Intent: Position of President

Good afternoon/evening,

My name is Shelby Cullinan, a current Sophomore in the College of Engineering with an intent to pursue the concentration of Bio-mechanics. I am here today, however, with the intent to pursue the position of Resident Hall Association's President. While I did just hop into the open position of Mashuda Hall's representative I do hope that I've met expectations for that as well as the groups and committees I've been a part of. With this experience and the guidance of the advisors and other members I hope to fulfill my duties as President, should I get elected, and meet expectations here too. My goal for RHA is increased involvement along with connection between the student government bodies and an understanding from the general student body of the differences between them. My plan for this would be trying to best inform students at the beginning of the year when many new faces come to the CPC meetings and support representatives to be more active in their roles in supporting both RHA and CPC, rather than simply being a liaison between the two. I also hope to use my position to connect the governing bodies more and strengthen communication in order to increase efficiency. I know this may just sound like good ideas and intent, but I would love the opportunity to be your RHA President to show that I can step into the position and carry out my duties to the fullest. Thank you for your consideration.
