage of several anatomical models that are part of the Weigell Collection on permanent reserve at the Raynor Library. The Weigell Collection includes models of the hand, finger, and two spines. The collection was made possible by a donation from the late Carl Weigell, father of 1996 Marquette Physical Therapy graduate, Anne Weigell.

The Medical College of Wisconsin library is located at 8701 Watertown Plank Road. Library hours are 7:30 a.m. to midnight daily. Physical therapy students are eligible for a library card if desired.
NAME CHANGE

Name Change forms are available in the Office of the Registrar in Zilber Hall should you change your name during or after your education at Marquette.

PHYSICAL THERAPY STUDENT COUNCIL

The Council is the governing body for the students in the program. The Council consists of an elected Executive Committee, Class Officers, and Representatives. Opportunities to participate are ample through the Council’s public relations, education and social activities, fundraising, philanthropic and pro bono clinic committees. The Physical Therapy Student Council is a great way to get involved, network with other PT students and to gain insight into your future profession.

POLICY ON GRIEVANCES (was procedure for filing a complaint)

Formal grievance policies at Marquette University differ based on university role. Employee processes differ based on whether an individual is full time faculty versus non-full-time faculty. Full-time faculty grievance processes are found in the Marquette University Faculty Grievance Procedures as written in the Handbook for Full-Time Faculty. Active employees who are non-faculty have procedures outlined in the employee handbook. Student grievance procedures are listed in the grievance/complaint process and are reported in the Office of Student Development’s Policy and Procedures.

Policies differ on who should be reported to according to “channels of authority”. Non-faculty employees will first report to immediate supervisors, faculty to the Chair of the Department, and students have different first points of contact based on whether grievances are academic versus non-academic. All grievance procedures recommend attempting to resolve grievances using informal approaches, if possible. That said, informal attempts to address grievances should not be considered pre-requisites for invoking formal procedures. Once invoked, formal processes should complement informal approaches to resolve complaints and are not to serve as substitutes for them.

REQUEST FOR TEMPORARY WITHDRAWAL

A student who wishes to take a temporary withdrawal from the PT Program must make his/her request in writing to the Chairperson of the Department of Physical Therapy, who will consider the request and render a decision in writing. A student’s direct admit status is guaranteed only for the class in which they enter as freshman. The student may be subject to Conditions of Probation upon returning to the PT Program depending on the student’s academic performance or professional behaviors at the time of the request. If a temporary withdrawal is granted to a student who is already on Probation or under a Learning Contract, the Conditions / Terms of these agreements will continue to be in effect upon the student’s return to the program, with the necessary adjustments to the timeframes involved.

If the student is granted withdrawal due to a physical or mental condition, the student must provide documentation that the condition is under control or resolved prior to returning to the program. If a disability exists, the student must make requests for reasonable accommodations prior to reinstatement in the program. The student must provide evidence that he/she is ready to fulfill the academic requirements of the program and assume responsibility for the safety and welfare of patients during the clinical component of the program. The DPT faculty will determine if the requested accommodations are reasonable given the academic and clinical demands of the program and profession.

Under the Chairperson’s discretion, the granting of a temporary withdrawal is subject to the enrollment numbers and space availability of the class to which the student is requesting to return. Upon returning to the program, the student will be required to fulfill any curricular changes or other requirements that have been instituted while the student was away from the program. A reasonable effort will be made to notify the student, prior to withdrawal, of any known proposed changes. However, unforeseen changes are always a possibility. Students who have already taken a one-year of temporary withdrawal cannot be granted another as they would not be able to graduate in the four-year time limit. (See academic standard section). Upon return, students will follow the handbook for the cohort they are joining as they move forward in the program.

STUDENTS REQUESTING ACCOMMODATIONS

Please visit DISABILITY SERVICES at this link: https://www.marquette.edu/disability-services/accommodations.php to follow the process.
**TRANSCRIPTS OF CREDITS**

Transcript requests can be made online, by mail, or in person. If by mail the request must be sent to the Office of the Registrar, P.O. Box 1881, Milwaukee, Wisconsin 53201-1881. (The Physical Therapy office is not able to fill these requests). See the Undergraduate Bulletin or the Registrar’s website.

**TRANSFER WITHIN THE UNIVERSITY**

The various colleges of Marquette University operate under the jurisdiction of separate Deans. Therefore, enrolled students must submit to the Office of the Registrar a formal Application for Internal Transfer if they wish to transfer from one college to another. Various criteria may be considered by the colleges during review of the student’s request to transfer colleges, including, but not limited to: current Grade Point Average, cumulative Grade Point Average, prior academic record and prior academic misconduct issues. If the Application for Transfer is approved, the student will be governed by the degree requirements of the college into which the transfer is made. Because Marquette conducts an early registration several months prior to the start of each term, it is to the student’s advantage to apply and be accepted as early as possible. Application forms are available online at www.marquette.edu/registrar and a completed application must be submitted to the Office of the Registrar no later than one week before the start of the session for which the student wishes to enroll.

**UNDERGRADUATE MAJORS**

You must declare an undergraduate major by the second semester of your sophomore year. It is possible to meet the 31 core course requirements for physical therapy by selecting any of the following undergraduate majors. Please note, those majors marked with an asterisk (*) may require some summer classes. Undergraduate majors must be completed by the end of the spring semester of the fifth year. If you are an Exercise Physiology major, you will not be able to complete your undergraduate degree until after the fall semester of year five. However, you may attend and walk through the graduation ceremony in May of your fourth year.

Biomedical Sciences
+++Exercise Physiology (Master’s in Athletic Training track available)
Literature and Culture
Philosophy
Physiological Sciences
Psychology
Sociology
Spanish Language
Biomedical Engineering***

**Other BA majors – (The majority of the BA majors will work in the 3-year time frame and students should contact the College of Arts and Sciences for individual plans).**

***Biomedical Engineering is a rigorous major with many requirements. Time conflicts will likely arise which would delay entry into the professional phase by one year, and therefore require seven years to complete the undergraduate and DPT degrees.

**VOLUNTEER HOURS**

Volunteer hours are no longer required but encouraged. If you have questions about going into physical therapy as a career choice, volunteering in physical therapy will give you the necessary knowledge to see if physical therapy is the right fit for you.

**WITHDRAWAL FROM PHYSICAL THERAPY**

Withdrawal from the program, as a direct admit physical therapy student, is achieved through a written request submitted to the Chairperson of the Department of Physical Therapy. Any student considering withdrawing from the physical therapy program is encouraged to meet with the Chairperson of the Department of Physical Therapy or his/her advisor prior to making a final decision.
MARQUETTE UNIVERSITY, DEPARTMENT OF PHYSICAL THERAPY
ESSENTIAL FUNCTIONS FOR NEW AND CONTINUING STUDENTS
Approved 11/05/07 as advisory to be shared with DPT 1 and DPT 4 students in handbooks.

Reasonable Accommodation:
In an effort to complete classroom or clinical requirements in the DPT program, a student may request reasonable accommodation(s). Please note: The Department is not legally required to accommodate a disability if it is not disclosed. Additionally, disabilities disclosed after the fact such as failure to meet academic and/or clinical requirements have no legal standing.

It is the policy of Marquette University, the College of Health Sciences, and the Department of Physical Therapy to provide reasonable accommodation to qualified applicants/students with a disability so they can fulfill required tasks and technical standards. Guidelines are provided by the Americans with Disability Act. In accordance with this Act, the reasonableness of the requested accommodation must be determined on an individual basis. To make this determination about reasonable accommodation(s) requires interaction that the applicant must initiate. The process starts with the student making contact with the University’s Office of Disability Services, Mr. Michael Rusin (414) 288-1645; michael.rusin@marquette.edu. The coordinator then contacts the Department of Physical Therapy and discusses needs and options. The student, the coordinator, and the relevant faculty members together formulate reasonable accommodation solutions.

The building in which the Department of Physical Therapy is housed is accessible to those who use wheelchairs. Handicapped parking and restroom stalls.

By the end of the educational preparatory experiences, all students must be able to carry out the basic duties of a generalist physical therapist with or without reasonable accommodation(s). A generalist physical therapist is one who is capable of treating patients across the lifespan. A physical therapist graduate is a recognized practitioner of choice to whom consumers have direct access for diagnosis of, interventions for, and prevention of impairments, functional limitations, and disabilities related to movement, function, and health.

Essential Functions:
Marquette University’s Department of Physical Therapy promotes the broad preparation of students for clinical practice. Graduates are prepared to be general practitioners, i.e., to be able to treat patients of all ages and diagnoses in all practice settings. This is in line with state licensure acts. Following graduation and the passing of a licensure examination, practitioners are licensed to practice in accord with a state’s practice act. To complete generalist physical therapy education students must demonstrate competence in all aspects of practice including those intellectual, physical, and social tasks that together represent the fundamentals of professional practice. Some of these competencies are encompassed in what is known as Professional Behaviors (Appendix 1). Freshman applicants are assessed by the Marquette University Office of Undergraduate Admissions (see undergraduate bulletin). Transfer applicants and continuing students will be assessed not only on their scholastic achievement and ability, but also on their intellectual, physical, and emotional capacities that meet the full requirements of the curriculum of the professional program. The Physical Therapy faculty exercise judgment when evaluating applicants or students’ character, academic and extracurricular achievements, and overall capability and suitability for entering or continuing in the program. The information sources include the application, letters of recommendation, transcripts, Graduate Record Examination scores (for transfer students), and personal interviews.

The professional accreditation association requires that the physical therapy curriculum provide a general professional education that enables each student to deliver entry-level clinical services. This requires the development of a broad array of basic knowledge, skills, and behaviors, appropriate to enabling self-directed learning to further professional development, and the delivery and management of physical therapy services in a variety of care settings. The basic and applied science component of the professional curriculum is designed to establish a core of knowledge and skills necessary for success in clinical education experiences. The clinical curriculum typically includes diverse experiences in ambulatory and inpatient settings. These rotations develop the ability to practice independently, without regard for any future choice of specialty, i.e., to practice as a generalist.

Residual functional limitations following accidents, surgery, and certain chronic or recurrent illnesses may be incompatible with successful completion of all aspects of physical therapy preparation as they may interfere with patient care, safety,
and possibly productivity/efficiency. Some accidents, surgeries, and illnesses are associated with a high likelihood of student absenteeism and should be carefully considered. Deficiencies in knowledge, judgment, integrity, character, or professional attitude or demeanor that result from absences or other reasons may jeopardize patient care and may be grounds for course/internship, failure, and/or possible dismissal from the program.

Physical therapy education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behavior. The Doctorate of Physical Therapy (DPT) degree awarded by Marquette University, Department of Physical Therapy, at the completion of the student's education process, certifies that the individual has acquired a broad base of knowledge and skills requisite for the practice of physical therapy. To this end, the student is required by the faculty to successfully complete each required course and all clinical education experiences in order to complete graduation requirements for the degree. Technological compensation (ex. sound amplified stethoscope) can be made for a specific disability (ex. hearing impaired) a student may have. On the other hand, students who require the need of a trained intermediary to permit decision-making and/or performance of a specific skill by the student based on the mediator's power of selection, interpretation, and/or observation is incompatible with the independent practice of physical therapy and licensure.

These standards describe the essential functions students must demonstrate in order to fulfill the requirements of a general professional education, and thus, are prerequisites for entrance, continuation and graduation. Collaboratively, Marquette University’s Office of Admissions, Department of Physical Therapy, and Coordinator of Disability Services will consider for admission any qualified applicant who demonstrates the ability to successfully perform in a safe and timely manner, or to learn to perform the skills in a safe and timely manner as specified in this document. Applicants are not required to disclose the nature of any disabilities to the Admissions Committee; however, any applicant with questions about the requirements noted above is strongly encouraged to discuss the issue with the Coordinator of Disability Services prior to the start of school or prior to any interviews. If appropriate, and upon request of the student, reasonable accommodation(s) may be made.

The following technical standards specify those attributes that the faculty of the Department of Physical Therapy considers necessary for completing the professional education program and enabling each graduate to subsequently enter clinical practice. Applicants for the DPT degree must have abilities and skills in the following general areas: observation; communication; sensory and motor coordination and function; intellectual-conceptualization; and behavioral-social-professional abilities and aptitude. Each of these standards is described in detail below. Students must be able to independently perform the described functions. For continuation in the program the same standards are to be met.

**Observational Skills:**

The student must be able to observe the instructor and the instructional media, classmates, guest instructors, and patients in the classroom, laboratory rooms and in clinical environments. A candidate must be able to observe accurately at a distance and close at hand. Observation necessitates the functional use of the sense of vision and somatic sensation. It is enhanced by the functional use of the sense of smell. Reasonable accommodation(s) recommended by the Coordinator of Disability Services will be made. Accommodation may include additional coursework, meetings with a communications expert, tutoring, and meetings with the faculty member(s).

**Communication Skills:**

A student must be able to speak, to enunciate, to hear, and to observe patients in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications. A student must be able to communicate effectively and sensitively with patients. Communication includes speech, hearing, reading and writing. The student must be able to communicate effectively and efficiently in English, in oral and written form with all faculty members, patients and their caregivers, clinical supervisors, and others associated directly or indirectly with the care of the patients. Reasonable accommodation(s) recommended by the Coordinator of Disability Services will be made. Accommodation may include additional coursework, meetings with a communications expert, tutoring, and meetings with the faculty member(s).

**Intellectual-Conceptual Skills:**

These abilities include measurement, calculation, reasoning, analysis and synthesis, solution of novel problems and creativity. Problem solving, the critical skill demanded of students and practicing physical therapists, require all of these intellectual abilities. In addition, the student should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures. Reasonable accommodation(s) recommended by the Coordinator of Disability Services will be made. Accommodation may include additional coursework, tutoring, note takers, meetings with faculty member(s), and ad lib access to models and other visual aids.

**Behavioral-Social-Professional Interaction Skills:**

Candidates/students must possess the emotional health and stability required for full utilization of his/her intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities, attendant to the diagnosis and care of patients, and the development of mature, sensitive and effective relationships with patients on a regular basis.
Candidates/students must be able to tolerate physically, emotionally, and intellectually taxing workloads and to function effectively under these stresses. Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations is expected and required. Mindfulness, compassion, integrity, concern for others, interpersonal skills, cultural competence, interest, and motivation are all personal qualities that are assessed during the admissions (transfer students) and educational process. Typical student behaviors include those that reflect willingness to take on extra work, the pursuit of excellence, ability to compromise, to work with others toward fulfillment of joint goals, and other psychosocial dispositions that are necessary for professional interactions that benefit patients and organizational harmony. Utilization of ethical principles in making clinically relevant decisions and the American Physical Therapy Association’s Code of Ethics and interpretive guide are expected to be considered in interactions with peers, faculty, guests, patients, supervisors, and other stakeholders.

Some cultural or religious practices may impact a student’s educational experience in the program. For instance, some students may be restricted in their contact with people of the opposite gender in laboratory experiences or with clients of the opposite gender while on clinical education experiences. In teaching laboratories, normally students are asked to dress with some body parts exposed for selected laboratory experiences such as shorts and halter tops for female students and shorts for male students. If students have restrictions that affect laboratory or clinical education experiences because of their cultural or religious beliefs, they should notify the program so that reasonable accommodations may be evaluated.

When necessary reasonable accommodation(s) recommended by the Coordinator of Disability Services will be made. Accommodation may include additional coursework, counseling, testing as well as a combination of actions.

**Psychomotor Skills:**
It is essential that candidates/students be able to tolerate sitting and maintaining an upright posture such as standing for several hours at a time. The ability to consistently transition and relocate from place of residence to class, clinical settings, and move within and between rooms as needed for changing groups, lab partners, work stations, and patients in a safe and timely manner is essential.

- Position oneself and the body parts of another to examine, move, communicate with, teach, and treat many times a day. Occasionally, be able to generate sufficient force to move inanimate and animate objects equal to your body weight, with and without assistive equipment, with and without help (Nosse, 1996).
- Move clinical equipment in all directions and to and from various heights as needed.
- Manipulate common tools used for testing cranial nerves, sensation, joint range of motion, muscle strength, speed, length, size, weight, cardiopulmonary endurance, etc. on multiple occasions, daily.
- Guide, facilitate, inhibit, and resist individual and group muscle action and joint motion as done in exercise and manipulation many times a day.
- On occasion return a sitting or upright person who has lost their balance to a safe and stable/secure position.
- On occasion, safely decelerate/control the speed of a person’s fall from a seated or standing position.
- On occasion, assist a client on stairs, ensuring both the therapists and patients balance and safety.
- Possess the current certifications required by OSHA (ex. standard precautions) and AHA (ex. CPR with AED) certification.

When necessary reasonable accommodation(s) recommended by the Coordinator of Disability Services will be made. Accommodation may include alterations in lighting, devices that amplify or transmit sound, captioned or scripts of videos, accessible storage of equipment and materials, and individually designed strengthening programs, cardiopulmonary endurance programs or physical therapy treatment.

**Self-Care:**
Students/candidates should possess and maintain good health practices with regard to cleanliness and dress appropriately to safeguard others that they come in contact or close proximity to, particularly those who may be immuno-compromised. Living arrangements in the close proximity of campus to facilitate timely arrival for all classes and clinical education experiences should be a priority.

**Curriculum Requirements:**
In addition to the abilities specified above, students must be able to successfully complete, with or without reasonable accommodation, all required components of the curriculum. Compliance with the program’s essential functions does not guarantee that an individual will successfully complete the licensing examination or be hired after graduation.

**Tests and Evaluations:**
In order to evaluate competence, the Physical Therapy Department employs periodic examinations, both written and oral-
practical, as an essential component of the curriculum. Prior to full-time clinical education experiences, students are required to complete all requirements (see student handbook). Successful completion of all examinations is required of all students as a condition for continued progress through the curriculum. Reasonable accommodation(s) recommended by the Coordinator of Disability Services will be made for taking examinations.

**Clinical Assessments:**
Demonstration of clinical competence is fundamental to the career of the student. The process of evaluation of the clinical performance of the student is an integral and essential component of the curriculum. Although reasonable accommodation will be made, participation in clinical experiences and the evaluation of that participation is required. The Clinical Performance Instrument (CPI) (Appendix) and the PT Specific Professional Behaviors (Appendix) are evaluation tools used to assess performance on full time clinical internships and to gauge levels of clinical competence.

STUDENT HANDBOOK RECEIPT

I ___________________________ acknowledge receipt of the MU DPT Pre-Professional Student Handbook on _____________. I certify I have read, or will read, the handbook and that it is my responsibility to be informed of the contents.

________________________   Signature

This receipt is due **October 16th** in the PT Office.
ESSENTIAL FUNCTIONS FORM

I certify, by my signature below, that I have read and understand the Essential Functions for new and continuing students in the Marquette University Department of Physical Therapy in the Essential Functions Document. I believe to the best of my knowledge that I meet each of these standards with or without reasonable accommodation. I will notify the Department Chairperson if I have questions about meeting any of the Essential Functions in the future.
