

Why Partner for Clinicals with MUPT?

Top 20 Ranked PT Program

Our program was ranked #20 out of 245 schools in the most recent US News and World Report for PT schools.

Two check-ins during clinicals from DCEs

Our clinical ed team will check in at least twice during the clinical, ensuring student issues are addressed promptly.

Only in-person classes and labs

We are not a hybrid program. We emphasize interpersonal communication to our students: with patients, with CIs, with other healthcare professionals.

Advanced Electives

Our students are offered advanced electives in ortho, neuro, peds, acute care, sports med, and more! This allows them to begin to learn advanced clinical skills while still in school.

Discounted Rates on CEU courses at Marquette

Receive discounted rates on CEU courses located on Marquette's campus, including the CCIP level 1 CI training. See our website for more information.

Host Business and Leadership-focused Students

A select group of our cohort joins an elective business and leadership specialization, gaining additional leadership skills and working with select clinical partners for further development. Visit our website for details.
